

Juliette.Armand

The reason I sign on these cosmetics is not a desire for fame. Behind this signature there is a message. A personal dialogue. When I am at the lab researching and developing a new formulation, I see before me the needs of each person individually, as if I am about to create a personal line of skincare.

Ioulia Armagou
Chemist
President of Juliette Armand

Our path in time

Our Personal Start

Juliette Armand was established in 1992, when chemists Ioulia Armagou and Michalis Papaefstratiou decided to become involved in the beauty industry, to explore new formulas and to present their personal values to laboratories. That is how Juliette Armand, The Personal Professional Skincare came into being, to create innovative cosmetics, based on scientific research.

Our Professional Way

Our activity focused on trying to obtain maximum efficiency formulations, to meet the high standards of professional skincare.

Our Professional Reputation Internationally

The Juliette Armand brand name and the Elements, Skin Boosters, Sunfilm and Ameson series have gained a strong position at beauty centres and are already present in more than 40 countries around the world.

Our Professional Investment

Thanks to our success, our company now owns a vertical production unit in Athens, located at a state-of-the-art facility. We have invested in advanced technological equipment and highly trained personnel, and have obtained international certifications based on stringent standards.

Our Personal Determination

Since 1992, science has changed dramatically and the beauty industry today has to meet particularly demanding requirements. We continue and persevere as passionately as before in trying to find the next formula, the next formulation, the next innovation.

Our values

1. Formulas

Continuous search for innovation.

2. Scientific conscience in the selection of ingredients

- Nature alone is not enough and is not always safe.
- Which natural ingredients, of what origin and in what synergies?
- How much nature and what technology?
- When should technology prevail and when should nature remain the exclusive factor?

These scientific questions require safe and effective solutions. We provide answers that constitute the secrets of our formulas. We do not serve "ecological" needs or "fake" dilemmas. What is natural is not necessarily safe. For us, the safety, quality and effectiveness of the products are determined by quality control.

3. Production

All Juliette Armand products are manufactured in our laboratories in accordance to the European Union's Good Manufacturing Practices (GMP) for cosmetics.

4. Packaging

Juliette Armand packages are designed to provide:

- Water-tightness

- Safety, with security seals
- Environmentally friendly inert materials
- Materials without extra volume and weight (excessive paper) that do not have increased disposal requirements and do not increase the product cost
- Materials of high aesthetic standards, functional, practical, reliable and durable

5. Effectiveness

Product effectiveness is documented without exaggerations. It is based on laboratory, clinical and dermatological tests of raw materials and end products.

6. Quality Control

We implement a strict quality control process in accordance with European Union regulations (Physicochemical and microbiological control of raw materials and end products, preservatives control, SPF certification, Challenge test, etc.).

7. Application competence

Experienced and well-trained scientific personnel (chemists, biologists, doctors and cosmeticians) are always available to provide all required information.

8. Environmental responsibility

Juliette Armand is committed to operating its business with awareness and respect to nature, people and the future. Raw

materials, methods and all stages of production reflect this commitment towards the environment, at all times and in all procedures. Unconditionally.

9. Respect to customers

Our customer relationships conform to ethical rules and are governed by honest promises, reliability, clear results and consistency.

10. Social Responsibility

Beauty is not vanity. Cosmetics are not a luxury. They are products that satisfy the need for care and self-respect. Our advanced formulas are personally addressed to all people and are intended to make them feel well and comfortable in their skin. This is signified by our affordable prices.

Milestones

1992

Chemists Ioulia Armagou and Michalis Papaefstratiou establish Juliette Armand and focus their work on the research of highly effective formulas.

1993

The Notabilia cream is created and runs a very successful course. Its advanced formula (Extra Moisturizing Cream) can effectively compete with later-developed creams.

1996

A pioneer in the use of hyaluronic acid, Juliette Armand creates a wide range of serums in defense of their high effectiveness. In serum form, active ingredients are present in maximum content; 21st century cosmetology has just begun.

2001

The company is established in Athens, at state-of-the-art, privately-owned, integrated premises, constantly investing in sophisticated equipment, new procedures, research, new products and well-trained scientific personnel. Production process complies with the European Union's Good Manufacturing Practices (GMP) for cosmetics.

2003

In a period when everything is impersonal and industrialized, the founders of Juliette Armand decided to establish a personalized company. Based on their personal and professional values, they have created their own concept – The personal professional concept. And it guides every step of their course.

2004

The innovative EFFECTOX™ technology by Juliette Armand stops cellular contraction, by minimizing expression lines (muscle ageing). This discovery by Juliette Armand laboratories marked the success of the SKIN BOOSTERS anti-surgery system, cosmetology's alternative to botox, eyelid surgery, chemical peeling, mesotherapy and liposuction. With Skin Boosters, your appointment with plastic surgery is postponed!

2005

Elements: a complete professional line of high-end products, the elements of evolution for face and body beauty and health, a new, complete method of combined action and total treatment of all skin conditions. A big range of products available to cover the needs of the most demanding skin types.

2006

A-2 BLOCKERS is a chrysanthemum herbal extract that has brought about a revolution to body care products. It specifically blocks $\alpha 2$ receptors, ensuring a non-stop lipolysis process.

2008

The new Sunfilm sunscreen line by Juliette Armand meets the very real needs for increased sun protection, in accordance to the 2006/647/EC decision by the European Union. The line contains ANTITOX™, a powerful cocktail of new-generation antioxidants which prevents DNA damage from sun rays, repairs DNA, prevents irritations and erythema, protects from pollution and prevents ageing.

2010

The company implements the ISO 9001 quality control system for research and development, manufacturing, packaging and marketing of cosmetics, as certified by TÜV Austria certificate.

2011

The two founders remain shareholders and the company is 100% Greek. Since 2011 Stratis Papaefstratiou-Armagos (B.Sc. Chemical Engineer) and Bill Papaefstratiou-Armagos (B.Sc. Finance & Mathematics, M.Sc. Computing Science) have also joined Juliette Armand shareholder group, signifying the contribution of the second generation to the company.

2015

After 23 years of research, development and production of professional-quality cosmetics, Juliette Armand announces the AMESON Skin Medical Series, bringing all the benefits of science to medical aesthetic products. The name of the AMESON range, inspired by the Greek word AMESOS ('immediately'), underlines the commitment to medical aesthetic skin care with IMMEDIATE results.

2017

Juliette Armand celebrates 25 years of success. A special moment in the brand's history and at the same time a new beginning. A moment to let go of things in the past and embrace new ones for the future.

J.A

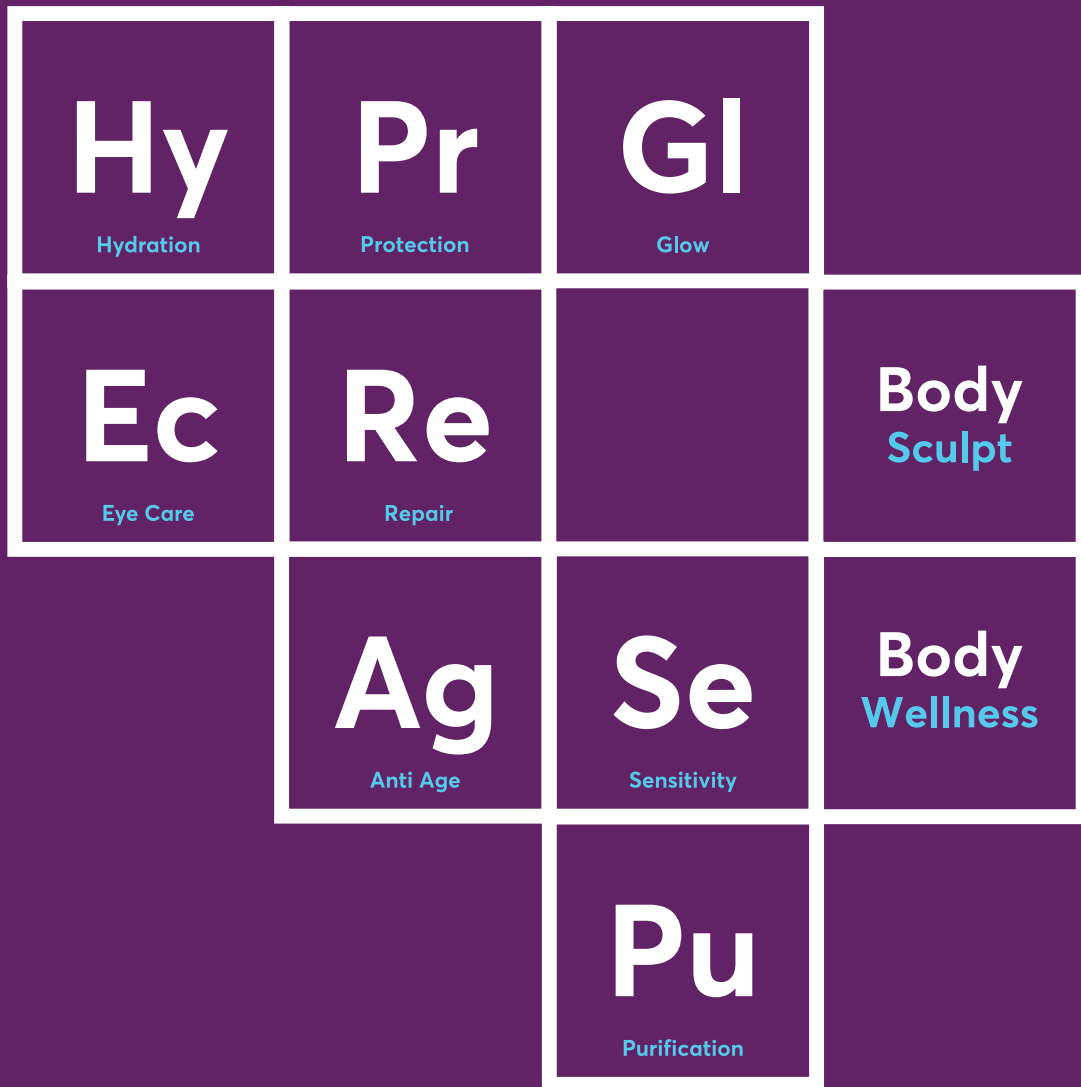

Elements

Elements

Free of Parabens, Propylene Glycol, Mineral Oil, Allergen, SLES, SLS

Elements is a complete professional line of high-end products. It forms the foundation of the evolution of skin beauty and health.

The Elements line represents the targeted solutions offered by the spectacular advances in cosmetology, as well as our commitment to always providing top-of-the-line products for best results and maximum efficiency.

The Elements line, based on innovative ingredients and technology, offers beauty formulas that are entirely in line with world trends in cosmetology and most recent scientific advancements. Within this context of "state-of-the-art" cosmetics, all products of the Elements line are absolutely safe for public health: Free of Parabens, Propylene Glycol, Mineral Oil, Allergen, SLES, SLS.

Among the line's characteristic advantages is the multifaceted action of the products covering all skin requirements for the face and body in accordance to modern anti-ageing, anti-acne and well-being methods. The functional product classification enables the selection of specific products and offers unlimited possibilities of product combinations, depending on the techniques and procedures applied and the equipment used by each beautician.

The Elements line is a key factor for the enhancement of your professional image, providing you with the valuable competitive advantage of creating a

unique personal profile and attracting loyal customers by offering advanced, complete and unrivaled beauty care. Once you have performed all professional treatments with Juliette Armand products, you may also supply your customers with products from the retail range.

This Info Book is a direct line connection to all information from our laboratories regarding the ingredients, effects and use of the products, aiming to help you achieve maximum efficiency and excellent results in your business.

