

Juliette Armand

Skin Boosters InfoBook

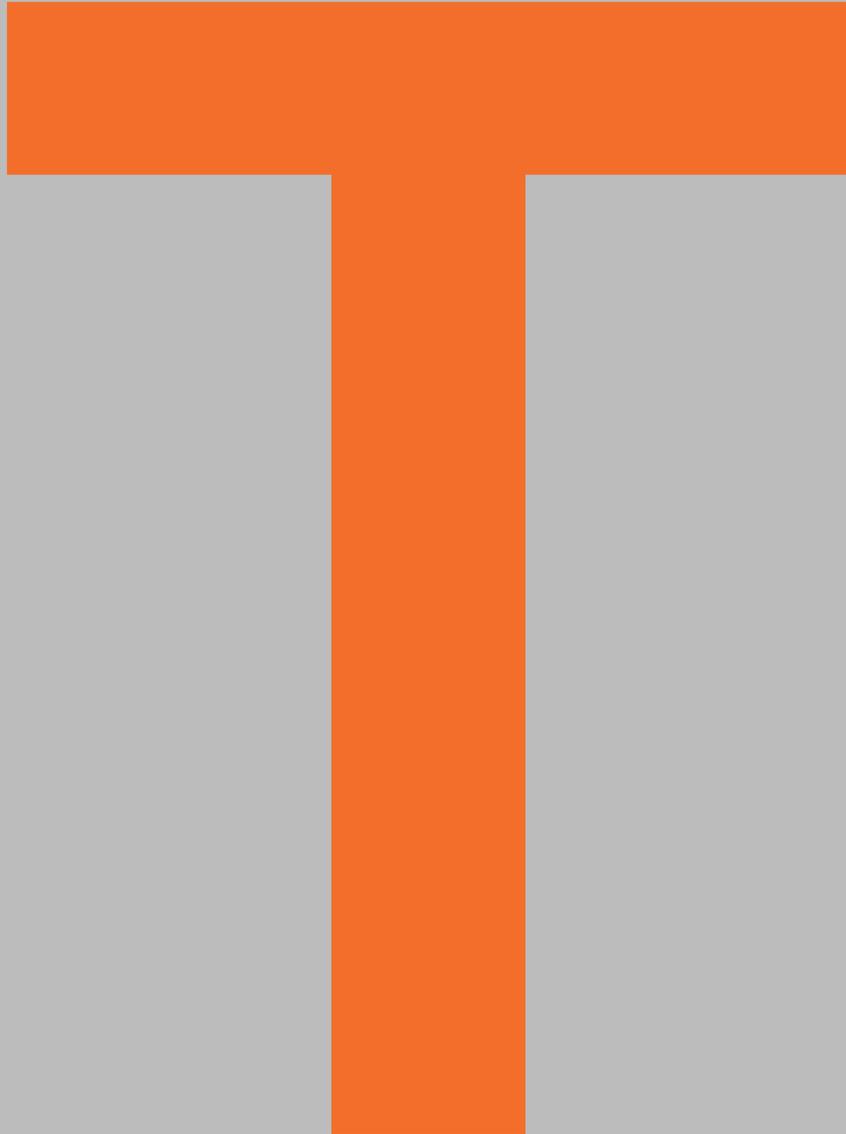

The reason I sign on these cosmetics is not a desire for fame. Behind this signature there is a message. A personal dialogue. When I am at the lab researching and developing a new formulation, I see before me the needs of each person individually, as if I am about to create a personal line of skincare.

Ioulia Armagou

Our path in time

Our Personal Start

Juliette Armand was established in 1992, when chemists Ioulia Armagou and Michalis Papaefstratiou decided to become involved in the beauty industry, to explore new formulas and to present their personal values to laboratories. That is how Juliette Armand, The Personal Professional Skincare came into being, to create innovative cosmetics, based on scientific research.

Our Professional Way

Our activity focused on trying to obtain maximum efficiency formulations, to meet the high standards of professional skincare.

Our Professional Reputation Internationally

The Juliette Armand brand name and the Elements, Skin Boosters, Sunfilm and Ameson series have gained a strong position at beauty centres and are already present in more than 40 countries around the world.

Our Professional Investment

Thanks to our success, our company now owns a vertical production unit in Athens, located at a state-of-the-art facility. We have invested in advanced technological equipment and highly trained personnel, and have obtained international certifications based on stringent standards.

Our Personal Determination

Since 1992, science has changed dramatically and the beauty industry today has to meet particularly demanding requirements. We continue and persevere as passionately as before in trying to find the next formula, the next formulation, the next innovation.

Our values

1. Formulas

Continuous search for innovation.

2. Scientific conscience in the selection of ingredients

- Nature alone is not enough and is not always safe.
- Which natural ingredients, of what origin and in what synergies?
- How much nature and what technology?
- When should technology prevail and when should nature remain the exclusive factor?

These scientific questions require safe and effective solutions. We provide answers that constitute the secrets of our formulas. We do not serve "ecological" needs or "fake" dilemmas. What is natural is not necessarily safe. For us, the safety, quality and effectiveness of the products are determined by quality control.

3. Production

All Juliette Armand products are manufactured in our laboratories in accordance to the European Union's Good Manufacturing Practices (GMP) for cosmetics.

4. Packaging

Juliette Armand packages are designed to provide:

- Water-tightness

- Safety, with security seals
- Environmentally friendly inert materials
- Materials without extra volume and weight (excessive paper) that do not have increased disposal requirements and do not increase the product cost
- Materials of high aesthetic standards, functional, practical, reliable and durable

5. Effectiveness

Product effectiveness is documented without exaggerations. It is based on laboratory, clinical and dermatological tests of raw materials and end products.

6. Quality Control

We implement a strict quality control process in accordance with European Union regulations (Physicochemical and microbiological control of raw materials and end products, preservatives control, SPF certification, Challenge test, etc.).

7. Application competence

Experienced and well-trained scientific personnel (chemists, biologists, doctors and cosmeticians) are always available to provide all required information.

8. Environmental responsibility

Juliette Armand is committed to operating its business with awareness and respect to nature, people and the future. Raw

materials, methods and all stages of production reflect this commitment towards the environment, at all times and in all procedures. Unconditionally.

9. Respect to customers

Our customer relationships conform to ethical rules and are governed by honest promises, reliability, clear results and consistency.

10. Social Responsibility

Beauty is not vanity. Cosmetics are not a luxury. They are products that satisfy the need for care and self-respect. Our advanced formulas are personally addressed to all people and are intended to make them feel well and comfortable in their skin. This is signified by our affordable prices.

Milestones

1992

Chemists Ioulia Armagou and Michalis Papaeferatiou establish Juliette Armand and focus their work on the research of highly effective formulas.

1993

The Notabilia cream is created and runs a very successful course. Its advanced formula (Extra Moisturizing Cream) can effectively compete with later-developed creams.

1996

A pioneer in the use of hyaluronic acid, Juliette Armand creates a wide range of serums in defense of their high effectiveness. In serum form, active ingredients are present in maximum content; 21st century cosmetology has just begun.

2001

The company is established in Athens, at state-of-the-art, privately-owned, integrated premises, constantly investing in sophisticated equipment, new procedures, research, new products and well-trained scientific personnel. Production process complies with the European Union's Good Manufacturing Practices (GMP) for cosmetics.

2003

In a period when everything is impersonal and industrialized, the founders of Juliette Armand decided to establish a personalized company. Based on their personal and professional values, they have created their own concept – The personal professional concept. And it guides every step of their course.

2004

The innovative EFFECTOX™ technology by Juliette Armand stops cellular contraction, by minimizing expression lines (muscle ageing). This discovery by Juliette Armand laboratories marked the success of the SKIN BOOSTERS anti-surgery system, cosmetology's alternative to botox, eyelid surgery, chemical peeling, mesotherapy and liposuction. With Skin Boosters, your appointment with plastic surgery is postponed!

2005

Elements: a complete professional line of high-end products, the elements of evolution for face and body beauty and health, a new, complete method of combined action and total treatment of all skin conditions. A big range of products available to cover the needs of the most demanding skin types.

2006

A-2 BLOCKERS is a chrysanthemum herbal extract that has brought about a revolution to body care products. It specifically blocks $\alpha 2$ receptors, ensuring a non-stop lipolysis process.

2010

The company implements the ISO 9001 quality control system for research and development, manufacturing, packaging and marketing of cosmetics, as certified by TÜV Austria certificate.

2015

After 23 years of research, development and production of professional-quality cosmetics, Juliette Armand announces the AMESON Skin Medical Series, bringing all the benefits of science to medical aesthetic products. The name of the AMESON range, inspired by the Greek word AMESOS ('immediately'), underlines the commitment to medical aesthetic skin care with IMMEDIATE results.

2008

The new Sunfilm sunscreen line by Juliette Armand meets the very real needs for increased sun protection, in accordance to the 2006/647/EC decision by the European Union. The line contains ANTITOX™, a powerful cocktail of new-generation antioxidants which prevents DNA damage from sun rays, repairs DNA, prevents irritations and erythema, protects from pollution and prevents ageing.

2011

The two founders remain shareholders and the company is 100% Greek. Since 2011 Stratis Papaefstratiou-Armagos (B.Sc. Chemical Engineer) and Bill Papaefstratiou-Armagos (B.Sc. Finance & Mathematics, M.Sc. Computing Science) have also joined Juliette Armand shareholder group, signifying the contribution of the second generation to the company.

2017

Juliette Armand celebrates 25 years of success. A special moment in the brand's history and at the same time a new beginning. A moment to let go of things in the past and embrace new ones for the future.

Skin Boosters

Free of Parabens, Propylene Glycol, Mineral Oil, Allergens, SLES, SLS

Skin Boosters

Your appointment with plastic surgery is postponed.

The alternative to plastic surgery

Having been present and active in the beauty and skincare industry for many years, we now bring you the advanced Skin Boosters anti surgery system, with the promise that your appointment with plastic surgery can be postponed.

Skin Boosters is a comprehensive targeted skincare product line, constituting an alternative to plastic surgery. It was designed in Juliette Armand's laboratories and meets the current consumers' increased demands for ensuring the skin's health and youthful appearance.

The Skin Boosters anti surgery system constitutes a breakthrough in the science of cosmetology and confirms our commitment to provide cutting edge products of advanced technology, capable of maximizing efficacy in a safe and natural way.

5 innovative targeted treatments

The innovation with Skin Boosters lies in the acceleration of the natural biochemical processes of the skin through non-invasive, effective and safe processes, implementing the Skin Boosting method. So, we have created 5 advanced therapies which utilize the power of human cells and offer cosmetic solutions to 5 key issues of face and body care. exfoliation, acne, anti-aging, eyes, localised fat.

With the Skin Boosters line, we present an alternative to the invasive methods of plastic surgery and we state our anti

surgery promise, offering highly effective solutions that do not involve the use of gauzes or scalpels and do not require painful recovery times.

- Chemical exfoliation & Acne → Apocalypse Therapy
- Botox → Thavma Therapy
- Mesotherapy → Chronos Therapy
- Blepharoplasty → Opsis Therapy
- Liposuction → Schema Therapy

System of extremely precise therapies

This advanced system comprises of comprehensive, individual therapies, which ensure the optimal results they promise by specifying highly accurate techniques in the treatment protocol to be followed strictly by beauty professionals. Each treatment is completed with products that are especially designed for care at home providing "non stop action".

Technology & ingredients

The characteristic advantage of the line is that its products are "skin boosters", that is, products with complex and technologically advanced formulas, which boost and enhance the natural processes and functions of the skin. The formulas of the Skin Boosters line products are based on the synergy of peptides and active ingredients which, in a targeted way, accelerate the natural functions of the skin and repair its malfunctions.

The advanced technologies which

enhance the products' formulas translate into the biological mechanisms of skin damage, the synergistic combination of active ingredients and the sophisticated delivery and penetration system of "Cosmetic Drones". The "Cosmetic Drones" technology is one step ahead in the development of systems for the delivery of active ingredients to the skin, as it is capable of selecting the desired target cell with great accuracy and releasing the active ingredient inside that cell through endocytosis. This technology avoids adverse interactions whilst achieving maximum efficacy and safety in use.

Safety

All Skin Boosters line products are designed so as to be fully harmonised with the global scientific tendencies regarding cosmetic and laboratory achievements. In this context of creating "state of the art" cosmetics, all the products of the Skin Boosters line are characterised by strict safety regarding human health and adhere to the strictest regulations on cosmetics set by international organisations.

The InfoBook you're holding in your hands puts you, beauty professionals, in direct and open contact with all the information held at our labs regarding effects, technology, treatment protocols and ingredients. The aim is that you harness this scientific knowledge to achieve the greatest efficacy and excellent results in your work.

Apocalypse Therapy

You don't have to resort to chemical peeling!

Apocalypse Therapy, based solely on chemically untreated dried sponges originally found in lakes, is a 100% natural treatment for peeling (phytopeeling), rapid cell renewal, regulation of acne symptoms and skin oil levels.

How the treatment works

Phytopeeling 100% natural raw material

Phytopeeling is an entirely natural product originating from sponges found in the lakes of Russia and Canada. The sponges are dried (Spongilla dry powder) in a completely natural way, without using any additives, and they are then pulverised into a fine powder, taking the form of pins (spicules) of various dimensions, which can be effective as a dermabrasion mechanism or as a skin rejuvenation method.

Because of the spongilla spicules it contains, when rubbed against the skin, Phytopeeling can stimulate microcirculation causing hyperaemia, increase the flow of oxygen and nutritious ingredients in the cells, accelerate the removal of the uppermost dead skin cells (peeling) and stimulate skin cell rejuvenation. Causing intense skin hyperaemia leads to increased cellular metabolism and stimulates the synthesis

of collagen, elastin, fibronectin and hyaluronic acid.

Spongilla Spicules Technology

The above action mechanism of Spongilla Spicules in Phytopeeling provides an entirely natural method of exfoliation and rapid renewal of skin cells, and has a wide range of applications configuring different skin treatments, depending on the intensity of the friction used, the body part being treated and the synergetic action of the various active ingredients.

- It stimulates cellular renewal and removes degenerated cells, preventing the occurrence of dyschromias.
- It activates vital functions of the skin and invigorates disorganised tissue, restoring skin consistency, elasticity and brightness.
- It restores abnormal keratinisation of the skin, balances sebum secretion and makes the skin transparent.

Synergy of active ingredients

Alongside the Spongilla Spicules technology, a powerful cocktail of specialised ingredients synergistically delivers multiple and different effects, addressing wrinkles, scars, acne marks,

dyschromias, acne symptoms and skin oiliness.

Treatments for exfoliation and acne

At Juliette Armand laboratories, building on the sponges' action distinctive features, we have, after many years of research in applied beauty and skin care, developed two different treatment protocols: one for exfoliation and rapid skin rejuvenation and one for acne and oiliness regulation.

1. Exfoliation & Rejuvenation Treatment

This treatment follows the technique of applying friction of graduated intensity between the spongilla spicules and the skin, thereby causing hyperaemia and peeling for the exfoliation and cellular stimulation of the skin.

2. Acne Treatment & Oiliness Regulation

In case of acne and skin oiliness, the spongilla spicules is applied in a gentle way, without using friction or causing intense hyperaemia, thereby increasing cellular metabolism, reducing acne symptoms and balancing sebum excretion.

J.A

Apocalypse Therapy

Exfoliation & Rejuvenation

100% natural treatment for medium exfoliation (phytopeeling) and rapid skin cell renewal and rejuvenation.

Professional beauty treatment combining exfoliation (hyperaemia and peeling of graduated intensity) and skin rejuvenation, smoothing wrinkles, scars, acne marks and reducing dyschromias and freckles. The treatment is based on the exfoliating and regenerating action of Spongilla dry powder enhanced with the synergistic action of specific regeneratives (Kelifluo and growth promoters) and a cocktail of calming ingredients.

It may also be optionally combined with alpha hydroxy acids, as well as followed by targeted anti-aging & brightening treatment protocols.

The treatment comprises of two sessions at the beauty clinic over the course of 5 days plus a skin care regimen to be followed at home between the sessions. It is not necessary to stay at home, however special skin care and strict sun protection is required.

Main action

Exfoliation, renewal and rejuvenation of the skin.

Secondary action

Toning and regulating skin oil levels.

Indications

Wrinkles, scars, acne marks, dyschromias, freckles, stretch marks, reduced skin elasticity.

Skin types

Normal, oily, combination and dry skin.

Counterindications

Thin and sensitive skin with telangiectasias, melanoma, hypertrichosis, skin conditions, active inflammatory acne, allergies, wounds, dark coloured people with dyschromias, pregnancy, herpes labialis and herpes zoster.

Sun exposure is strictly forbidden following the application of the protocol.

Active ingredients

PHYTOPEELING, KELIFLUO, METHYL SALICYLATE, BIO-PLACENTA, DRIELINE, PENTAVITIN, DERMONECTIN

Recommended sessions

Depending on the clinical presentation of the skin.

Session duration

50 minutes for the first session (without sebum extraction) and 55 minutes for the recuperation session.

Repeatability

Depending on the clinical presentation and the type of skin; in any case, no sooner than after 28 days.

Treatment Protocol

Exfoliation & Rejuvenation

Step 1: Cleansing

Use Hydra Cleansing Milk to cleanse face and neck thoroughly and remove excess oil, dirt and make-up. Remove with a damp cotton pad. Then, apply Cleansing Tonic Lotion to a cotton pad and use to tone the skin.

Depending on the skin's clinical presentation, this may be preceded by sebum extraction if deemed necessary.

(Total duration: 5 minutes)

Step 2: Preparation

For protection, use the Eye Shine Mask to cover the eyes and lips contour area, and use the Nourishing Cream to cover the entrance to the nose and any spots.

(Total duration: 1 minute)

Step 3: Phytopeeling

Mix 5g of Phytopeeling Pure powder with 7ml Phyto-AHA Lotion, until the mixture turns into a paste. Wearing gloves, apply the paste all over the face, like a mask, and massage gently with light circular motions. Wet your fingertips with Phyto-AHA Lotion and continue massaging in light circular motions until a mild erythema develops due to hyperaemia. At this point stop the friction, apply steam for 10 minutes and carefully remove the mask (very gently) from the face using cold water.

During treatment, the skin will feel hot and there will be a prickling sensation. This varies depending on the friction intensity and the skin.

The duration of each treatment depends on the type, the condition and the sensitivity of the skin, the desired depth of exfoliation and the area of application. The maximum time of application (rubbing) should not exceed 5 minutes.

(Total duration: 20 minutes)

Step 4: AHA Enhanced Action (optional)

Apply 2ml of 20% AHA Fruit Gel topically or all over the face in gentle motions, without massaging or rubbing in. Leave the gel for a little while and then remove it gently using a cotton pad saturated in Ameson Post Peel Lotion. The maximum application time of the 20% AHA Fruit Gel should not exceed 1 minute. In case of skin "blanching", remove immediately using Ameson Post Peel Lotion.

(Total duration: 2 minutes)

Treatment Protocol

Exfoliation & Rejuvenation

Step 5: Calming

Apply 5ml of Clarifying Active Mask to the face and neck and leave for 20 minutes to soothe the irritated skin. Remove gently with water.