Hy 101

Hydra Cleansing Milk

Cleansing face milk for normal, dry and sensitive skin.

Action: It effectively removes impurities and makeup from the skin while maintaining the skin's lipids and moisture. Its soothing properties do not cause any irritation. A cleansing milk with rich creamy texture that combines a mixture of plant oils (coconut, palm) that cleans the skin easily and is removed without the use of water. It contains chamomile and green aloe extracts in order to soften, soothe and moisturize the skin.

Use: Apply a small amount to the entire face with circular motions and remove with a damp cotton pad. It is recommended to use lotion after emulsion cleaning to tighten and stimulate the pores of the skin.

Key Ingredients: Skin Conditioners & Emollient Oils, L-Arginine, Chamomille Extract, Aloe Vera.

Hy 102

Cleansing Tonic Lotion

Toning, cleansing face lotion for normal, dry, mixed and sensitive skin.

Action: It effectively removes impurities and oiliness from the skin and it revitalizes it without causing dryness and irritation. The lime, chamomile and vitamin F extracts contained rejuvenate, moisturize and tighten the skin's pores. It does not contain alcohol and surfactant cleansing ingredients.

Use: Apply a small amount to the entire face using a cotton pad. It is recommended to use lotion after emulsion cleaning to tighten and stimulate the pores of the skin.

Key Ingredients: Vitamin F (Linoleic Acid, Linolenic Acid), Chamomille Extract, Tiglio Extract.

Hy 103

Micellar Cleansing Water 520ml/Foam 230ml

Face cleanser with oil microspheres (micelles) for all skin types, including sensitive skin.

Action: The tiny oil molecules and mild surfactant cleansers that it contains remove makeup, dirt and oiliness easily from the face and eye area without causing irritation and dryness. It is enriched with aloe, which cleanses the skin while retaining its natural hydrolipidic balance.

Use: Apply the foam to the entire face with circular motions and remove with a damp cotton pad.

Key Ingredients: Blend Oils (Micelles), Mild Surfactants, Aloe Vera.

Pr 104

AHA Preparation Lotion

Face lotion with AHA that reduces the acidity (pH) of the skin and enhances the efficacy of the cosmetic products. For all skin types.

Action: It revitalizes and tightens the skin without causing dryness and irritation. The glycolic and lactic acids offer a gentle exfoliation, revitalizing and tightening the face without causing dryness and irritation. The skin becomes brighter and glows due to the peony extract. The amamelida, Iramoist and chamomile have both astringent and moisturizing action. It does not contain surfactant cleansing ingredients and alcohol and has a pH of 3.5.

Use: Apply a small amount to the entire face using a cotton pad.

Key Ingredients: Lactic Acid 3%, Glycolic Acid 2%, Peonia Flower Extract, Allantoin, Hamamelis Extract, Iramoist LGS, A-Bisabolol.

Pr 105

Cleansing Face Foam

Foaming face cleanser for all skin types.

Action: It effectively removes dirt and makeup and reduces significantly the excess oiliness. It revitalizes and tightens the skin without causing irritation and dryness. It contains mild surfactant cleansing ingredients enhanced with cucumber extract cleanses deeply and improves the skin's texture and tone.

Use: Apply the foam to the entire face with circular motions and remove with water.

Key Ingredients: Mild Surfactants, Cucumber Extract.

Pr 106

Cleansing Cream Soap

A creamy face soap cleanser for all skin types.

Action: It effectively removes dirt and excess oiliness and revitalizes the skin without causing dryness. It has a texture soap with cleansing ingredients which are a blend of plant oils. Easily applied with water. It is enriched with amamelida, Calendula and Arginine which help in-depth cleaning and stimulate the skin without irritating it.

Use: Apply a small amount to damp face, massage gently and remove with water.

Key Ingredients: Skin Conditioners and Emollient Oils, Mild Surfactants, L-Arginine, Hamamelis Extract, Calendula Extract.

Se 107

Sensitive Cleansing Gel

Cleansing face gel specifically formulated for sensitive skin and the area around the eyes.

Action: It effectively removes dirt and makeup, while protecting the skin from harmful environmental agents and air pollution. It contains olive oil that is enhanced with Osmopure as its cleansing component. It protects the skin's cells from harmful atmospheric pollutants. The synergy of the olive oil with the hyaluronic acid moisturize the skin, leaving it soft and supple.

Use: Apply a small amount to the entire face with circular motions and remove with a damp cotton pad.

Key Ingredients: Olive Oil, L-Arginine, Osmopure, MMW Hyaluronic Acid.

Pr 112

Cleanser Wash

Liquid face soap for all skin types.

Action: It effectively removes dirt and makeup without causing dryness and irritation. A soap that contains mild surfactant cleansing ingredients and is reinforced with Wheat Gluten (a basic wheat protein) that offers moisturizing action.

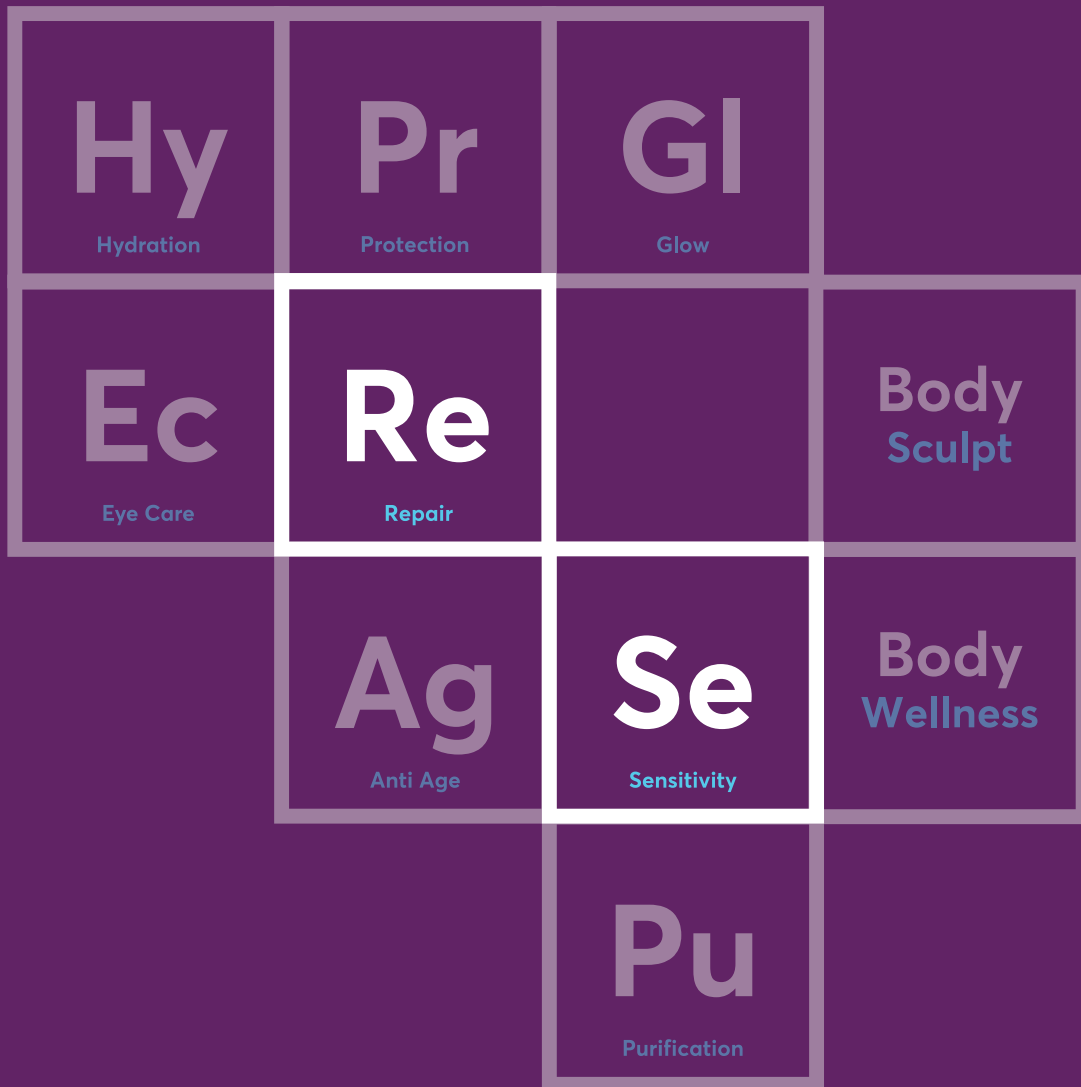

Use: Apply a small amount to damp face, massage gently and remove with water.

Key Ingredients: Mild Surfactants, Wheat Gluten, Allantoin.

Exfoliants

280ml — 50ml

280ml — 50ml

100g

Re 201

Dermabrasion Gel

Exfoliating facial gel with perlite grains for all skin types.

Action: It removes the skin's dead cells while rejuvenating and smoothing skin and delivers glow and brightness. It combines mechanical peeling using various sizes of perlite and bamboo beads with mild "microdermabrasion" of the aluminum oxide crystals. Enhanced with panthenol, it prevents skin's irritation and dryness.

Use: Apply a small amount, lightly massage face and remove with water.

Key Ingredients: Aluminum Oxide, Bamboo Shells, Perlite, Panthenol.

Se 202

Cacao Exfoliating Cream

Exfoliating face cream with cocoa and almond grains for dry and sensitive skin.

Action: It gently removes the skin's dead cells without causing irritation, leaving it smooth and bright. The marine elastin extract helps maintain skin elasticity and consistency.

Use: Apply a small amount, lightly massage face and remove with water.

Key Ingredients: Cocoa Exfoliator, Almond Granules, Elastine Marine, Panthenol.

Se 203

Exfoliating Enzyme Mask

Enzymatic refreshing exfoliating face mask suitable for sensitive and irritated skin.

Action: It removes the skin's dead cells without causing irritation and simultaneously it tightens skin and brightens the complexion. A papaya and pineapple enzymatic peeling mask for renewal of the skin's cells. It is an alternative to acids and mechanical exfoliation for sensitive skin, around the eye area and skin with acne. It removes dead cells without causing irritation. It tightens and whitens the skin.

Use: Mix one part Exfoliating Enzyme Mask (powder) with four parts Exfoliating Enzyme Lotion. Apply to the face, allow to dry and remove with water.

Key Ingredients: Papain, Bromelain, Kaolin.

Exfoliants

Repair / Sensitivity

520ml

50ml

Se 204

Exfoliating Enzyme Lotion

Lotion exclusively used with Exfoliating Enzyme Mask for sensitive and irritated skin.

Action: It contains arginine, an amino acid that aids the skin's renewal.

Use: Mix with Exfoliating Enzyme Mask and apply to the entire face. Allow to dry and remove with water.

Key Ingredients: L-Arginine.

Se 205

Exfoliating Enzyme Gel

Refreshing exfoliating face gel for normal, dry and sensitive skin.

Action: It removes the skin's dead cells without causing irritation and simultaneously it revitalizes and brightens the complexion. It combines the enzymatic exfoliating effect of a prickly pear with the calming moisturizing of aloe and urea. The enzymatic action of a prickly pear enhances the natural skin peeling process, increasing enzyme activity involved in the lysis of the proteins without causing irritation. It reduces the appearance of fine lines and wrinkles, while improving the skin's clarity and luminosity. Suitable for frequent use and for sensitive skin.