(Total duration: 22 minutes)

Step 6: Sun Protection

Apply 2ml of Sunfilm Face Gel SPF 30.

(Total duration: 1 minute)

Home Daily Regimen: After Therapy Nonstop Action

Clear and accurate instructions of specific skin care should be provided throughout the protocol. In the first 2 days, due to the hyperaemia, there will be erythema and a tingling sensation; these will gradually diminish. Over the next 3 days the skin will peel.

During these 5 days, it is essential to use only Sunfilm Face Gel SPF30, a gel with a non-oily texture which offers wide protection from the sun enhanced with a soothing and antioxidant action.

Caution!

Until skin exfoliation is completed, any activities that might cause adverse effects or even reduce the efficacy of the treatment should be avoided. **The following actions are prohibited:**

- Washing your face with water.
- Sun exposure (mountain or seaside)
- Swimming (pool – sea)
- Anything that causes perspiration
- Make-up
- Contact with detergents and dust
- Touching your face with your hands, rubbing of your face and any peeling of the layer of dead cells that has been formed.

On the 5th day after the treatment, when facial exfoliation is usually complete, the recuperation session should take place.

Recuperation Protocol

(5 days later)

Step 1: Cleansing

Clean the face and the neck thoroughly and gently with Hydra Cleansing Milk, applying light massage with steam. Continue with Cacao Exfoliating Cream in order to gently remove any exfoliation residues, and remove with a wet cotton pad.

(Total duration: 5 minutes)

Step 2: Calming

Apply 5ml of Clarifying Active Mask to the face and neck and leave for 20 minutes to soothe the irritated skin. Remove gently with water.

(Total duration: 22 minutes)

Step 3: Repairing

Apply 2ml of Bioplacenta Serum, massaging lightly all over the face and neck until it is absorbed. Continue with 5ml of Repairing Mask, leave it to partially dry, massage gently and remove it gently with water, thereby enhancing the skin's natural renewal and cohesion functions.

(Total duration: 25 minutes)

Step 4: Rejuvenating

Apply 1ml of Apocalypsis Rejuvenating Gel to the face and neck and massage lightly until it is absorbed, boosting skin rejuvenation even further.

(Total duration: 1 minute)

Step 5: Sun Protection

Apply 2ml of Sunfilm Face Gel SPF 30.

(Total duration: 1 minute)

Home Daily Regimen: After Therapy Nonstop Action

The treatment is completed with two products for daily skin care, to be applied in the morning and in the evening (please apply them exclusively and use at least one unit of each):

- **Apocalypsis Rejuvenating Gel** (for oily & combination skins)
- **Apocalypsis Rejuvenating Gel and Apocalypsis Rejuvenating Cream** (for normal & dry skins)

In combination with applying Sunfilm Face Gel SPF 30 every day in the morning.

Apocalypse Therapy

Acne & Regulation of Oiliness

100% natural facial treatment (Spongilla dry powder) for addressing acne symptoms and regulating skin oil levels.

Professional beauty treatment effectively reducing acne symptoms and balancing sebum excretion. The treatment is based on the rejuvenating action and oiliness regulating effects on acneic skin of Spongilla dry powder, enhanced with powerful calming and specialized active ingredients (Canadian Willowherb) for addressing acne.

Main action

Addressing acne symptoms, regulating oiliness.

Secondary action

Tightening dilated pores, acne marks.

Indications

Acne, sebum hypersecretion, dilated pores.

Skin types

Acneic, oily, combination.

Counterindications

Thin and sensitive skin, melanoma, skin conditions, allergies, wounds, pregnancy, herpes labialis and herpes zoster.

Sun exposure is strictly forbidden following the application of the protocol.

Active ingredients

PHYTOPEELING, CANADIAN WILLOWHERB, METHYL SALICYLATE, VITAMIN B9 (FOLIC ACID), LACTIC ACID, AZELAIC ACID-GLYCINE COMPLEX, MULTI B COMPLEX

Recommended sessions

Depending on the clinical presentation of the skin.

Session duration

80-85 minutes.

Repeatability

Up to 2 times a week.

Treatment Protocol

Acne & Regulation of Oiliness

Step 1: Cleansing

Use Clarifying Cleanser Gel to clean face and neck thoroughly from oiliness, dirt and make-up, and remove with a wet cotton pad. Continue by drenching a cotton pad in Clarifying Active Lotion and applying it all over the face and neck.

(Duration: 3 minutes)

At this stage, sebum extraction may be performed if necessary. Apply the steamer for 20 minutes. Continue by opening blackheads and extracting sebum for 10-15 minutes. Then, apply high frequency currents for 2 minutes to disinfect. **(Duration: 32- 37 minutes)**

(Total duration: 35-40 minutes)

Step 2: Phytopeeling

Mix 5g of Phytopeeling Pure powder with 7ml of Phyto-AHA Lotion, until the mixture turns into a paste. Apply the paste all over the face, like a mask, and leave it for 15 minutes, **without rubbing in**. Then, remove it carefully and gently, using water and avoiding any friction.

(Total duration: 20 minutes)

Step 3: Calming

On dry skin free of oil traces, apply 1ml of Folic Acid (B9) Serum all over the face and leave it to be absorbed. Continue by applying 5ml of Clarifying Active Mask all over the face and neck for 20 minutes and then carefully remove with water.

(Total duration: 22 minutes)

Step 4: Hydra Mattifying

Apply 2ml of Hydra Mattifying Gel all over the face until it is absorbed. Continue by gently massaging 1ml of Clarifying Active Cream or Clarifying Tinted Cream until it is absorbed.

(Total duration: 2 minutes)

Step 5: Sun Protection

Apply 2ml of Sunfilm Face Gel SPF 30 depending on the season and the time of day at which the session takes place.

(Total duration: 1 minute)

Home Daily Regimen:

The treatment is completed with the following products for daily skin care, to be applied in the morning and in the evening (please apply them exclusively and use at least one unit of each):

For acne symptoms:

- Clarifying Face Foam or Clarifying Cleanser Gel
- Clarifying Active Lotion
- Folic Acid (B9) Serum
- Clarifying Active Cream or Clarifying Tinted Cream

For regulation of oiliness:

- Clarifying Face Foam or Clarifying Cleanser Gel
- Hydra Clarifying Serum
- Hydra Mattifying Gel

Thavma Therapy

You don't have to resort to botox!

Thavma Therapy is a facial treatment which "erases" expression lines forming when skin muscles contract and wrinkles caused by biological aging, restoring skin firmness and radiance.

How the treatment works

Effectox Technology

Expression lines (wrinkles) form (in the eye contour area, on the forehead, between the eyebrows, around the mouth) as a result of repeated and constant movements of the facial muscles. Muscles contract when they are stimulated by substances (catecholamines= adrenalin + noradrenalin) which are contained in the vesicles. This is a biochemical process which depends on the flow of sodium (Na+) and calcium (Ca++) ions in the neural cells, leading to the rupture of vesicles (exocytosis). As a result of the rupture of vesicles, catecholamines are released. A protein (snare complex) is essential for the rupture of vesicles. This is where Juliette Armand's Effectox Technology, a cocktail of the peptides Argireline, Ameliox, Leuphasyl

and specialised active ingredients, can intervene:

- It destabilizes the Snare protein.
- It regulates the flow of calcium (CA⁺⁺) and sodium (NA⁺) to neural cells.
- It reduces the release of catecholamines into the muscles, resulting in fewer stimuli for muscle contractions i.e. significantly fewer facial expression contractions.

Cosmetic Drone Technology

The above process is enhanced by the innovative Cosmetic Drone technology which combines the targeted "botox like" action of the ingredients Palmitoyl hexapeptide-52 & Palmitoyl heptapeptide-18 with an advanced system for delivering them to the skin. The X-50 Myocept Cosmetic Drone is a capsule made of inert polymer encapsulating the active ingredient hexapeptide-52 coupled externally with the navigating ligand Heptapeptide-18, which is technologically capable of selecting the desired target cell (skin neurons) with great accuracy and releasing the ingredients

within that cell through endocytosis.

This technology constitutes the optimal solution for reducing wrinkles and expression lines, as it inhibits the formation of the Snare protein complex, thereby minimizing neuronal exocytosis.

Synergy of active ingredients

In addition to the synergy of technologies, the various active ingredients moisturise the skin and protect from oxidative stress and the glycosylation of structural skin proteins, providing a natural "botox like" effect, while at the same time diminishing signs of biological aging in a safe way.

Active Ingredients: X50 MYOCEPT COSMETIC DRONE, MMW HYALURONIC ACID, LMW HYALURONIC ACID, GLYCOLIC ACID, SALICYLIC ACID, ALOE VERA, PENTACARE, LEUPHASYL, MDI COMPLEX, AVOCADO OIL, TRIMOIST, PANTHENOL, GERANIUM ESSENTIAL OIL, LAVANDA ESSENTIAL OIL, ARGIRELINE, AMELIOX, VITAMIN E, VITAMIN A, PHYTOSQUAL, A-BISABOLOL

JA

Thavma Therapy

Professional beauty treatment consisting of a course of 10 treatments as well as a daily home regimen, which "inhibits" the complex formation mechanism of expression lines and wrinkles by intervening at every stage of the biochemical process of muscle contraction, and helps moisturise and firm the skin further.

Main action

Inhibiting muscle contraction, reducing fine expression lines and wrinkles.

Secondary action

Moisturising, anti-oxidising, protecting from free radicals, reducing dark circles in the eye contour area.

Indications

Expression wrinkles (forehead, contour of the eyes and the lips), fine lines, photoaging, loose skin.

Counterindications

Counterindicated in case of herpes zoster.

Skin types

Normal, dry, oily, combination.

Session duration

38 minutes

Frequency of sessions

Week 1: 3 times
Week 2: 3 times
Week 3: 2 times
Week 4: 2 times

Stage	Quantity/treatment	Duration
Cleansing	-	3 minutes
Step 1: Thavma Peeling Gel	1.5ml	5 minutes
Step 2a: Thavma Forehead & Eye Mask	2.5ml	22 minutes
Step 2b: Thavma Face Mask	4.5ml	
Step 3: Thavma Hydra Lifting Serum	2ml	4 minutes
Step 4: Thavma Hydra Lifting Cream	2ml	3 minutes
Sun Protection: Sunfilm Face Gel SPF 30	2ml	1 minute

Home Daily Regimen: After Therapy Nonstop Action

The treatment is completed with two products for daily skin care, to be applied in the morning and in the evening (please apply them exclusively and use at least one unit of each):

- Thavma Hydra Lifting Serum
- Thavma Hydra Lifting Cream

Treatment Protocol

Thavma Therapy

Cleansing

Cleanse the face and neck thoroughly so as to remove excess oil, dirt and make-up, using products suitable for the type and condition of the skin.

(Total duration: 3 minutes)

Step 1: Peeling Gel

Apply 1.5ml of Peeling Gel Step 1 (Salycilic Acid 0.5%, Glycolic Acid 15%, Aloe Vera, Panthenol, A-Bisabolol) to the face and neck, focusing on the wrinkles, with light circular motions, until it is absorbed. Be careful not to let it get in the eyes. In case of skin irritation, remove with water and proceed as normal with the protocol.

(Total duration: 5 minutes)

Step 2: Forehead Eye Mask & Face Mask

Step 2a: Apply 2.5ml of Forehead & Eye Mask Step 2a to the eye contour area and the forehead.

Step 2b: Apply 4.5ml of Face Mask Step 2b to the remaining area of the face and neck. Leave for 20 minutes and then remove with water.

(Total duration: 22 minutes)

Step 3: Hydra Lifting Serum

Apply 2ml of Hydra Lifting Serum Step 3 to the face and neck, focusing on the wrinkles, with gentle circular motions, until it is absorbed.

(Total duration: 4 minutes)

Step 4: Hydra Lifting Cream

Apply 2ml of Hydra Lifting Cream Step 4 all over the face and neck massaging with gentle upward strokes until it is absorbed.

(Total duration: 3 minutes)

Sun Protection (optional)

Apply 2ml of Sunfilm Face Gel SPF 30 depending on the time of day that the session takes place

(Total duration: 1 minute)

Results

Effectiveness

Clinical trials with in-vivo measurements on 30 people aged 40-55 for a period of 4 weeks.

Testimonial

Clinical trials on 50 people. Self-evaluations after 4 weeks.

J.A

Chronos Therapy

You don't have to resort to injectable filling of wrinkles!

Chronos Therapy is a facial treatment which repairs and prevents the damage that time might leave on the skin. Such damage is caused by low water reserves, biological aging and oxidation from the environment.

How the treatment works

Chronos 4D Technology

Four systems for addressing and preventing the marks that time leaves on the skin:

1. The **Peeling System** is a targeted exfoliation system combining the removal of dead cells and the protection of the tired skin's water balance. This combined action is achieved by the synergy between glycolic and salicylic acid on the one hand and Urea and Keratoplast on the other.

2. The **Hydra System**, with hyaluronic acid being the most important ingredient, restores the skin's water reserves, protects from transepidermal water loss and provides hydration that lasts. The hyaluronic acid is the ingredient that plays the main part in preserving the skin's hydration, maintaining the cohesion of the connective tissue cells and protecting the skin from external harmful factors.

The treatment products in the hydration system contain 5 types of hyaluronic acid each of them with a different molecular

weight, as well as cross-linked hyaluronic acid for extending the hydration time.

3. The **Antiaging System** activates the production of collagen, elastin and hyaluronic acid by stimulating the body's own fibroblasts, thereby rejuvenating the tired skin. Many active ingredients with different action mechanisms participate in this, such as isoflavones, collagen, elastin and the peptides Matrixyl 3000 and Decapeptide-4, known as the protagonists of "antiaging".

4. The **Antioxidant System** contributes to the antioxidant fortification of the skin against environmental impurities and solar radiation (sunlight), thereby protecting it from photoaging and biological aging. Antioxidants included in this system are the vitamins A, C, E, the self-regenerating antioxidant EUK-134 and the Alpha Lipoic Acid (ALA) which is well known as the most powerful antioxidant.

Cosmetic Drone Technology

The above process is further enhanced by the innovative Cosmetic Drone technology which combines the targeted "antiaging" action of the ingredients Palmitoyl tetrapeptide-50 & Heptapeptide-15 palmitate with the most advanced system for delivering them to the skin.

The X50 Hyalufiller Cosmetic Drone is a capsule made of inert polymer

encapsulating the active ingredient Palmitoyl tetrapeptide-50 coupled externally with the navigating ligand Heptapeptide-15 palmitate, which is technologically capable of selecting the desired target cell (fibroblasts) with great accuracy and releasing the ingredients within that cell through endocytosis. This technology constitutes the optimal solution for skin rejuvenation and for boosting the synthesis of hyaluronic acid, "filling" the wrinkles in a natural way.

Synergy of active ingredients

Alongside the synergy of technologies, a powerful cocktail of specialised ingredients replenishes the volume and the density of the skin, significantly reduces the size and the depth of the wrinkles as well as their roughness, ensuring that such skin damages are restored safely.

Active Ingredients: HMW/MMW/LMW/ELMW/XSMW/CROSS LINKED HYALURONIC ACID, X50 HYALUFILLER COSMETIC DRONE, EUK 134, MATRIXYL 3000, MATRIXYL MORPHOMICS, LANABLUE, ALPHA LIPOIC ACID, DECAPEPTIDE-4, SOYA ISOFLAVONES, ALISTIN, KELIFLUO, MALUS DOMESTICA, PHYTOSQUAL, VITAMIN A, VITAMIN E, KERATOPLAST, MARINE COLLAGEN, ELASTINE MARINE, ALMOND OIL

JA

Chronos Therapy

Professional beauty therapy consisting of a course of 10 treatments as well as a daily home regimen, which restores the aqueous balance of the skin, effectively smooths out wrinkles and protects the skin against biological aging and photoaging.

Main action

Diminishing the marks time leaves on the skin (deep wrinkles, fine lines, reduced elasticity), deep hydration, nourishment, antioxidation, stimulation of collagen and elastin production.

Indications

Deep wrinkles, fine lines, expression wrinkles (forehead, contour of the eyes and the lips)

Session duration

60 minutes

Frequency of treatments

2 times a week

Counterindications

Counterindicated in case of herpes zoster.

Secondary action

Reducing dark circles around the eyes

Skin types

Normal, dry, combination.

Stage	Quantity/treatment	Duration
Cleansing	-	3 minutes
Step 1: Chronos Peeling Gel	1.5ml	5 minutes
Step 2a: Chronos Hydra Serum	2ml	5 minutes
Step 2b: Chronos Hydra C Latex Mask	40g	15 minutes
Step 3a: Chronos Antiaging Serum	2ml	5 minutes
Step 3b: Chronos Anaplastic Mask	5ml	15 minutes
Step 4a: Chronos Antioxidant Oil	1ml	10 minutes
Step 4b: Chronos Hydra Correct Cream	2ml	1 minute
Sun Protection Sunfilm Face Bliss SPF 50+	2ml	1 minute

Home Daily Regimen: After Therapy Nonstop Action

The treatment is completed with three products for daily skin care, to be applied in the morning and in the evening (please apply them exclusively and use at least one unit of each):

- Chronos Hydra Correct Serum
- Chronos Hydra Correct Cream
- Chronos Hydra Filler

Treatment Protocol

Chronos Therapy

Cleansing

Use Hydra Cleansing Milk to cleanse the face and neck thoroughly and remove excess oil, dirt and make-up. Remove with a damp cotton pad.
Then, apply Cleansing Tonic Lotion to a cotton pad and use to tone the skin.

(Total duration: 3 minutes)

Step 1: Peeling System

Apply 1.5ml of Peeling Gel Step 1 (Salicylic Acid 1.5%, Glycolic Acid 10.5%, Urea, Keratoplast, A-Bisabolol) to the face and neck, focusing on the wrinkles, with light circular motions, until it is absorbed. Be careful not to let it get in the eyes. In case of skin irritation, remove with water and proceed as normal with the protocol.