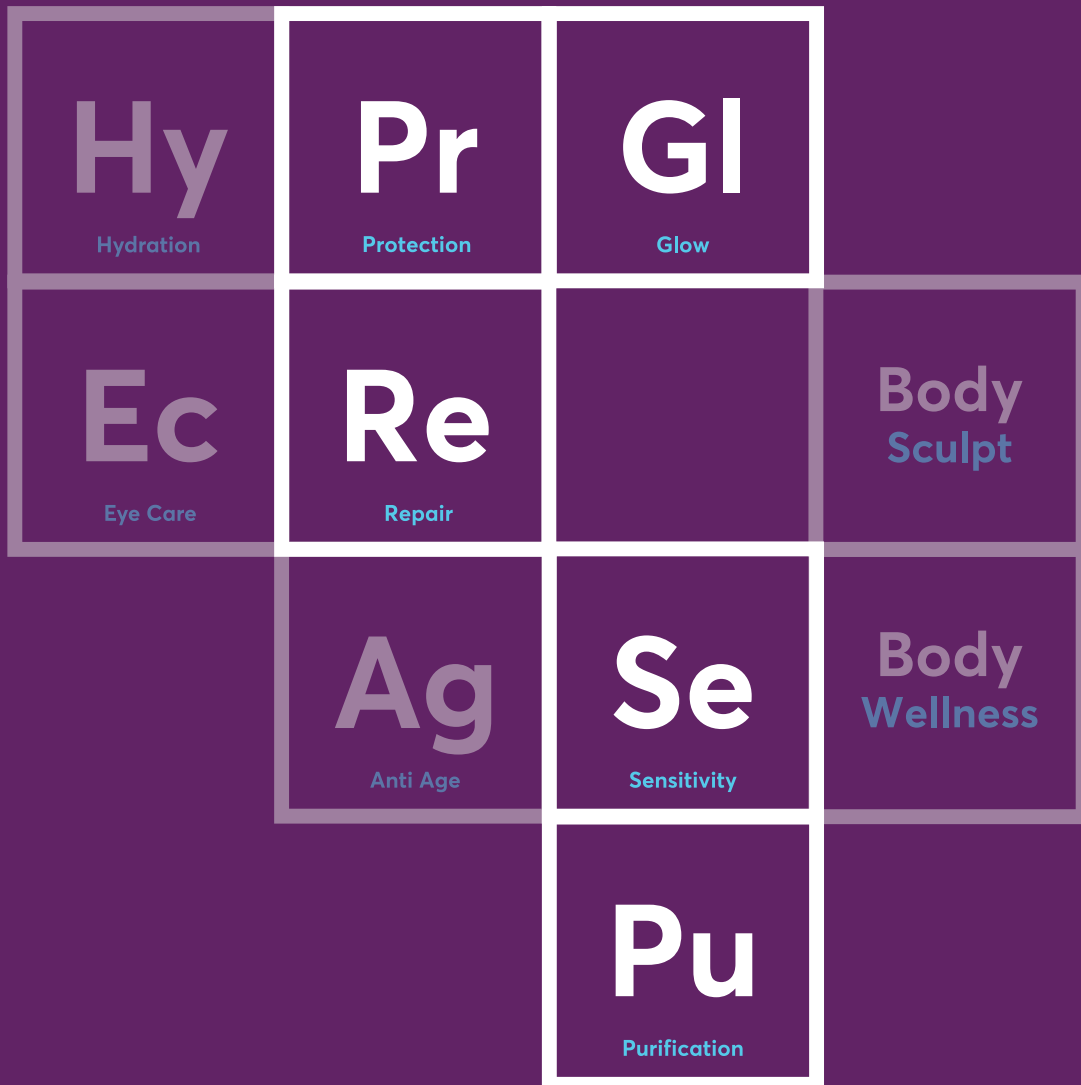

Use: Apply to clean skin and after 10 minutes, apply serum or cream on top of gel.

Key Ingredients: Prickly Pear Extract, Aloe Vera, Urea.

Re 206

BHA Peeling Gel

Alpha and beta-hydroxy-acid chemical exfoliating gel for all skin types.

Action: It instantly renews the skin by removing the skin's dead cells. A chemical exfoliation gel with salicylic and glycolic acid. The combination of salicylic and glycolic acid offers immediate strong exfoliation. It removes dead cells, regulates oiliness and reduces dilated pores and skin discolorations. Its frequency of application depends on the skin's tolerance. It has a pH of 4.5-5.5.

Use: See protocols for instructions and contraindications.

Key Ingredients: Glycolic Acid 14%, Salicylic Acid, A-Bisabolol, Chamomile Extract.

Pr 207

Protection Peeling

Chemical exfoliation suitable for skin protection protocols.

Action: It removes the skin's dead cells by providing preventative protection. A specialized Glycolic Acid & Lactic Acid chemical exfoliation cocktail for hydration and skin protection treatment protocols. Enhanced with Panthenol to calm skin. It has a pH of ~2.7.

Use: See protocols for instructions and contraindications. Individual packaging. 10ml should be used within one month. Sunscreen is recommended.

Key Ingredients: Glycolic Acid 10.5%, Lactic Acid 5.4%, Panthenol.

Re 208

Repair Peeling

Chemical exfoliation suitable for skin regeneration protocols.

Action: It removes the skin's dead cells by renewing it. A specialized Glycolic Acid, Lactic Acid, Salicylic Acid & Retinoid chemical exfoliation cocktail for therapeutic protocols that aim to repair skin imperfections and damage. It has a pH of ~4.5.

Use: See protocols for instructions and contraindications. Individual packaging. 10ml should be used within one month. Sunscreen is recommended.

Key Ingredients: Salicylic Acid 1.5%, Glycolic Acid 10.5%, Lactic Acid 9%, Retinoid 0.5%.

Re 209

Yellow Peeling

Chemical exfoliation suitable for skin repair protocols.

Action: It removes the skin's dead cells by repairing imperfections. A specialized Glycolic Acid, Lactic Acid, Retinoid & Vitamin C chemical exfoliation cocktail for therapeutic protocols that aim to repair and overall renew the skin. It has a pH of ~3.0.

Use: See protocols for instructions and contraindications. Individual packaging. 10ml should be used within one month. Sunscreen is recommended.

Key Ingredients: Retinoid 1%, Ascorbic Acid 2% (3-O-Ethyl Ascorbic Acid), Glycolic Acid 7%, Lactic Acid 7.2%.

Se 210

Sensitivity Peeling

Chemical exfoliation specifically designed for sensitive skin protocols.

Action: It removes the skin's dead cells and renews the skin. An exfoliating cocktail specially designed for sensitive skin. It combines chemical (Lactic Acid) with enzymatic exfoliation (prickly pear) enhanced with an increased moisture content moisturizing Urea and calming Panthenol. It has pH of ~4.0.

Use: See protocols for instructions and contraindications. Individual packaging. 10ml should be used within one month. Sunscreen is recommended.

Key Ingredients: Lactic Acid 9.9%, Prickle Pear Extract 2%, Urea 10%, Panthenol 1.5%.

Pu 211

Purification Peeling

Chemical exfoliation designed for oily and acne-prone skin protocols.

Action: It removes the skin's dead cells and improves the complexion's appearance. An exfoliating cocktail specially designed for therapeutic protocols created to help acne prone and oily skin. It combines the action of Salicylic Acid and Azelaic Acid to regulate acne and oiliness with Retinoid. It has pH of ~3.0.

Use: See protocols for instructions and contraindications. Individual packaging. 10ml should be used within one month. Sunscreen is recommended.

Key Ingredients: Retinoid 1%, Azelaic Acid 6%, Salicylic Acid 1.5%.

GI 212

Glow Peeling

Chemical exfoliation designed for skin discoloration protocols.

Action: It removes the skin's dead cells to achieve uniformity and an even skin tone. A chemical exfoliating cocktail using 5 different acids, specially designed for skins with over pigmentation problems, discoloration, spots and freckles. Both topical use on the spots and overall use for the face and hands are recommended. It has a pH of ~3.5.

Use: See protocols for instructions and contraindications. Individual packaging. 10ml should be used within one month. Sunscreen is recommended.

Key Ingredients: Mandelic Acid 5%, Phytic Acid 1%, Ascorbic Acid 2% (3-O-Ethyl Ascorbic Acid), Gallic Acid 0.025%, Lactic Acid 14.6%.

Hy 301

Hyaluronic Acid Serum

Moisturizing, firming serum for all skin types.

Action: It restores the water balance in facial skin and strengthens its texture and firmness. A medium molecular weight hyaluronic acid (MMW) that creates a moisturizing film on the skin reducing the transdermal water loss. Simultaneously, it contributes to the structural integrity of the extracellular matrix of the skin, forming a strong grid supporting the collagen and elastin fibers, enhancing the skin's consistency and firmness. Recommended for dehydrated and dry skin.

Use: Apply a small quantity to clean skin and massage face until it is absorbed.

Key Ingredients: MMW Hyaluronic Acid 0.2%.

Hy 302

Hydra Bonding Serum

Moisturizing, soothing serum specifically formulated for extremely low temperatures and drought conditions. For all skin types.

Action: It relieves the skin from sensitiveness and irritations and it provides hydration that lasts. A hydration and moisture retention serum effective under extreme conditions such as low temperatures and dry environments. It contains the ingredients Antarcticin and Pentavitin which shield the skin in synergy with two types of hyaluronic acid (HMW & XSMW) enhancing the skin's water reserves and reducing transdermal loss. It also contains DermoSooth, a blend of plant extracts (Enteromorpha Compressa, Silybum Marianum, Ocimum Sanctum) and Panthenol that reduce redness and protect the skin barrier. It is also suitable for very dry conditions in an airplane cabin.

Use: Apply a small quantity to clean skin and massage face until it is absorbed.

Key Ingredients: HMW HA 0.1%, XS HA 0.1%, Pentavitin 5%, Antarcticin 1%, DermoSooth 1.5%, L-Arginine, Panthenol.

Pr 303

Sirtuin Hyaluronic Serum

Moisturizing serum enriched with the youth protein (Sirtuin) for all skin types.

Action: It moisturizes and enhances the skin's vitality and consistency. It is a serum that combines the moisturizing, firming action of hyaluronic acid with the anti-aging action of sirtuin. The hyaluronic acid (3 different types) it contains, creates a moisturizing film on the skin, reducing the transdermal water loss. Simultaneously, it contributes to the structural integrity of the extracellular matrix of the skin, forming a strong grid supporting the collagen and elastin fibers, enhancing the skin's consistency and firmness. Sirtuin, a saccharomycetes of biomimetic activity of the Sirtuin proteins (a silent information regulator 2 proteins), is characterized as the longevity gene due to its action mechanism (cell "self-purification"). Recommended for skin with early signs of aging and for preventative protection.

Use: Apply a small quantity to clean skin and massage face until it is absorbed.

Key Ingredients: MMW HA 0.1%, LMW HA 0.1%, XS HA 0.1%, Sirtuin Complex 5%.

Serums

Hydration / Eye Care / Protection / Repair / Anti Age / Glow / Sensitivity / Purification

10ml

55ml — 20ml

55ml — 20ml

Pr 304

Forte C 12%

Pure vitamin C serum for all skin types.

Action: It moisturizes and revitalizes the skin, enhances its texture and improves skin tone. A pure Vitamin C in a powder form (L-Ascorbic Acid) creates a 12% consistency serum solution before its first use. Vitamin C has a wide range of actions with many published clinical studies discussing its antioxidant, moisturizing, firming, regenerative and whitening properties that can be offered to the skin.

Use: Press the valve to release the powder into the solution and shake well until it is completely dissolved. Apply a few drops to clean skin and massage until it is absorbed.

Key Ingredients: L-Ascorbic Acid 12%, A-Bisabolol, Aloe Vera.

Pr 305

Vitamin C Serum

Moisturizing, antioxidant serum for all skin types.

Action: It moisturizes and helps improve complexions with imperfections, it restores a healthy glow, improves skin tone and refreshes complexion. Ideal for photo-aging prevention. A stabilized vitamin C serum with glucose (AA2G) that incorporates an action mechanism that offers stability and high effectiveness. When the specific form of the vitamin comes into contact with the skin, the skin's α -glucosidase enzyme breaks down the AA2G and releases the Vitamin C. The AA2G enhances collagen synthesis in fibroblasts, reduces discolorations, erythema and edema from solar radiation, free radicals, expression lines and wrinkles.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Vitamin C (AA2G) 1%.

Pr 306

Provital D3 Serum

Multi-protection serum for all skin types.

Action: It reduces skin irritation and strengthens protection against ultra-violet radiation. Provitamin D which is derived from bacterial fermentation (Biofermentation) offers multiple effects on the skin. It enhances the function of the skin barrier, has antimicrobial action on the skin and it protects it from the irritation caused by UV radiation. Recommended for atopic dermatitis and eczema.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Provital D3 3%.

Serums

Hydration / Eye Care / Protection / Repair / Anti Age / Glow / Sensitivity / Purification

55ml — 20ml

120ml — 55ml — 20ml

55ml — 20ml

Pr 307

Folic Acid (B9) Serum

Rejuvenating serum for all skin types.

Action: It protects the skin from ultraviolet radiation while correcting imperfections and signs of time. Folic acid which is derived from bacterial fermentation (Biofermentation) offers multiple effects on the skin. It stimulates the metabolism of proteins and strengthens the immune system. It improves and reduces skin imperfections by stimulating cell growth and it offers moisturizing and anti-histamine action.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Vitamin B9 (Folic Acid) 3%, L-Arginine.

Ag 308

Collagen Elastin Serum

Firming, hydrating serum for normal and dry skin.

Action: It moisturizes and enhances facial skin's elasticity and firmness and increases its moisture levels. A serum with hydrolysed elastin and marine collagen. Collagen and elastin make up most of the skin proteins and are responsible for its firmness and elasticity while helping the skin's cells regeneration and rebirth. The biosynthesis and functionality of the collagen and elastin fibers decreases over time, resulting in fine lines, wrinkles and relaxation of the skin. Collagen Elastin strengthens the collagen and elastin reservoirs, it retains water and increases the skin's moisture level.

Use: Apply a small quantity to clean skin and massage face until it is absorbed.

Key Ingredients: Elastin Marine 2%, Marine Collagen 10%.

Re 309

Hydra Repairing Serum

Moisturizing repairing serum for all skin types.

Action: It moisturizes and enhances the natural skin renewal process and it protects the skin from damages caused by solar radiation. A serum that contains the Bifidus bacteria and milk proteins. It stimulates the enzymatic system available to the skin and is able to identify and repair damages of the DNA on the skin's cells. Enhanced with Ceramides 3B (biofermentation) it helps regulate/arrange the lipids of the stratum corneum layer and it strengthens the skin barrier by enhancing the skin's regenerative capabilities.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Bifidus (Repair Complex) 10%, Lactokine (Milk Peptide) 5%, Ceramide 3B 1%.

Serums

Hydration / Eye Care / Protection / Repair / Anti Age / Glow / Sensitivity / Purification

55ml — 20ml

55ml — 20ml

55ml — 20ml

Ag 310

Lifting Fort Serum

Intensive firming serum for all skin types.

Action: It offers skin tightening and improves complexions with loss of firmness, fine lines and wrinkles while moisturizing the face. A serum containing Phytodermina Lifting (a vegetable extract) and Osilift (plant cyclodextrins), offering intense and immediate firming action. It creates a very thin, elastic and durable film on the skin's surface (allowing it to breathe simultaneously) that reduces the appearance of wrinkles and improves the skin's texture and tone. It also contains hyaluronic acid that enhances the skin's moisture and maintains its hydrolipidic film.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Osilift 4%, Phytodermina Lifting 4%, LMW Hyaluronic Acid.

Ag 311

Ceramide Serum

Moisturizing serum for dehydrated and tired skin.

Action: It moisturizes and protects the skin barrier. Simultaneously, it improves skin imperfections and wrinkles and it enhances the skin's texture. A serum containing ceramides resulting from bacterial fermentation. Ceramides contribute to the regulation and layout of the stratum corneum's lipid layers, which is the key to the formation of the skin barrier, protecting it from exogenous factors. They moisturize and rejuvenate the skin and improve its elasticity.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Ceramide 3B 3%.

Ag 312

Bioplacenta Serum

Repairing, rejuvenating serum for all skin types.

Action: It moisturizes and enhances the skin's natural renewal and consistency function, improving its appearance and vitality. A serum containing a biomimetic component (Bioplacenta), derived from bacterial fermentation, with five different growth factors (EGF, IGF-1, acidic FGF, basic FGF and VEGF), amino acids and vitamin B9. Its components are similar to the human placenta. It stimulates cell growth and synthesis of fibroblast collagen, it helps heal wounds and it improves the skin's elasticity. It has anti-wrinkle, anti-aging, moisturizing and rejuvenating properties. It is recommended to be used after chemical exfoliation.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Bio-Placenta 3%.

Ag 313

Vitality Dry Oil

Rejuvenating dry oil for all skin types.

Action: It moisturizes, refreshes and nourishes the skin. A mixture of oils rich in $\Omega 3$ - $\Omega 6$ - $\Omega 9$, tocopherols, phytosterols and flavonoids with multiple actions. It improves the functioning of the skin barrier and reduces the transdermal water loss. It protects the cell membranes and prevents the destruction of skin DNA. It reduces skin sensitivity and improves its microcirculation. It has a dry texture and does not leave oiliness. It is recommended to be used after applying serums, before creamy products or on its own.

Use: Apply a small quantity and massage until it is absorbed.

Key Ingredients: Grape Seed Oil 1%, INCA Omega Oil ($\Omega 3$ - $\Omega 6$ - $\Omega 9$ -Tocopherol) 1%, Vitamin E 1%, Avocado Oil 1%, Phytosqual 1%, Olive Oil 1%, Macadamia Oil 1%, Arnica Oil 1%, Lavender Oil 1%, Mallow Oil 1%, Plantago Oil 1%, Chia Oil 1%, Almond Oil.

Se 314

Aloe Vera Serum

Soothing, hydrating serum for all skin types.

Action: It moisturizes and soothes the skin from irritations and inflammations. It moisturizes and relieves the skin from irritations and inflammations. A serum with highly concentrated green aloe extract with calming and moisturizing action. Aloe is an excellent natural cocktail containing vitamins C and E, enzymes, amino acids and over 200 other beneficial substances. It moisturizes and helps reduce skin irritations and inflammations. It participates in the reconstruction of skin cells and in the healing process of skin injuries. It is recommended for sensitive and irritated skin.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Aloe Vera 30%.

Se 315

Vitamin B Complex Serum

Soothing serum enhanced with B complex vitamins for irritated and sensitive skin.

Action: It moisturizes and relieves the skin from irritation and erythema. A cocktail serum of the vitamin B complex with strong anti-inflammatory and anti-irritant action. B3 helps repair skin imperfections (wrinkles, common acne and rosacea) and offers homogeneity and radiance. B6 has regenerative and anti-inflammatory properties and contributes to the treatment of seborrhoeic dermatitis. The MULTI B COMPLEX (B1, B2, B3, B5, B6, B12) assists overall skin physiology. As it is enhanced with the ingredients Redyless and Panthenol, it reduces redness and red spots. Ideal for skin with dermatitis and spider veins.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Vitamin B6 (Pyridoxine) 0.5%, Vitamin B3 (Niacinamide) 1%, Multi B Complex (B1-B2-B3-B5-B6-B12) 2%, Panthenol 3.75%, Redyless 2%.

Serums

Hydration / Eye Care / Protection / Repair / Anti Age / Glow / Sensitivity / Purification

55ml — 20ml

Flash Lifting Serum

Flash lifting serum for all skin types.

Action: It offers an instant sense of lifting and enhances the firmness of the skin. Ideal for instantly visible results. A serum containing the Tensea Lift ingredient at a content level of 90%, which is derived from a marine polymer, instantly and intensely tightens the skin. Its action starts in 5 minutes and the result can last up to 12 hours. Ideal for visible and immediate results.

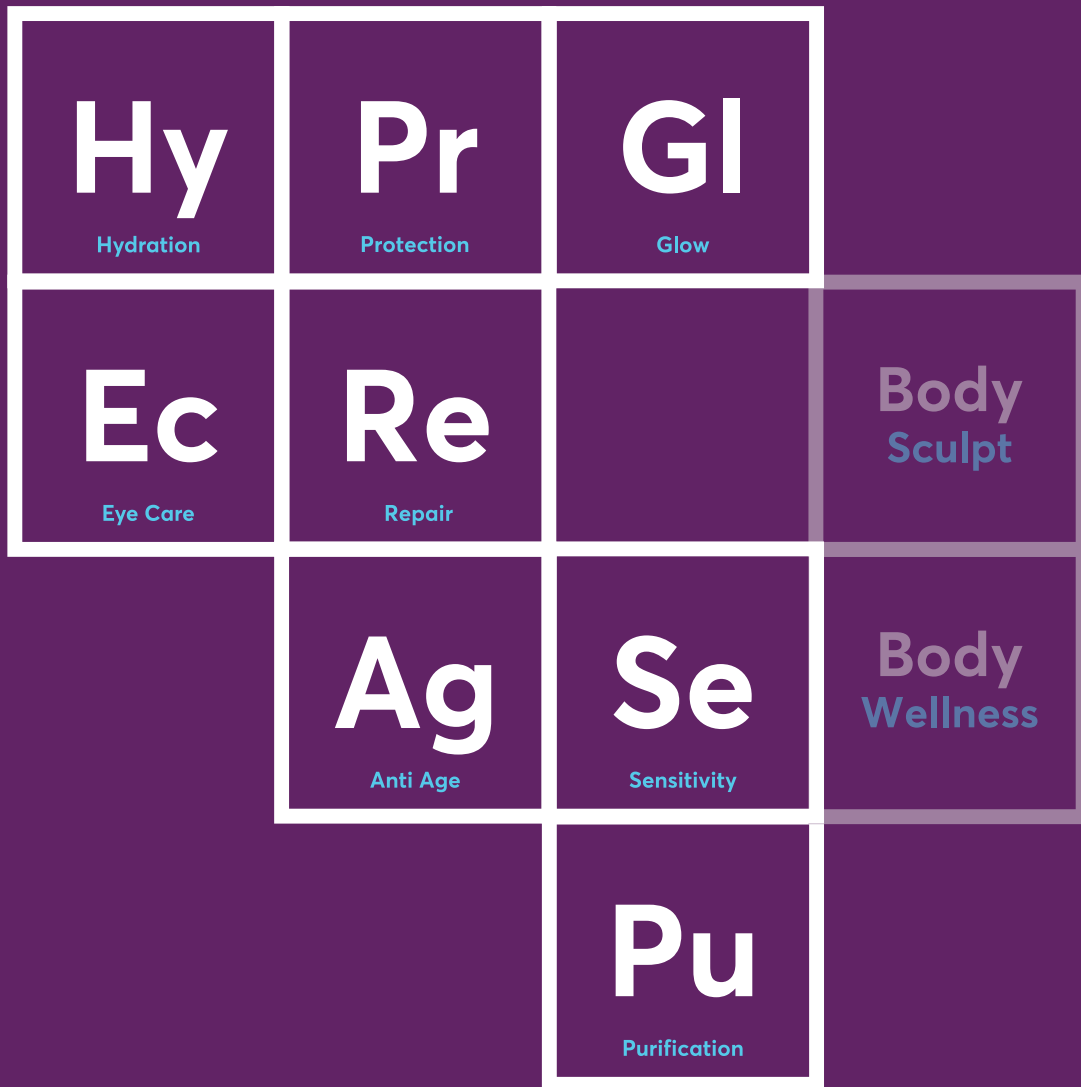

Use: Leave for 5 minutes and then follow your make-up routine. If you feel an intense "pull", apply a few drops of Hyaluronic Acid, let it absorb and continue with makeup.