(Total duration: 5 minutes)

Step 2: Hydra System

Step 2a: Massage 2ml of Hydra Serum Step 2a into the face and neck, focusing on the wrinkles. **(Duration: 5 minutes)**

Step 2b: Prepare the Hydra C Latex Mask Step 2b by mixing 1 part (40g) powder with 2.5 parts (100ml) water until it turns into a paste. Then, lay a thick layer of the paste on the face and neck, allow it to dry and turn into latex, and then remove it by pulling it. **(Duration: 15 minutes)**

(Total duration: 20 minutes)

Step 3: Antiaging System

Step 3a: Apply 2ml of Antiaging Serum Step 3a to the face and neck massaging into the skin with upward strokes and circular motions, focusing on the wrinkles. **(Duration: 5 minutes)**

Step 3b: Apply 5ml of Anaplastic Mask Step 3b to the face and neck and leave it for 10 minutes. Massage in for 5 minutes with wet fingertips and then remove with water. **(Duration: 15 minutes)**

(Total duration: 20 minutes)

Step 4: Antioxidant System

Step 4a: Apply 1ml of Antioxidant Oil step 4a on dry skin and massage until it is absorbed, focusing on the wrinkles and being very careful around the eyes. **(Duration: 10 minutes)**

Step 4b: Apply 2ml of Hydra Correct Cream step 4b to the whole of the face and neck using gentle upward strokes until it is absorbed. **(Duration: 1 minute)**

(Total duration: 11 minutes)

Sun Protection (optional)

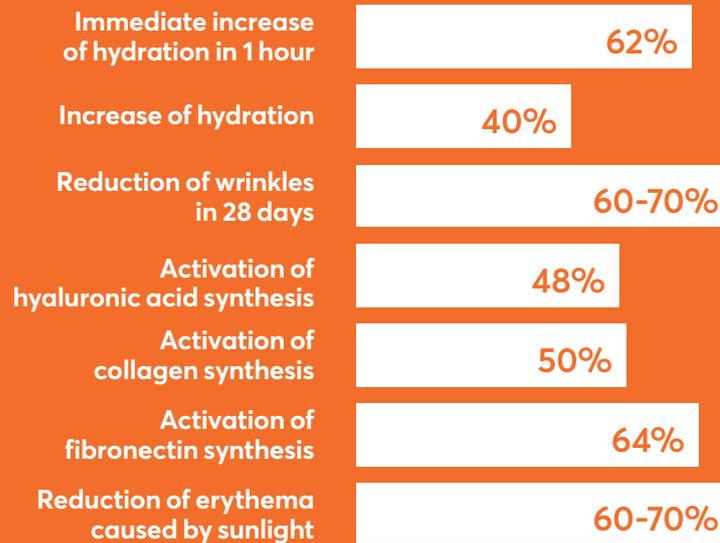

Apply 2ml of Sunfilm Face Bliss SPF 50+ depending on the time of day that the session takes place.

(Total duration: 1 minute)

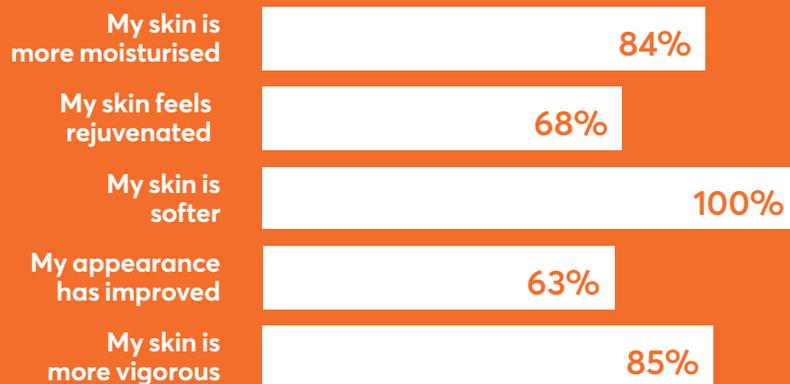

Results

Effectiveness

Clinical trials with in-vivo measurements on 20 people aged 49-60 for a period of 2 and 4 weeks.

Testimonial

Clinical trials on 22 people. Self-evaluations in a period of 28 days.

J.A

Opsis Therapy

You don't have to resort to blepharoplasty!

Opsis Therapy is an eye contour treatment that smooths out wrinkles and fine lines, reduces dark circles and swellings and firms up the skin.

How the treatment works

Eye Antitox Technology

The Eye Antitox technology is a powerful cocktail of antioxidants and active ingredients that specialises in addressing issues and sensitivity of the eye contour, exclusively. The effects of Eye Antitox are a synergistic combination of the active ingredients and the following actions:

- **Antiaging** – Deters and addresses aging
- **Antiswelling** – Decongests oedema
- **Brightening** – Fights against black circles and brightens the skin
- **Anti-irritant** – Protects from skin irritation and erythema
- **Antipollution** – Protects from environmental pollution

- **DNA Protection** – Protects the DNA from damage caused by solar radiation (sunlight)

Cosmetic Drone Technology

The above process is further enhanced by the innovative Cosmetic Drone technology which combines the targeted “antiaging” action of the ingredients Cu-Palmitoyl Heptapeptide-14 & Heptapeptide-15 palmitate with the most advanced system for delivering them to the skin.

The X50 Antiaging Cosmetic Drone is a capsule made of inert polymer encapsulating the active ingredient Cu-Palmitoyl Heptapeptide-14 coupled externally with the navigating ligand Heptapeptide-15 palmitate, which is technologically capable of selecting the desired target cell (fibroblasts in the eye contour area) with great accuracy and releasing the ingredients within that cell through endocytosis.

This technology constitutes the optimal

solution for smoothing wrinkles and increasing elasticity in the eye contour, as it stimulates the synthesis of collagen and elastin.

Synergy of active ingredients

Alongside the synergy of technologies, various targeted active ingredients protect the skin tissue from free radicals, deter lipid peroxidation caused by UV radiation, reduce erythema, tighten and brighten the skin safely.

Active Ingredients: X50 ANTIAGING COSMETIC DRONE, EUK 134, BEAUTIFEYE, MDI COMPLEX, VITAMIN E, VENUCEANE, CALMOSENSINE, UNISOOTH EG-28, ARNICA OIL, ALMOND OIL, MATRIXYL, MATRIXYL 3000, VITAMIN COMPLEX ECF, MMW HYALURONIC ACID, AA2G, ARGIRELINE, ALBATIN, HYDROXYPROLISILANE

Opsis Therapy

Professional beauty therapy for the sensitive eye contour area consisting of a course of 10 treatments as well as a daily home regimen, which improves the skin's appearance, protects it from oxidative stress and enhances the natural function of its cells.

Main action

Smoothing wrinkles and fine lines, reducing dark circles and swellings in the eye contour area, tightening, antioxidation, protection from irritation, environmental pollution and damage caused by solar radiation.

Secondary action

Hydration, radiance.

Indications

Wrinkles, dark circles, swellings, loose skin in the eye contour area.

Counterindications

No counterindications have been recorded.

Skin types

Normal, dry, oily, combination.

Session duration

39 minutes

Frequency of treatments

2 times a week

Caution!

To avoid irritation, when applying a product or massaging the area of the eye contour, be careful to stay away from the eyebrows to ensure that the product does not enter the eye mucosa.

Stage	Quantity/treatment	Duration
Step 1: Opsis Eye Cleansing Gel	1ml	4 minutes
Step 2a: Opsis Eye Serum	0.5ml	4 minutes
Step 2b: Opsis Eye Latex Mask	8g	15 minutes
Step 3: Opsis Eye Mask Cream	2ml	12 minutes
Step 4a: Opsis Eye Gel	0.5ml	3 minutes
Step 4b: Opsis Eye Cream	1ml	1 minute

Home Daily Regimen: After Therapy Nonstop Action

The treatment is completed with two products for daily skin care, to be applied in the morning and in the evening (please apply them exclusively and use at least one unit of each) :

- **Opsis Eye Gel** (morning)
- **Opsis Eye Cream** (evening)

Treatment Protocol

Opsis Therapy

Step 1: Eye Cleansing Gel

Use 1ml of Eye Cleansing Gel Step 1 to thoroughly clean the eye contour area from dirt and make-up. Remove with a damp cotton pad. This may be preceded by cleansing the face and neck using products suitable for the particular skin type.

(Total duration: 4 minutes)

Step 2: Eye Serum & Eye Latex Mask

Step 2a: Apply 0.5ml of Eye Serum Step 2a to the eye contour area massaging lightly until it is absorbed. **(Duration: 4 minutes)**

Step 2b: Prepare the Eye Latex Mask Step 2b by mixing 1 part (8g) powder with 2.5 parts (20ml) water until it turns into a paste. Then, lay a thick layer of the paste on the closed eyes, allow it to dry and turn into latex, and then remove it by pulling it downwards. **(Duration: 15 minutes)**

(Total duration: 19 minutes)

Step 3: Eye Mask Cream

Apply 2ml of Eye Mask Cream Step 3 to the eye contour area. Allow to dry and remove with water.

(Total duration: 12 minutes)

Step 4: Eye Gel & Eye Cream

Step 4a: Apply 0.5ml of Eye Gel Step 4a to the eye contour area massaging lightly and carefully so as not to irritate the eyes. **(Duration: 3 minutes)**

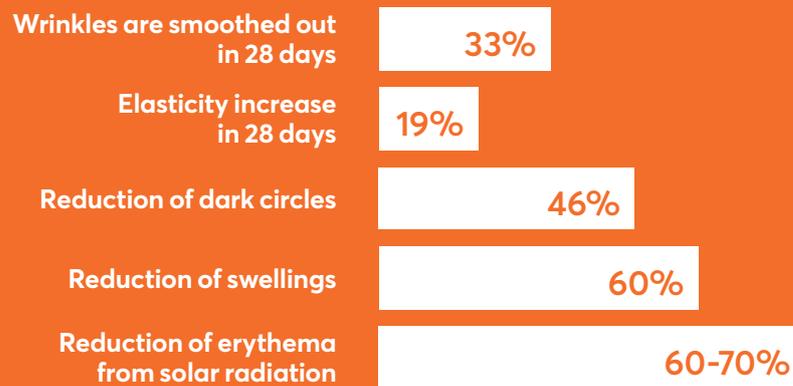

Step 4b: Then, apply 1ml of Eye Cream Step 4b to the eye contour area massaging gently. **(Duration: 1 minute)**

(Total duration: 4 minutes)

Results

Effectiveness

Clinical trials with in-vivo measurements on 30 people aged 30-75 for a period of 4 weeks.

Testimonial

Clinical trials on 28 people aged 51-72. Self-evaluations in a period of 2 months.

S

Schema Therapy

You don't have to resort to liposuction!

Schema Therapy is a body treatment which combats locally accumulated fat, cellulite and loose skin, thereby improving its appearance.