Key Ingredients: Tensea Lift 90%.

280ml — 50ml

200g

Hy 401

Hydrating Mask

Moisturizing face mask enhanced with vitamin granules for all skin types.

Action: It instantly moisturizes the skin and reinforces its texture and defense systems. It is based on ingredients that energize and hydrate the skin's cells. The synergy of Hyaluronic acid, Filagrinol and vitamins A, E (Unispheres) hydrates the skin and improves the skin barrier, strengthening and increasing elasticity. Epidermal cells are protected from dryness while skin moisture and lipid barrier are stabilized. Ideal for dry and dehydrated skin.

Use: Apply a thick layer and after it partially dries massage in and remove with water.

Key Ingredients: Filagrinol, Allantoin, MMW Hyaluronic Acid, Unispheres (Vitamin A & E), Kaolin.

Pr 402

Vitality Cream Mask

A rejuvenating face cream mask that you leave on, for all skin types.

Action: It moisturizes, renews and strengthens the skin's texture. A rich, fine textured composition mask. The combination of Avocado Oil and Phytodermna hydrate and tighten skin. Spirulina algae extracts increase the ability of cells to bind oxygen and vitamins E, C and F. Strengthened by the Vitamin B complex (B1, B2, B3, B5, B6, B12) it restores the skin's physiology.

Use: Apply, allow it to dry as a cream and do not remove. It can also be used as a night cream or in combination with the Modelling Thermo Mask.

Key Ingredients: Avocado Oil, Vitamin Complex E-C-F, Phytodermna Lifting, Multi B Complex (B1-B2-B3-B5-B6-B12), Spirulina Extract.

Pr 403

Hydra C Latex Mask

Multi-face protection mask for all skin types.

Action: It moisturizes and protects the skin from environmental pollutants, it refreshes the complexion and delivers glow and brightness. A water-soluble closed latex powder mask that combines Vitamin C (Acerola Fruit) with Algin (a natural moisturizer derived from brown seaweed). It has a powerful moisturizing and antioxidant action and it protects the skin from the impact of environmental pollutants. The mask quickly absorbs water and turns into latex.

Use: Mix 1 part of powder with 1 part of water until it thickens. Apply a thick layer to the face, allow to dry. When it forms a latex mask, remove by pulling gently.

Key Ingredients: Acerola Fruit (Vitamin C), Algin.

Masks

Hydration / Eye Care / Protection / Repair / Anti Age / Glow / Sensitivity / Purification

850g

280ml — 50ml

30ml

Pr 404

Modelling Thermo Mask

Self-heated closed face mask (mold) that causes hyperaemia suitable for all skin types.

Action: The mask effectively induces active ingredients penetrating the skin due to hyperaemia. A self-heated closed powder (Calcium Sulfate) mask (mold), which induces hyperemia and accelerates blood circulation. When Calcium Sulfate is mixed with water it creates an exothermic reaction and when it is applied to the skin it is solidified, taking the face's shape. The local rise in skin temperature caused by the exothermic reaction stimulates the process of cell renewal and achieves better and faster penetration of the active ingredients of the cosmetic products.

Use: Cover eyes and moles. Apply a thick layer of Nourishing Cream or Vitality Cream Mask and apply a damp gauze on entire face. Mix 250g of powder with 100ml of water (room temperature) until it becomes a smooth paste. Then spread a thick layer of the paste over the gauze. After 15-20' due to the heat release (exothermic reaction) the clay is solidified and removed as a mold.

Key Ingredients: Calcium Sulfate, Bentonite.

Pr 405

Charcoal Detox Mask

Cleansing detox facial mask with charcoal for all skin types.

Action: It removes impurities and excess sebum from the skin. It delivers a bright and rejuvenated complexion. A clay mask combining activated charcoal with Bamboo wood with broccoli extract. Activated charcoal has the property of absorbing minerals, toxins and other harmful substances from the skin. It helps remove dead skin cells and detoxify them. In addition, it stimulates cell growth and helps smooth the skin. Broccoli offers the skin a powerful antioxidant and detoxifying effect and protects it from dirt and stressful environmental factors.

Use: Apply a thick layer, allow to dry and remove with water.

Key Ingredients: Active Charcoal, Broccoli Extract, Kaolin, Bentonite.

Re 406

Oxygen Foaming Mask

Oxygen, rejuvenation facial mask for all skin types.

Action: It instantly renews the skin by offering toning, freshness and liveliness. A mask that transfers the air's free oxygen into the skin. When the mask (in a gel form) comes into contact with the skin, the Gransil component (an elastomeric network that contains) binds oxygen from the atmosphere to the skin and it becomes a foam. The skin tissues are oxygenated and the skin's defense mechanism is enhanced in order to combat adverse environmental factors and free radicals. Oxygenation of the skin brings deep renewal, revitalization and radiance, it reduces erythema and regulates excess oiliness.

Use: Gently apply the gel to clean skin (without massaging it) and leave it until it stops becoming foam. Remove gently with a cotton pad.

Key Ingredients: Gransil.

Re 407

Repairing Mask

Repairing facial mask for all skin types.

Action: It renews the skin and strengthens the complexion's natural functions. A mask that repairs skin imperfections and damage and firms it. The amino acid and adenosine complex it contains, works directly in the DNA and reverses damages caused by ultraviolet radiation and combats redness. Bioplacenta, a biomimetic component of human placenta (Biofermentation), stimulates cell growth and the synthesis of fibroblast collagen helps heal wounds and it improves the skin's elasticity. It is enhanced with marine collagen and Dermonectin, which are ingredients that help the skin to regain its lost vigor, softness and consistency.

Use: Apply, allow to partially dry, massage in and remove with water.

Key Ingredients: Bio-Placenta, Unirepair T-43, Dermonectin, Marine Collagen, Allantoin, Kaolin.

Re 408

Mud Heilmoor Mask

Refreshing and brightening face mask for normal, combination and oily skin.

Action: It refreshes, strengthens the skin's texture and leaves the skin glowing. A mask containing mud with healing properties, plankton extract and marine biomass that activate the skin's peptide-energy system, due to the action of the oligoelements and the amino acids they contain, revitalizing the skin. It relieves the skin from irritations and improves the skin's radiance.

Use: Apply a thick layer, allow to dry and remove with water.

Key Ingredients: Mud Thermal Heilmoor, Thalaton, Allantoin, Kaolin.

Re 409

Collagen Cell Wrap

Facial collagen sheet drenched with apple stem cells suitable for tired skin.

Action: It moisturizes, tightens and refreshes the skin. Collagen and elastin account for most of the skin's proteins and are responsible for its firmness and elasticity. Strengthened by apple stem cells and Resveratrol, it helps the regeneration and rebirth of the skin's cells. Collagen Cell Wrap ideally restores the balance between firmness and hydration.

Use: Place on clean skin, moisten with water and remove after 15'.

Key Ingredients: Collagen, Malus Domestica, Baicalin, Resveratrol.

Re 410

Phytopeeling Mask

Exfoliating repairing mask reinforced with 20% phytopeeling for normal, oily and acne prone skin.

Action: It removes dead cells, revitalizes the skin and reduces excess oiliness. A powder mask with a specialized ratio of 20%-80% of *Spongilla Lacustris*, *Spongilla Fragilis*, *Ephydatia Fluviatilis* in combination with kaolin-bentonite, makes it easy to use. It deeply cleanses the skin, regulates oiliness and stimulates the skin's natural repair process.

Use: Mix the powder with water until it becomes a paste. Apply to clean skin, without rubbing. Leave on up to 15' and remove with water.

Key Ingredients: Phytopeeling 20%, Kaolin, Bentonite.

Ag 411

Lifting Mask

Intense tightening facial and neck mask for all skin types.

Action: It tightens the skin and improves its texture, making the skin feel "lifted". Red clay combined with numerous ingredients helps the skin reconstruction. It contains Matrixyl 3000 which stimulates the production of collagen, fibronectin and hyaluronic acid in the fibroblasts, smoothing wrinkles and tightening the skin. As it is enhanced with Liftessence (a herbal gel), it offers visible and immediate lifting effects. Drieline stimulates the skin's cell renewal and regeneration process. Menthol offers the skin a instant sense of freshness, coolness and rejuvenation.

Use: Apply a thick layer, allow to dry and remove with water.

Key Ingredients: Matrixyl 3000, Liftessence, Drieline, Vitamin A, Vitamin E, Red Clay, Menthol, Allantoin, Kaolin.

Ag 412

Proteinous Lifting Mask

Firming facial mask suitable for all skin types.

Action: It gives an intense boost of tightness and an instant "lifting" sensation. It improves the skin's texture. A powder mask that combines the intense firming action of albumin (egg white protein fraction) and a milk protein complex with the kaolin cleansing properties. The synergy of the ingredients, strengthens the skin's support tissues, maintains its collagen and elastin at high levels, smoothes the wrinkles and makes it radiant.

Use: Mix the powder with the special lotion until it becomes a thin paste. Apply with a brush using upward motions and leave it for 15-20'. Then wet the mask with the Sensitive Cleansing Gel and remove it with water.

Key Ingredients: Albumine, Milk Peptide Complex, Kaolin, Zea Mays.

Masks

Ag 413

Proteinous Lifting Lotion

Lotion exclusively used with Proteinous Lifting Mask.

Action: A gel that enhances the mask's firming effect as it contains Phytodermina Lifting (a plant vegetable extract) and marine based collagen. Moreover, its soothing properties are enhanced by the use of Panthenol and Bisabolol.

Use: Mix the powder with the special lotion until it becomes a thin paste. Apply with a brush using upward motions and leave it for 15-20'. Then wet the mask with the Sensitive Cleansing Gel and remove it with water.

Key Ingredients: Phytodermina Lifting, MS HC, A-Bisabolol, Panthenol, Allantoin.

Ag 414

Cryolifting Latex Mask

A seaweed firming facial mask suitable for all skin types.

Action: It intensely firms the skin and offers an instant "lifting", through its cool sensation. It is a closed powder latex mask that combines Menthol with Algin (a natural moisturizer derived from brown algae) that should be mixed with water. It moisturizes and revitalizes the skin, providing a sense of freshness, coolness and intense firming. The mask quickly absorbs water and turns into latex, offering the action of the active ingredients.

Use: Mix 1 part of powder with 1 part of water until it becomes a paste. Apply a thick layer, allow to dry and take a latex form and then remove by pulling it gently.

Key Ingredients: Menthol, Algin.

Se 415

Chocolate Sensi Mask

Facial rejuvenation and wellness mask for tired, dull and sensitive skin.

Action: It soothes irritations and it leaves the skin refreshed and rejuvenated. A rich and creamy chocolate mask that stimulates the production of b-endorphins, a natural factor that positively affects the sense of well being. It contains cocoa butter, caramel, vitamin A, vitamin E and Monoi de Tahiti that deliver long-lasting hydration. It is enhanced with the special ingredient Venuceane, that protects the skin from oxidative stress and damage caused by UVA radiation.

Use: Apply a thick layer, allow to dry and remove with water.

Key Ingredients: Chocolate, Monoi De Tahiti, Vitamin A, Vitamin E, Venuceane, Allantoin.

Se 416

Azulene Calming Mask

Soothing, moisturizing facial mask for all skin types.

Action: It moisturizes and soothes the skin from irritations. Ideal for sensitive and irritated skin. An Azulene clay mask, enhanced with specialized chamomile, aloe and panthenol extract, which soothes sensitive and irritated skin, restoring its natural balance and defense. It moisturizes and relieves irritated skin and heals micro-injuries, helping the skin absorb inflammations. The Calmosensine lipopeptide it contains helps maintain the skin's youthful appearance.

Use: Apply a thick layer, allow to dry and remove with water.

Key Ingredients: Azulene, A-Bisabolol, Panthenol, Aloe Vera, Calmosensine, Allantoin, Kaolin.

Pu 417

Chlorophyll Firming Mask

Firming cleansing face and chest mask for combination and oily skin.

Action: It refreshes, unclogs the pores, reduces the excess oiliness and strengthens its texture. A chlorophyll clay mask enhanced with a multitude of active ingredients. Chlorophyll in combination with amamelida and panthenol has cleansing, astringent and firming properties that do not irritate the skin. The synergy of calendula and vitamin A stimulates the cell regeneration process and revitalizes the skin. It enhances micro-circulation and helps reduce fine lines and wrinkles.

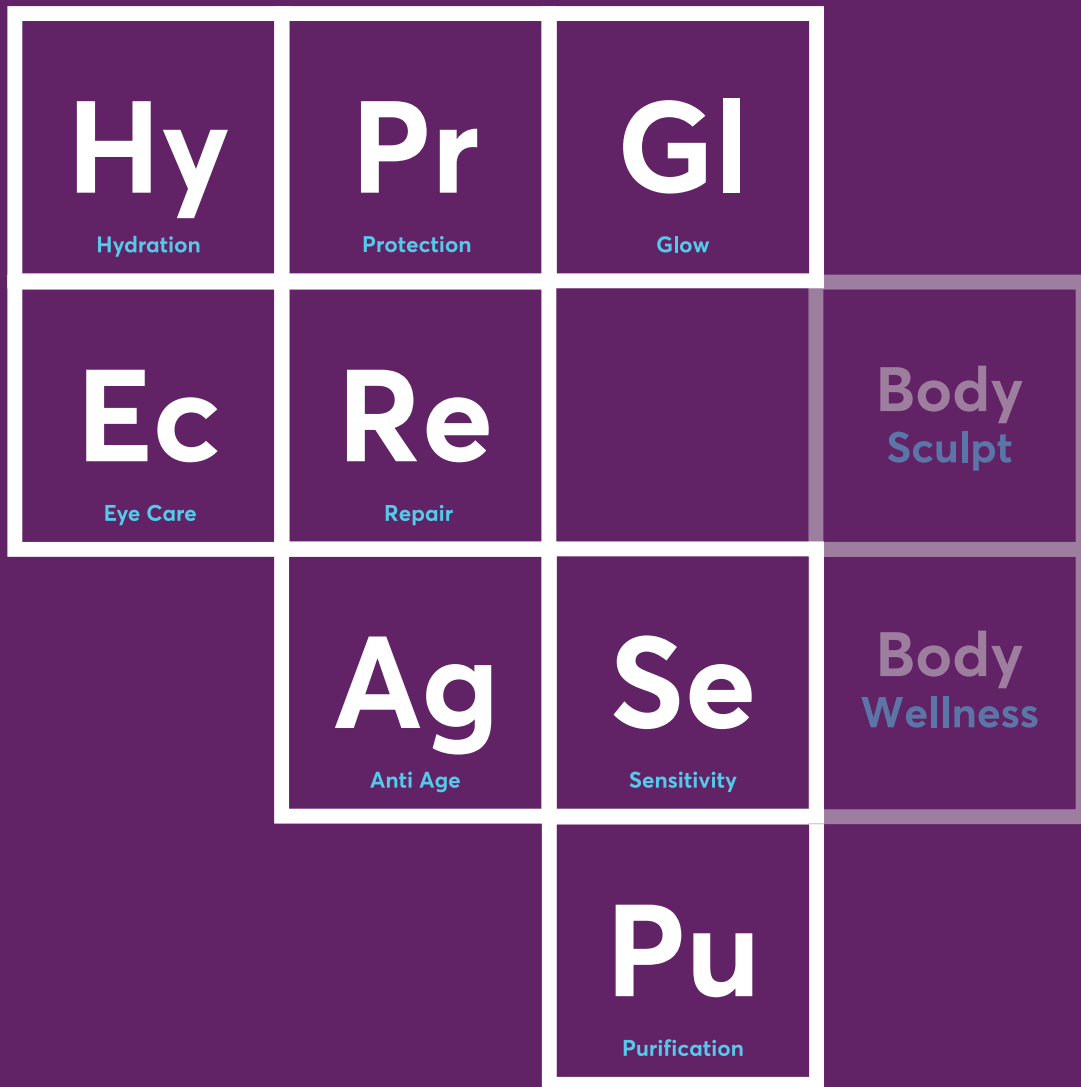

Use: Apply, allow to dry and remove with water.

Key Ingredients: Chlorophyll, Hamamelis Extract, Centella Extract, Vitamin A, Panthenol, Allantoin, Kaolin.

Pr 501

Hydra Protecting Cream

Facial moisturizing cream that protects the skin from environmental aggressors.

Action: It moisturizes and protects the skin from sunlight (SPF 10), atmospheric pollution and harmful environmental factors. A cream that combines the MMW hyaluronic acid hydration, the antioxidant of vitamin C and E, the sun protection of the UVA filters with antipollution action. The antipollution action is based on the ability of the activated carbon to absorb pollutants from the skin and the protective shield provided by the specialized active ingredients Detoxophane and Pollushield. The cream has a rich texture that is easily absorbed without leaving a oily residue and enhances the skin's protection from premature aging.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: MMW Hyaluronic Acid, Ascorbic Acid (3-O-Ethyl Ascorbic Acid), Detoxophane, Pollushield, Active Charcoal, Vitamin E, UV Filters, Allantoin.

Hy 502

Multi Hydrating Cream

Face cream with complete hydrating action for all skin types.

Action: It strengthens the skin's water reserves and protects its transdermal loss of water while maintaining its moisture balance. The careful selection of ingredients is a source of cell hydration. A key element, hyaluronic acid, has two molecular weights (MMW and LMW), that replenishes the skin's water reserves and prevents the transdermal water loss. Moist 24 has the ability to trap inside the cells the skin's available water reserves and thus maintain its moisture balance. Vitamin E, Shea Butter, Panthenol & Jojoba Oil help for a long lasting moisturized skin. It has a fine texture with a distinctive pleasant aroma.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: MMW Hyaluronic Acid, LMW Hyaluronic Acid, Moist 24, Vitamin E, Shea Butter, Panthenol, Jojoba Oil.

Hy 503

Extra Moisturizing Cream

Moisturizing, firming face cream for dry and normal skin.

Action: It immediately replenishes the water balance of dry and dehydrated skin while helping to regain its lost firmness. A cream with a targeted selection of moisturizing ingredients to replenish dehydrated and dull skin moisture. It combines Hyaluronic Acid (HMW), which creates a moisturizing film on the skin, with the most modern HA type, the MINI, which deeply moisturizes and firms the skin. Myrothamnus Extract, in synergy with Vitamin C, enhances the skin's moisture content and elasticity and improves the skin barrier. Epidermal cells are protected from dryness while moisture and lipid barrier are stabilized, improving the skin's appearance and texture. Extra Moisturizing Cream is rich in texture, is easily absorbed and leaves a pleasant feeling of hydration with a matte finish.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: HMW Hyaluronic Acid, Mini Hyaluronic Acid, Myrothamnus Extract, Ascorbic Acid, Allantoin, L-Arginine.

Re 504

Hydra Repairing Cream

Moisturizing, repairing facial cream for all skin types.

Action: It moisturizes, enhances the natural regeneration function of the skin and protects it from damage caused by sunlight, improving its appearance. The Bifidus bacteria and milk proteins stimulate the skin's enzyme system and are capable of recognizing and repairing damage to the skin's cells DNA. Matrixyl 3000 oligopeptide reduces expression lines, wrinkles and skin roughness and stimulates the synthesis of collagen and fibronectin. It has an enhanced composition with two types of Ceramides (HCl fat soluble and 3B water soluble), it helps regulate the stratum corneum's lipids, strengthening the skin barrier by enhancing the skin's regenerative capabilities. It has a particularly fine and cool texture that is easily absorbed, while longer lasting moisture is maintained.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: Ceramide H03, Lactokine, Bifidus, Matrixyl 3000, Ceramide 3B, Shea Butter, A-Bisabolol, L-Arginine.

Re 506

AHA Smoothing Cream

Facial rejuvenation cream with AHA for all skin types.

Action: A cream that restores the skin's smooth function, which is based on a specific selection of various content AHA (lactic, glycolic and mandelic acid) with a pH of 5.0 in combination with the ingredient, keratoplast. Enhanced with hyaluronic acid MMW, Panthenol, Centella Extract and Aloe Vera it boosts the skin's natural rejuvenation process and hydrates it, making it firm and radiant. It is characteristically very elastic and is easily absorbed without leaving the skin oily. It is recommended to be combined with sunscreen protection.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: Lactic Acid 2.7%, Glycolic Acid 5.3%, Mandelic Acid 1.0%, MMW Hyaluronic Acid, Keratoplast, Centella Extract, Aloe Vera, A-Bisabolol.

Contraindications: It should not be used on skin that suffers from herpes zoster.

Ag 507

Nourishing Cream

Nourishing facial cream for dry, normal and mature skin.

Action: It reduces the appearance of wrinkles and signs of fatigue, enhancing its freshness and vitality. It has an oily texture and is recommended for facial and neck massage. A nourishing cream rich in vitamins A, E and retinol. It contains distinct red vitamin E microspheres and retinol microspheres that penetrate the deeper skin layer to effectively nourish the cells. It addresses the oxidative damage of skin cells and prevents the destruction and degeneration of collagen and elastin fibers. It prevents the appearance of wrinkles and smoothes existing ones. The skin is rejuvenated and regains its natural glow. It has an oily texture and is recommended for facial and neck massages.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: Retinol A (Glycospheres), Unispheres (Vitamin E), Allantoin.

Ag 508

Hydra Firming Cream

Moisturizing, firming facial cream for normal, combination and oily skin.

Action: It improves complexions with loss of firmness and it helps the skin regain the lost elasticity and tightness. It also provides the necessary moisture to the skin. A cream containing Phytodermina Lifting (a plant vegetable extract), plant cyclodextrins (Osilift) and a protein complex of milk. It creates a very fine, elastic and durable film on the skin (allowing it to breathe at the same time) that smoothes the appearance of wrinkles and improves its texture and tone. It also contains hyaluronic acid and marine collagen which enhance the skin's hydration and in combination with Pentacare and Avocado Oil it maintains and protects the skin's hydrolipid film. It has a gel-cream texture that is perfectly absorbed by the skin and the menthol it contains gives a freshness sensation.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: MMW HA, MS HC, Milk Peptide Complex, Liftessence, Osilift, Pentacare, Avocado Oil, Menthol.