How the treatment works

PH.A2 Technology

In the human organism, fat (triglycerides) accumulates in the fat tissue. The process of fat metabolism is regulated by hormones. A hormone called epinephrine (adrenaline) activates the process of fat burning. The epinephrine binds to a receptor (adrenergic receptor), which is found on the surface of fat cells. This leads to the production of a second messenger, the cyclic AMP (cAMP), which activates an enzyme called lipase, and this turns the neutral fat to free fatty acids and glycerine. The free fatty acids end up in the blood vessels, producing energy.

In case this process gets disrupted, fat accumulates locally and cannot be reduced simply by changing diet or exercise.

The process of lipolysis is inhibited by the enzyme phosphodiesterase, which intervenes with cyclic AMP and prevents it from activating lipolysis. This process is also inhibited by the activation by the organism itself of the A2 receptors which bind adrenaline, instead of the adrenergic

receptor, and as a result lipolysis stops.

The PH.A2 technology is based on the synergy of Phytopeeling and A2 Blockers and leads to the activation of lipolysis, the inhibition of the effects of phosphodiesterase and the inhibition of the function of the α_2 receptors.

Phytopeeling is an entirely natural product originating from sponges found in the lakes of Russia and Canada. The sponges are dried (Spongilla dry powder) in a completely natural way, without using any additives, and they are then pulverised into a fine powder taking the form of pins (spicules) of various dimensions.

Because of the spongilla spicules it contains, Phytopeeling can stimulate microcirculation causing hyperaemia. The intense skin hyperaemia leads to increased cellular metabolism which stimulates cell regeneration and promotes lipolysis.

A2 Blockers is a plant extract from chrysanthemum. It binds to α_2 receptors and as a result the lipolysis process continues without interruption. In addition to activating β receptors, this ingredient, in the form of a gel, blocks the fat cells' α_2 receptors.

Cosmetic Drone Technology

The above process is further enhanced by the innovative Cosmetic Drone

technology which combines the targeted "body slim" action of the ingredients Cocoloba Uvifera fruit extract & Acetyl cyclohexapeptide with the most advanced system for delivering them to the skin.

The X50 Silhouette Cosmetic Drone is a capsule made of inert polymer encapsulating the fruit extract Cocoloba Uvifera coupled externally with the navigating ligand Acetyl cyclohexapeptide, which is technologically capable of selecting the desired target cell (fat cells) with great accuracy and releasing the ingredients within that cell through endocytosis.

Synergy of active ingredients

Alongside the synergy of technologies, the active ingredients inhibit the storage of lipids in the fat cells, accelerate blood circulation, stimulate sweat glands excretion, increase basic metabolism and promote neuromuscular relaxation.

Active Ingredients: PHYTOPEELING, A2 BLOCKERS, X50 SILHOUETTE COSMETIC DRONE CAFEISILANE C, TRIPEPTIDE-41, ACTIGYM, CENTELLA EXTRACT, A-BISABOLOL, LACTIC ACID, PANTHENOL

JA

Juliette Armand

Schema Therapy
Skin Boosters

Juliette

www.juliettearmand.gr

Juliette
Armand
Skin Boosters
Schema
Therapy
Body Serum

Schema Therapy

Professional beauty therapy for the body, consisting of a course of 10 treatments as well as a daily home regimen, which maximises the process of burning fat (lipolysis), minimises the process of storing lipids (lipogenesis) and inhibits the maturation of new fat cells. It is based on the lipolytic action of Phytopeeling in combination with the action of A2 Blockers, an ingredient which activates metabolism, inhibits the effects of phosphodiesterase and blocks the α_2 receptors of fat cells.

Main action

Lipolysis, reduced cellulite and "orange peel" skin, increased cellular metabolism.

Secondary action

Improved elasticity.

Indications

Local fat, cellulite.

Counterindications

Counterindicated in the following cases:

- Varicose veins
- Telangiectasias
- Pregnancy
- Skin conditions
- Menstruation
- High blood pressure

Session duration

45 minutes

Frequency of sessions

2 times a week, once a week using the Schema Therapy Serum ampoule and once without it.

Stage	Quantity/treatment	Duration
Step 1: Detoxifying Peeling Gel	12ml	5 minutes
Step 2: Schema Body Serum	1 serum	5 minutes
Step 3a: Thermoslim Gel	12ml	30 minutes
Step 3b: Body Sculpt Total Tech	12ml	
Step 4: Body Sculpt Total Tech	6ml	5 minutes

Home Daily Regimen: After Therapy Nonstop Action

The treatment is completed with one product for daily skin care, to be applied in the morning and in the evening (please apply exclusively and use at least one unit) :

- **Body Sculpt Total Tech**

Treatment Protocol

Schema Therapy

Step 1: Detoxifying Peeling

Apply 12ml of Detoxifying Peeling Gel all over the body and massage until is absorbed. Do not remove. Focus on the area of the body with locally accumulated fat and cellulite and avoid the breast area. In case of skin irritation, remove water and proceed with the protocol.

(Total duration: 5 minutes)

Step 2: Schema Body Serum

Apply the Schema Body Serum following the procedure below: Press the plunger to mix the powder with the solution and shake well. Then, apply the serum in the areas with localised fat and cellulite, massaging gently. Do not remove. The effects of the Schema Body Serum become noticeable through a sensation of heat and light prickling for the next 24 hours.

(Total duration: 5 minutes)

Step 3: Thermoslim

Apply 12ml of Thermoslim Gel to enhance hyperaemia and massage lightly until it is absorbed. The Thermoslim Gel causes intense hyperaemia and increases the sensation of heat in the areas where it is applied. After 5 minutes, apply 12ml of Body Sculpt Total Tech, wrap with nylon and use a thermal blanket. Allow it to work for 20 minutes and then pat dry the skin with a towel.

In case it is assessed that a more gentle version of the treatment is desirable, apply the Body Sculpt Total Tech only, without the Thermoslim Gel and the thermal blanket, and wrap the body with nylon for 20 minutes.

(Total duration: 30 minutes)

Step 4: Body Sculpt

Apply 6ml of Body Sculpt Total Tech to the areas of the body with localised fat and cellulite and massage until it is absorbed.

(Total duration: 5 minutes)

Results

Effectiveness

Reduction of abdomen circumference in 28 days **2.8-3.1 cm**

Reduction of thigh circumference in 56 days **2.1-2.9 cm**

Reduction of arm circumference in 56 days **1.3-2.4 cm**

Activation of lipolysis **135%**

Reduction of lipogenesis **37%**

Reduction of cellulite **64%**

Clinical trials with in-vivo measurements on 20 people aged 30-70 for a period of 8 weeks.

Testimonial

Improvement with regard to swellings and cellulite **73%**

My skin is softer **80%**

Clinical trials on 60 people aged 35-50. Self-evaluations in a period of 8 weeks.

Ingredients

A—

A2BLOCKERS: Innovative ingredient from chrysanthemum herbal extracts, rich in polyphenols and flavonoids with calming and anti-inflammatory properties. Deals with the natural reaction of the body, its defense, to block and inhibit the lipolytic action that its active ingredients offer. It specifically binds to A2 receptors, resulting in the continuation of the lipolytic process without interruption.

AA2G: Natural Vitamin C (ascorbic acid), stabilized in glucose (against high temperatures, ion metals, pH, breakdown mechanisms), is extracted from plants and fruits. When applied to the skin, α -glucosidase enzyme, which is found in the epidermis, breaks the bond with a gradual release of vitamin C. It was originally developed in Japan as a semi pharmaceutical product for skin whitening. It suppresses melanin synthesis in melanocytes, reduces the amount of pre-existing melanin and promotes collagen synthesis by the fibroblasts. AA2G, by gradual vitamin release, which acts as a free radical inhibitor, reduces edemas and irritations, while simultaneously reducing expression wrinkles.

A-BISABOLOL: Derived from the essential oil of the Candeia tree (*Eremanthuserythropappus*), it has very high purity, at least 95% of the active isomer of Alpha-Bisabolol. It offers soothing and anti-inflammatory action, and is widely used in cosmetic products.

ACTIGYM: Active ingredient obtained by biotechnology from a microorganism inhabiting in Bermuda. ACTIGYM mimics the effect of endurance exercise training by increasing adiponectin release and enhancing mitochondrial activity. It improves body definition and redefines the silhouette by reducing abdomen and thigh contour, arm sagginess and decreasing body weight, that can be further complemented with exercise. It is also effective in face treatments for the reduction of the double chin and facial contour area.

ALBATIN: Albatin is a non cytotoxic phosphinic analogue of the amino acid alanin that acts as a melanogenesis inhibitor without inhibiting the enzymatic activity of tyrosinase. It also boosts the

action of other brightening actives such as A-Arbutin and Vitamin C.

ALISTIN: Alistin is a solution of Carnosine (Decarboxy Carnosine HCL), a natural peptide identified as a potent anti-glycant and antioxidant. Alistin both prevents and repairs daily skin aggressions, allowing it to remain healthy, firm and beautiful. It acts on anti-oxidation, anti-stress, DNA protection, photoaging, anti-glycation, anti-wrinkles, firming, increase of collagen and sirtuin production, soothing, free radicals protection as well as control of inflammation.

ALMOND OIL: Oil from almonds with hydrating and emollient properties (smoothing action) for the skin. It is considered a perfect active ingredient carrier as it is easily absorbed by the upper skin layers. Because of its lipid-replenishing properties it is often incorporated in products targeting dry skin.

ALOE VERA: Juice (extract) from the homonymous plant. It is a natural cocktail containing vitamins C and E, zinc and seven Super Oxide Dismutases (SOD) enzymes. It hydrates and helps reduce skin irritations, including burning sensations. Aloe Vera stimulates wound healing and activates fibroblasts to produce collagen and elastin and also has antioxidant and anti-microbial properties.