Ag 509

Lifting Cream

Firming refreshing facial and neck cream for all skin types.

Action: It offers a direct sense of tightening of the skin and it enhances the natural process of cell renewal, improving its tone and texture. A cream that combines the intense firming action of Phytodermina Lifting (a plant vegetable extract) with a plethora of ingredients that enhance the skin's natural defense mechanisms and stimulate the cell renewal process. The E-C-F vitamin complex, Drieline (saccharomycetes), Kombuchka (black tea saccharomycetes) and Oxyforce cellular active enhance the oxygen supply to the epidermal cells, improve cell energy levels and reduce wrinkle depth. The cream holistically improves the skin's appearance and texture, while lifting the face's perimeter and neck.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: Phytodermina Lifting, Oxyforce Cellular Active, Phytosqual, Kombuchka, Lipexel, Drieline, Vitamin Complex E-C-F.

Se 511

Hydra Calming Cream

Soothing, moisturizing facial cream for sensitive and irritated skin.

Action: It moisturizes and relieves the skin of inflammation, irritation and redness. At the same time, it protects it from harmful environmental factors. It is recommended to be used preventatively for all skin types. Hydra Calming Cream is the ideal solution for sensitive and irritated skin because of the synergy of calming raw materials. It reduces erythema, moisturizes and protects even the most sensitive skin. The Celligent, Glycofilm, Dermasooth, Aloe Vera, Panthenol and Chamomile Oil it contains enhance the skin's protection against free radicals, protect against oxidative stress, pollutants and reduce inflammations and redness by exogenous factors. It restores the proper functioning of the skin barrier, hydrates and reduces the skin's transdermal water loss.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: Celligent, Glycofilm, Dermasooth, Chamomile Oil, Aloe Vera, Panthenol, Shea Butter.

Hydration / Eye Care / Protection / Repair / Anti Age / Glow / Sensitivity / Purification

50ml

Pr 513

Color Control Cream (Light or Dark Shade)

Tinted, moisturizing facial cream for all skin types.

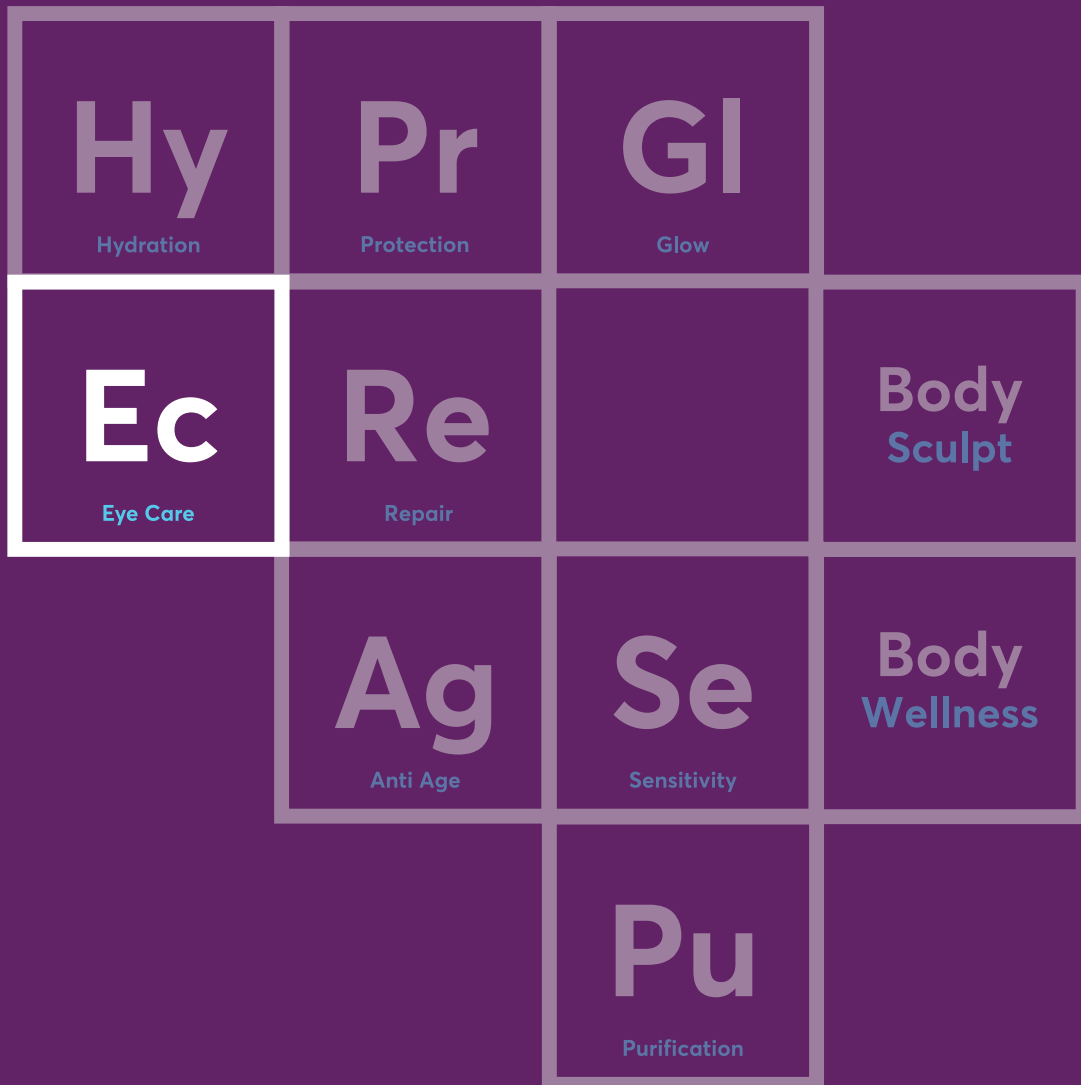

Action: It simultaneously moisturizes and covers skin discolorations and imperfections, offering brightness and an even skin tone. A color correction repair cream (Color Control) that naturally adapts to the individual skin tone and has multiple actions. It combines 5 different actions (anti-oxidative shielding, sun protection/SPF 10, reduces inflammations and burning sensations, enhances moisture level and reduces wrinkles) that result in a healthy glow and a more youthful skin. It has a fine non-oily texture and comes in two shades. It spreads easily, evenly and is quickly absorbed.

Use: Apply a small amount to the entire face 1 to 2 times daily.

Key Ingredients: MMW Hyaluronic Acid, Pollushield, Matrixyl 3000, Vitamin PP (Niacinamide), UV Filters, Aloe Vera, Panthenol, Allantoin.

Biphase Eye Make Up Remover

Dual-phase cleansing product (oil-water) specially formulated for the area around the eyes.

Action: It easily removes makeup without causing irritation and dryness. A green aloe extract cleansing product with a special mixture of non-irritating plant oils for fast and easy eye make-up removal from the sensitive eye area.

Use: Apply a small amount to the area around the eyes using a cotton pad. Shake well before use.

Key Ingredients: Emollient Blend Oils, Aloe Vera.

Ec 317

Eye Shine Serum

Multi-action serum targeted specifically for the area around the eyes.

Action: It moisturizes and improves the skin's appearance reducing dark circles and puffy eyes. It reduces the appearance of fine lines and wrinkles, leaving the skin around the eyes firm and with a healthy glow. A serum containing Matrixyl peptide that activates the production of collagen and hyaluronic acid, which smoothes expression lines and wrinkles. Eyedeline, a biotech ingredient of marine origin, regenerates and decongests the skin, reducing puffiness, dark circles and wrinkles around the eye area. The serum's action is enhanced by the specialized powerful antioxidant ingredient Venecane which inhibits the action of free radicals and protects the skin from UVA rays damage.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Venecane 5%, Eyedeline 2%, Matrixyl 5%.

Ec 418

Eye Shine Mask

Multi-action mask targeted specifically for the area around the eyes.

Action: It moisturizes, revitalizes, stimulates and brightens the complexion. It improves the skin's appearance, reducing dark circles and puffy eyes. It reduces the appearance of wrinkles. The mask has a creamy texture and contains the Matrixyl peptide which activates the production of collagen and hyaluronic acid by smoothing expression lines and wrinkles. Eyedeline, a biotech ingredient of marine origin, regenerates and decongests the skin, reducing puffiness, dark circles and wrinkles around the eye area. Enhanced with marine collagen, an ingredient that helps restore the skin's firmness, softness and consistency.

Use: Apply a thick layer around the eyes (not on the eyelids), allow to dry and remove with water.

Key Ingredients: Marine Collagen, Eyedeline, Matrixyl, Kaolin.

Re 318

Retinoid C Serum

Repairing, antioxidant serum for all skin types.

Action: It improves the appearance and quality of the skin with fine lines, wrinkles, pigmentation problems and dark spots, enhancing its luminosity and resulting in an even skin tone. Serum that combines two powerful active ingredients: Retinoid and stabilized form of Vitamin C, thus offering multiple actions without irritating the epidermis. Reduces fine lines, wrinkles, neutralizes the action of free radicals and protects the skin from oxidative stress. In addition, it improves the roughness, imperfections and texture of the epidermis. Skin discolorations and age spots are reduced, delivering a uniform, luminous and shiny appearance to the epidermis.

Use: Apply a small quantity to clean skin and massage until it is absorbed. It has no phototoxic effect and can be used throughout the day.

Key Ingredients: Retinoid 1%, Ascorbic Acid (3-O-Ethyl Ascorbic Acid), Vitamin E, Panthenol.

Re 319

Retinoid 3% Serum

Anaplastic, revitalizing serum with enhanced retinoid content (3%) for all skin types.

Action: It improves the appearance and quality of skin with wrinkles, blemishes, intense pigmentation and age spots, enhancing its luminosity and resulting in an even skin tone. Oily serum which contains 3% Retinoid which offers multiple actions without irritating the epidermis. Reduces fine lines and wrinkles, neutralizes the action of free radicals and protects the skin from oxidative stress. Improves the roughness, flaws and texture of the epidermis. Skin discolorations and age spots are reduced, delivering uniform tone, bright and shiny appearance to the epidermis.

Use: See protocol instructions. It has no phototoxic effect and can be used throughout the day.

Key Ingredients: Retinoid 3%, Vitamin A, Vitamin E, Soja, Retinyl Palmitate, Tocopherol, Vitamin C.

Re 320

Retinoid 10% Serum

Anaplastic, revitalizing serum with enhanced retinoid content (10%) for all skin types.

Action: It improves the appearance and quality of skin with wrinkles, blemishes, intense pigmentation and age spots, delivering an even skin tone. Oily serum for topical use containing the powerful active ingredient Retinoid in high percentage which offers multiple actions without irritating the skin. It reduces deep wrinkles, intense and persistent skin dyschromias, signs of acne and scars. Improves the roughness, texture and quality of the skin.

Use: See protocol instructions. It has no phototoxic effect and can be used throughout the day.

Key Ingredients: Retinoid 10%, Vitamin E, Almond Oil.

Retin Repair

Double Caviar Ω3-Ω6 Serum

Nourishing caviar oil reinforced with fatty acids Omega-3, Omega-6, for tired and mature skin.

Action: It nourishes and improves the appearance of the skin with wrinkles and signs of fatigue, leaving the skin toned and refreshed. A black and red caviar serum, rich in Omega-3 and Omega-6 fatty acids, vitamins, proteins, amino acids and trace elements. Enriched with INCA Omega Oil, an ingredient containing Omega-3, Omega-6, Omega-9, tocopherols, phytosterols and flavonoids, in combination with vitamins F and E, it improves the skin's barrier function and protects cell membranes. In addition, it contains Evening Primrose, an oil rich in polyunsaturated fatty acids to form a protective film for tired skin. The skin is remodeled, wrinkles are smoothed and the face regains its firmness, radiance and healthy appearance.