ALPHA LIPOIC ACID: Alpha Lipoic acid (ALA or Thioctic acid) is found naturally in the mitochondria of our cells. It is both fat and water-soluble, thus is easily absorbed through the lipid layers of the skin and works well as a free-radical fighter, providing strong antioxidants (stronger than Vitamins E and C combined). It decreases the appearance of under eye circles, visible fine lines, wrinkles and loss of firmness. Additionally, it reduces swelling and puffiness in the face, acts as an anti-inflammatory and helps reduce visible redness, resulting in a more even skin tone. This acid helps shrink the appearance of pores and provides a healthy, radiant-looking glow to the skin.

AMELIOX: Ameliox is a liposomal preparation combining carnosine, an antioxidant and anti-glycation substance, with 2 powerful oil-soluble antioxidants (silymarin and tocopherol). By fighting glycation, it maintains skin elasticity,

reduces wrinkles and lines, increases skin firmness and protects skin cells from oxidative aging.

ARGIRELINE: ARGIRELINE is an anti-wrinkle hexapeptide that destabilizes the SNARE complex arrangement, reducing the formation of expression lines induced by muscle contraction on the skin surface. It targets the same protein complex as Botulinum Toxin A (BOTOX), modulating muscle contraction, but is safer because it relaxes the muscle, rather than paralyzing it.

ARNICA OIL: A herbal extract which contains the valuable lipophilic, active constituents of arnica blossoms in conjunction with the synergistic accompanying substances. It has a positive effect on the blood flow in peripheral vessels, reduces the appearance of bruises and dark circles around the eyes and is also an anti-inflammatory.

AVOCADO OIL: Avocado oil is rich in palmitic, oleic and linoleic acids. It increases skin hydration by 19% and skin elasticity by 6.5% and reduces irritation indexes due to UVB radiation by 47%. It is rich in vitamins A and E.

AZELAIC ACID-GLYCINE COMPLEX: Molecule derived from azelaic acid and glycine that illuminates and improves texture clarity for a more glowing complexion. It addresses uneven skin tone and dark spots while improving skin quality for a brighter complexion. Due to the presence of glycine, it has also moisturizing and elasticizing properties. It is anti-inflammatory, anti-keratinizing and free radicals' inhibitor. At the same time, it bears an anti-acne action since it is bacteriostatic and normalizes sebum secretion.

B—

BEAUTIFEYE: BEAUTIFEYE is composed of *Albizia julibrissin* extract, recognised for its anti-glycation properties and darutoside, extracted from *Siegesbeckia orientalis*, recognised for its dermis strengthening properties. It helps to rejuvenate the eyes by combating wrinkles, dark circles and bags and by lifting the upper eyelids. It strengthens the dermal structures by stimulating the synthesis of elastin and

collagen and enables the fight against the accumulation and harm from glycotoxins, responsible for the appearance of fatigue on the skin.

BIO-PLACENTA: Biomimetic ingredient derived from bio-fermentation. It contains five different growth factors (EGF, IGF-1, acidic FGF, basic FGF and VEGF), amino acids and vitamin B9 for skin regeneration. The structure of Bioplacenta is similar to that of the human placenta. It stimulates cell growth and the biosynthesis of collagen and simultaneously has a wound healing effect. It offers anti-aging, anti-wrinkle and moisturizing qualities which lead to skin rejuvenation and the improvement of skin elasticity.

C—

CAFEISILANE C: Silanol and caffeine complex with potent lipolytic action. It enhances skin firmness and fights cellulite. In-vitro studies showed that it is able to inhibit lipoprotein lipase activity and can lead to the inhibition of lipid storage increase in the lipocytes.

CALMOSENSINE: Lipopeptide that prevents the appearance of wrinkles. It stimulates the release of pro-endorphins, offering excellent results in the youthful appearance of the skin and it inhibits muscle contractions that lead to the appearance of expression wrinkles.

CANADIAN WILLOWHERB: Herbal extract from a bush flourishing in Canada (epilobium) with anti-acne, antioxidant and anti-inflammatory / anti-irritant action. It inhibits the action of Propionibacterium Acnes which is responsible for many acne-related health problems by 99%. It significantly reduces the production of free radicals (in vitro test) and aids in the reduction of erythema caused by UV light by 25%.

CENTELLA EXTRACT: Extract from the leaves of the homonymous Asian plant. It has a phlebotonic and anti-swelling action, as it activates blood circulation and thus brings renewed suppleness to the walls of the veins. It contains tannins and saponosides that offer firming action.

D—

DECAPEPTIDE-4: Decapeptide-4 enhances the elasticity and remodelling of the skin by increasing collagen and elastin production.

DERMONECTIN: Oligopeptide, is a precursor of fibronectin with low molecular weight. It accelerates the healing process and increases skin hydration and elasticity while reducing the number of fine lines and the size of wrinkles.

DRIELINE: Yeast extract with multiple actions. It protects Langerhans cells from radiation and strengthens the skin's natural defense. It enhances the antimicrobial activity of keratinocytes and the immune system and reduces erythema caused by irritation. Finally, it promotes the synthesis of collagen and, with the appropriate mechanisms, renews and reconstructs the epidermis.

E—

ELASTINE MARINE: Aqueous extract of Tuna fish's connective tissue rich in amino acids, that slows down the aging process. This marine source elastin with hygroscopic properties, prevents wrinkle formation, firms skin, fights stretch marks, plays an important role in intracellular increase of calcium cations and contains high percentages of amino acids (valine, desmosine). It is a tissue component which is diminished as time passes and is degenerated by photoaging.

EUK-134: EUK-134 is a molecule that mimics superoxide dismutase (SOD) and catalase activities. It scavenges superoxide free radicals, eliminates hydrogen peroxide (H₂O₂) and transforms ROS into water and oxygen which are beneficial for the skin. EUK-134 has the unique capacity of regenerating itself during its free radical scavenging action, thereby it is a completely natural mimetic antioxidant system that can be used as an active cosmetic ingredient to limit premature aging, reduce photoaging, protect the skin and its DNA from sun damage and decrease redness.

G—

GERANIUM ESSENTIAL OIL: Essential oil from geranium, known for its styptic, haemostatic, deodorant and revitalizing properties. It may be used in the treatment of acne, for wound and burn healing, as well as in the treatment of dermatitis and eczema.

GLYCOLIC ACID: This smallest form of AHA is a component that generates chemical exfoliation and skin regeneration. When applied, glycolic acid reacts with the upper layer of the epidermis, weakening the binding abilities of lipids that retain dead skin cells. Thus, both exfoliation of the keratin layer and simultaneous cell regeneration are achieved. Moreover, it is used to improve skin appearance and texture by reducing wrinkles, acne scars, hyperpigmentation and improving many other skin conditions, including hyperkeratosis.

H—

HYALURONIC ACID: The molecular weight of natural hyaluronic acid found in human skin ranges from 4 kDa to 8,000 kDa. When used in cosmetic formulations, depending on its molecular weight and size, offers different properties and actions.

1. HYALURONIC ACID HMW: 1.800-2.200 kDa. Film formation, reduction of transdermal water loss and increase in water reserves. Smoothing effect and glow.

2. HYALURONIC ACID MMW: 1.300-1.800 kDa. It offers long-term hydration, protection against adverse environmental conditions and improved skin texture.

3. HYALURONIC ACID LMW: 400-1300 kDa. It offers instant hydration, UV protection and regulation of excess oiliness.

4. HYALURONIC ACID ELMW: 200-400 kDa. Deep hydration. Carrier of active substances.

5. HYALURONIC ACID XSMW: 30-60 kDa. Percutaneous absorption that nourishes the skin, increases hydration and reduces water loss. Improves elasticity and helps with the reduction of wrinkles.

HYALURONIC ACID CROSS LINKED:

Hyaluronic acid cross-linked by propylbisoxyamine. It has the ability to absorb water and active substances in its pores and then acts as a delivery system by slowly releasing active ingredients into the skin. It is more stable than Hyaluronic acid as it resists degradation when applied to skin and stays on its surface for a longer duration. It bears excellent hydrating properties and has an immediate effect on wrinkles, without being injected.

HYDROXYPROLISILANE: Biotechnological product derived from the reaction between hydroxyproline with silicone. It also contains aspartic acid. Its main action is the activation of fibroblasts and tissue regeneration (wrinkle reduction, wound and stretch marks healing).

K—

KELIFLUO: Solution of perfluoropolyethers. Their bridges of oxygen atoms and the high fluorine content (nearly 70%) allow incompatible properties to be compatible. It creates a film on the skin's surface, retaining its moisture and protecting it under extreme external conditions. It is proven to be the most appropriate active ingredient for protective and barrier products which fight chronic non-allergic or irritant dermatitis, but also for facial irritation caused by medical treatments.

KERATOPLAST: Ingredient originating from the bark of willow trees. It improves skin thickness, collagen production, reduces wrinkles, skin roughness and hyperpigmentation by removing dead skin cells and allowing the skin to absorb other complementary anti-aging products (antioxidants, moisturizers) to the maximum of their ability. It reduces redness associated with spider veins and also has anti-inflammatory and antiseptic properties. Its micro-exfoliating effect causes a slow movement of superficial cells that are already aged, forcing the deeper layers to replace them with newer ones. In this way the skin becomes smoother and more compact and the spider veins are better protected and less visible, providing an improved appearance and condition of the skin.

L—

LACTIC ACID: A-hydroxy acid derived from sugar fermentation with regenerating properties. It has a mild exfoliating effect, improves skin elasticity and provides hydration and firmness. It has strong anti-aging action, it fights spots and discolourations and helps to reduce the growth of bacteria and micro-organisms on the skin.

LANABLUE: Lanablue is a blue-green algae extract from North America that acts as a natural retinoid, smoothing the skin without the unwanted side effects. It has a high protein content and contains all the amino acids, a high content of polyunsaturated fatty acids (linolenic acid and linoleic acid), an outstanding vitamin profile (A, E, C, B1, B2, B6, B12, B5, biotin, choline, niacin) and a large variety of minerals and trace elements. Its rich composition encourages microcirculation and oxygenation of the tissues, promotes the synthesis of collagen, helps the synthesis of numerous proteins in the connective tissue for maximal effect on restructuring wounded or aging tissue and helps the synthesis of phospholipids of the cell walls.

LAVANDA ESSENTIAL OIL: Essential oil derived from the lavender plant, native to northern Africa and the mountainous regions of the Mediterranean. This oil promotes relaxation and is purported to have anti-inflammatory and antimicrobial properties, as well as analgesic and sedative effects.

LEUPHASYL: Leuphasyl is a pentapeptide that mimics the action of enkephalin and reduces wrinkle depth, caused by facial expressions, especially on the forehead and around the eyes. It provides a modulation of acetylcholine release from neuron cell cultures, inhibiting muscle contraction and thus preventing the formation of lines and wrinkles.

M—

MALUS DOMESTICA: Ingredient for skin regeneration, based on apple stem cells' extract. It protects the skins' stem cells and delays the aging process of the basal cells. The skin retains its youthful appearance and vitality.

MARINE COLLAGEN: Collagen of marine origin, rich in amino acids that offers hydration and elasticity to the skin. It creates a skin film that reduces moisture loss, providing more effective hydration for a longer duration and giving firmness to the epidermis.

MATRIXYL: Λιποπεπτίδιο που ανήκει στην οικογένεια των ματρικίνων και διεγείρει την σύνθεση κολλαγόνου τύπου I, III, και IV. Έχει αντιρυτιδική δράση και ενεργοποιεί 16 γονίδια που συμμετέχουν στην διαδικασία επούλωσης του δέρματος.

MATRIXYL 3000: Oligopeptide with matrikines, which are messengers of skin reconstruction, offering anti-wrinkle action. According to in vivo tests performed, it drastically reduces the size, density, volume and depth of wrinkles as well as skin roughness, ensuring damage is restored while stimulating collagen and fibronectin synthesis.

MATRIXYL MORPHOMICS: MATRIXYL Morphomics constitutes a novel approach in the research of active matrikines to reduce wrinkles and signs of ageing. It influences cellular and dermal morphology by re-establishing and rebooting the skin connections between the fibroblast nucleus and the extra cellular matrix (ECM) and stimulates the collagen fibre production and maturation to rebuild a functional network. As a consequence, MATRIXYL Morphomics supports the reduction of vertical lines (frown lines, marionette lines, nasogenian fold) but also crow's feet, for a happier expression.

MDI COMPLEX: The MDI Complex is a marine glycosaminoglycan that inhibits the matrix metalloproteinase (MMP) enzymes that degrade and destroy the skin's collagen network. It can be used to neutralize excessive MMP activity, leading to a better enzyme equilibrium that allows greater skin elasticity and increased resistance to external irritants for a natural, healthy appearance. MDI Complex also offers a reduction in the appearance of dark circles, varicose veins and rosacea.

METHYL SALICYLATE: An ester of salicylic acid with characteristic odour used in personal care formulas for its soothing properties. It offers anti-inflammatory

action and relieves pain.

MULTI B COMPLEX (B1,B2,B3,B5,-B6,B12): Vitamin B complex offers balanced skin care. Contains Provitamin B5 (D-Panthenol), Vitamin PP (B3 Niacinamide), Vitamin B1 (Thiamin), Vitamin B2 (Riboflavin), Vitamin B6 (Pyridoxine) and Vitamin B12 (Cyanocobalamin).

P—

PANTHENOL: A vitamin derived from vitamin B complex with healing, hydrating and calming actions, effective to fight against inflammations and irritations. It is easily absorbed by the skin and has the ability of rapidly penetrating and retaining water inside it. It stimulates the proliferation of epidermal cells, protein synthesis and accelerates the healing of minor skin wounds.

PENTACARE: Polysaccharide from carob bean gum and wheat gluten with potent, long-lasting skin-tightening and smoothing effects.

PENTAVITIN: Saccharide that regulates skin moisture even under extreme drought conditions. Reduces irritation and hydrates after use of AHAs (clinical studies).

PHYTOPEELING: Combination of 3 dried plants, Spongilla, Fragilis and Ephydatia from Russia and Canada lakes. It has the ability of performing mechanical and chemical exfoliation at the same time. It removes dead skin cells, corrects discolorations and acne signs, reduces wrinkles and stretch marks. It controls sebum secretion and stimulates natural skin restoration process.

PHYTOSQUAL: Phytosqual, derived from olive oil unsaponifiables, is a biomimetic of Squalene found in human skin. Squalene is one of the main components making up skin surface lipids which protects the skin's cutaneous barrier by moisturizing and repairing it.

S—

SALICYLIC ACID: Salicylic acid is a beta hydroxy acid which has the ability to

permeate the skin, achieving a strong keratolytic effect. It is extremely effective in treating oily skin with dilated pores, as well as comedogenic and inflammatory acne. Clinical studies support its use in photoaging treatment, post-inflammatory hyperpigmentation and epidermal melasma. Because salicylic acid does not cause cell destruction or inflammation, it may also be safely applied on sensitive skin phototypes.

SOYA ISOFLAVONES: Soja and its derivatives are rich in isoflavones, components that participate in cell metabolism, enhance collagen production and inhibit the action of metalloproteinases. This ingredient contains active soya isoflavones inside liposomes which stimulate the production of collagen, leading to an increase in the density and elasticity of the skin.

T—

TRIMOIST: Trimoist is a complex of active ingredients that support the skin's moisture balance system. It contains film forming polysaccharides that protect the skin, lamellar lipids that boost the moisture barrier and humectants that provide instant hydration. It also contains a di-peptide to prevent the cross-linking and stiffening of collagen by glycation.

TRIPEPTIDE-41: TRIPEPTIDE-1 or TRIPEPTIDE GHK is a recognized Reactive Carbonyl Species (RCS) scavenger, that when topically applied, protects the skin from the harmful effects of sun exposure and pollutants.

U—

UNISOOTH EG-28: Unisoath EG-28 is a combination of activated forms of gallic acid which consists of the following: a glycosylated form of gallic acid coming from oak leaves, a glycosylated form of epigallocatechin gallate originating from green tea and propyl Gallate. This combination provides a strong anti-inflammatory action coupled with significant antioxidant properties that help get rid of dark circles by decreasing under eye skin irritation.

V—

VENUCEANE: Biotechnological product from Thermus thermophilus culture, a microorganism that lives in the Gulf of California, at a depth of 2000 meters, at 75°C and with a pressure of 200 bar. It preserves and reinforces the skin's natural physical defence, stimulates the production of the structural lipids of the stratum corneum (ceramides) and reinforces the cutaneous barrier. It improves skin moisture and corneocyte cohesion. Additionally, recent studies have shown that it fights IR-Ageing and lessens the inflammatory conditions.

VITAMIN A: Retinyl palmitate is an oil-soluble molecule of vitamin A that increases the elasticity of the skin and reduces wrinkle depth. It is essential for the growth and differentiation of skin cells, it helps maintain a healthy skin, prevents ageing and restores damaged skin tissue.

VITAMIN COMPLEX ECF: Complex of E, C and F vitamins in almond and cardamom oil. It contains fatty acids such as oleic, linoleic and linolenic acid.

VITAMINE: Natural antioxidant ingredient of plant origin that fights free radicals. It also contributes to skin moisture levels and elasticity preservation.

VITAMIN B9 (FOLIC ACID): Folic acid derived from Bio-fermentation. It stimulates the metabolism of proteins and the immune system. It reduces wrinkles through cell growth stimulation, prevents UV-induced damage, provides anti-allergy action and moisturizes.

X—

X50 ANTIAGING COSMETIC DRONE: X50 ANTIAGING is the cosmetic drone effective in reducing wrinkles. It delivers a specific peptide (COPPER HEPTAPEPTIDE-14 PANTOTHENATE) which stimulates the production of collagen and elastin, selectively to fibroblasts, due to the presence of a specific ligand on its surface (HEPTAPEPTIDE-15 PALMITATE).

X50 HYALUFILLER COSMETIC DRONE: X50 HYALUFILLER is the cosmetic drone for wrinkle filling. It delivers a specific peptide (PALMITOYL TETRAPEPTIDE-50)

which boosts hyaluronic acid synthesis and refills wrinkles naturally, selectively to fibroblasts, due to the presence of a specific ligand on its surface (HEPTAPEPTIDE-15 PALMITATE).

X50 MYOCEPT COSMETIC DRONE:

X50 HYALUFILLER is the cosmetic drone for expression line reduction. It delivers a specific peptide (PALMITOYL HEXAPEPTIDE-52) which inhibits calcium entry and competes against SNAP-25 in the SNARE protein complex formation process, selectively to skin neurons, due to the presence of a specific ligand on its surface (PALMITOYL HEPTAPEPTIDE-18).

X50 SILHOUETTE COSMETIC DRONE:

X50 SILHOUETTE is the cosmetic drone suitable for combating cellulite. It delivers a synergistic combination of actives (COCCOLOBA UVIFERA FRUIT EXTRACT) which maximize lipolysis and lipid storage and inhibit adipogenesis, selectively to adipocytes, due to the presence of a specific ligand on its surface (ACETYL CYCLOHEXAPEPTIDE-34).