Use: Apply a small quantity to clean skin and massage until it is absorbed. Shake well before use.

Key Ingredients: Black Caviar, Salmo Ovum, INCA Omega Oil (Ω3, Ω6, Ω9, Tocopherol), Vitamin F Forte (Linoleic Acid, Linolenic Acid), Evening Primrose Oil, Vitamin E, Aloe Vera.

Ag 327

Caviar Ω3-Ω6 Oil

Nourishing caviar oil reinforced with fatty acids Omega-3, Omega-6, for tired and mature skin.

Action: It nourishes and improves the appearance of the skin with wrinkles and signs of fatigue, leaving the skin toned and refreshed. A red caviar serum, rich in Omega-3 and Omega-6 fatty acids, vitamins, proteins, amino acids. Enriched with INCA Omega Oil, an ingredient containing Omega-3, Omega-6, Omega-9, tocopherols, phytosterols and flavonoids, in combination with vitamins F and E, it improves the skin's barrier function and protects cell membranes. In addition, it contains Evening Primrose, an oil rich in polyunsaturated fatty acids to form a protective film for tired skin. The skin is remodeled, wrinkles are smoothed and the face regains its firmness, radiance and healthy appearance.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Salmo Ovum, Vitamin F Forte (Linoleic Acid, Linolenic Acid), INCA Omega Oil (Ω3, Ω6, Ω9, Tocopherol), Evening Primrose Oil, Vitamin E, Almond Oil.

Ag 419

Caviar Ω3-Ω6 Mask

Face mask with caviar reinforced with fatty acids Omega-3, Omega-6, for mature, tired and dull skin.

Action: It refreshes, nourishes and improves the appearance of the skin with wrinkles and signs of fatigue. Simultaneously, it strengthens the skin's texture, restoring a healthy glow. A creamy black and red caviar mask rich in Omega-3 and Omega-6 fatty acids, vitamins, proteins, amino acids. Enriched with Vitamin F, rich in polyunsaturated fatty acids and in synergy with the Matrixil 3000 oligopeptide, it strengthens the skin barrier, reduces the expression lines, wrinkles, rough skin. It also contains the specialized "anti-aging" Chromocare ingredient that helps the skin be transformed, revitalized, become more radiant and firm.

Use: Apply a thick layer, allow to partially dry, massage and remove with water. You can add Caviar Oil while massaging in the mask.

Key Ingredients: Black Caviar, Salmo Ovum, Chromocare, Matrixyl 3000, Vitamin F Forte (Linoleic Acid, Linolenic Acid), Vitamin Complex E-C-F, Avocado Oil, Shea Butter, Kaolin, Red Clay.

Ag 510

Caviar Ω3-Ω6 Cream

A face cream with caviar, reinforced with fatty acids Omega-3, Omega-6 for mature, tired and dull skin.

Action: It nourishes, stimulates and improves the appearance of the skin and removes signs of wrinkles and fatigue. Simultaneously, it strengthens the skin's elasticity and texture, leaving the skin glowing and refreshed. A black and red caviar cream rich in Omega-3 and Omega-6 fatty acids, vitamins, proteins, amino acids. Enriched with Vitamins F and E, rich in polyunsaturated fatty acids it strengthens the skin barrier and reduces transdermal water loss (TEWL). The cream's action is enhanced by the antioxidant ingredient Venecane that inhibits the action of free radicals and protects the skin from UVA rays. It also contains Filagrinol, a mixture of pollen, olive oil, soy and wheat that regulates the skin's fibronectin levels that contribute to its water balance. It has rich texture and is easily absorbed without leaving oiliness.

Use: Apply to the entire face until it is absorbed.

Key Ingredients: Black Caviar, Salmo Ovum, Filagrinol, Vitamin F Forte (Linoleic Acid, Linolenic Acid), Venecane, Allantoin.

Ec 516

Caviar Ω3-Ω6 Eye Cream

Cream with caviar, reinforced with fatty acids Omega-3 and Omega-6, targeted specifically for the area around the eyes.

Action: It moisturizes, stimulates and improves the skin, reducing wrinkles, offering firmness and glow. A black and red caviar cream rich in Omega-3 and Omega-6 fatty acids, vitamins, proteins, amino acids. Enriched with Vitamins F and E, rich in polyunsaturated fatty acids it strengthens the skin barrier and reduces transdermal water loss (TEWL). The cream's action is enhanced by Caffeine & Lecithin for the eye area, smoothing out wrinkles and reducing dark circles and puffiness. The Moist 24 ingredient it contains helps maintain moisture balance. It has a fine texture and is easily absorbed without irritating sensitive skin around the eye area.

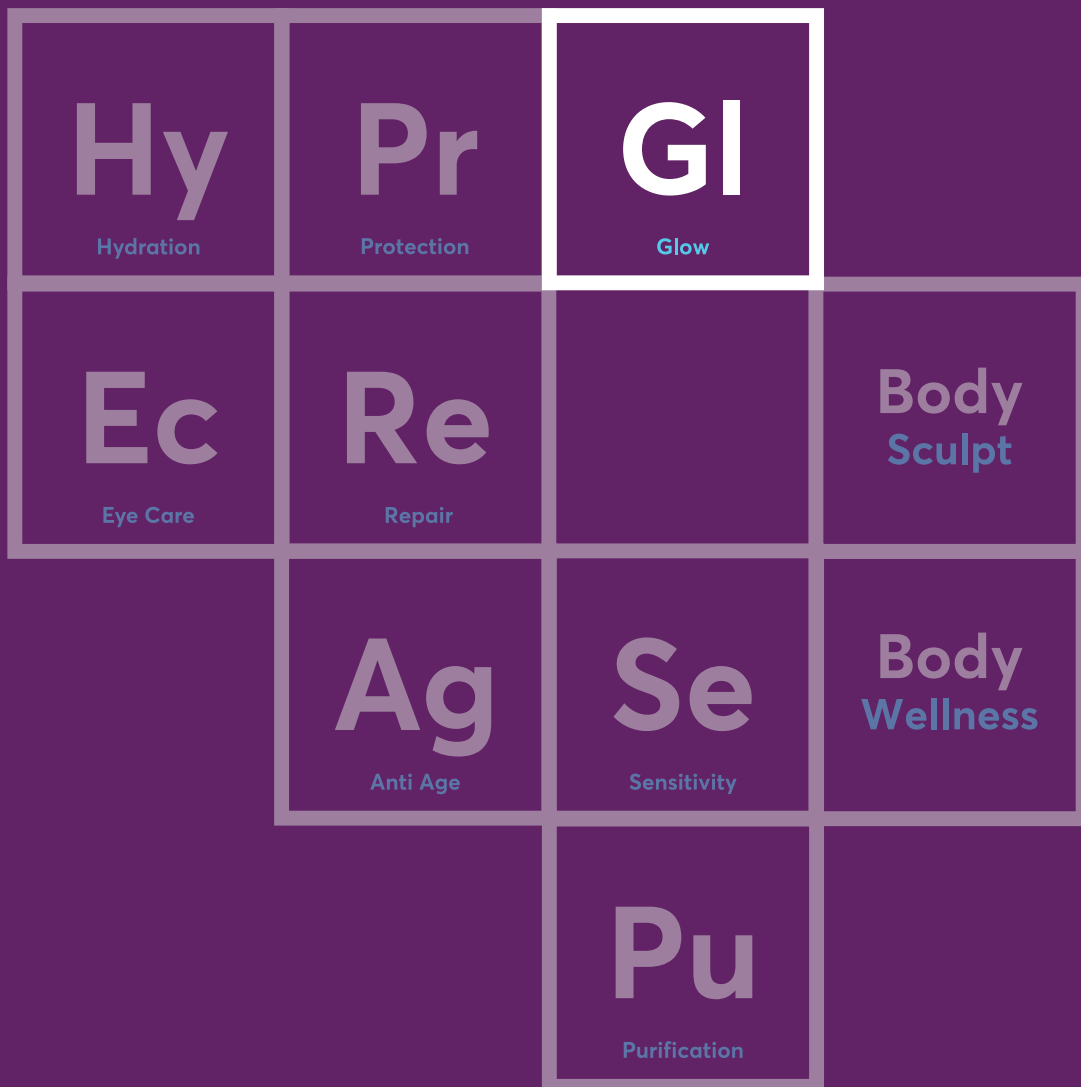

Use: Apply around the eyes (not on the eyelids) and massage gently until it is absorbed.

Key Ingredients: Black Caviar, Salmo Ovum, Moist 24, Matrixyl, Caffeine-Lecithin, Vitamin E, Vitamin F Forte (Linoleic Acid, Linolenic Acid), A-Bisabolol, Panthenol.

Glow

10ml

55ml — 20ml

280ml — 50ml

GI 325

Glow C 12%

Serum of pure Vitamin C and peony extract suitable for skin with pigmentation problems and spots.

Action: It offers brightness, glow and an even skin tone, improving the appearance of the skin. A pure vitamin C in powder form (L-Ascorbic Acid), which produces a serum solution at a 12% content before its first use in synergy with Peonia Extract and Phytic Acid. Vitamin C performs a wide range of actions with a wealth of published clinical studies for its antioxidant, moisturizing, firming, regenerative and bleaching properties that it offers to the skin. Peonia Extract (biofermentation) and Phytic Acid inhibit the formation of melanin by reducing blotches, spots and discoloration.

Use: Press the valve to release the powder into the solution and shake well until it is completely dissolved. Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: L-Ascorbic Acid 12%, A-Bisabolol, Aloe Vera, Peonia Flower Extract 1%, Phytic Acid.

GI 326

Brightening Serum

Serum offering brightness and glow suitable for skin with pigmentation problems and spots.

Action: It improves the appearance of the skin and offers an even skin tone. A serum containing Asyntra (Hexylresorcinol & Ethyl Linoleate), Gallic Acid, Phytic Acid, Vitamin C, Rumex and Licorice, ingredients that provide a uniform skin tone. The synergistic effect of the ingredients aims both at inhibiting the tyrosinase enzyme that is responsible for melanin production and enhancing the antioxidant activity that strengthens the defense mechanism of cells from inflammatory conditions causing pigmented spots. It reduces blotches, spots and discolorations and the skin regains a uniform skin tone and radiance.

Use: Apply a small quantity to clean skin and massage until it is absorbed. It can be used all day and for preventative care.

Key Ingredients: Asyntra, Rumex, Ascorbic Acid, Licorice Extract, Phytic Acid, Gallic Acid, A-Bisabolol, Aloe Vera.

GI 422

White Argile Mask

Cleansing facial mask with white clay for skin with discoloration problems.

Action: It removes residue and excess sebum from the skin, resulting in an even skin tone, brightness and glow. A clay mask containing Asyntra (Hexylresorcinol & Ethyl Linoleate) that accelerates the proteolytic degradation of tyrosinase for immediate effects on skin tone regulation. The Aloe Vera, Panthenol and Calmosensine ingredients it contains, moisturize and soothe the skin.

Use: Apply a thick layer, allow to dry and remove with water.

Key Ingredients: White Argile, Asyntra, Calmosensine, Panthenol, Aloe Vera, A-Bisabolol, Allantoin.

200g

150ml — 50ml

GI 423

Diamond Glow Mask

Instant glow mask in the form of an impregnated gauze with diamond powder suitable for all skin types.

Action: It offers instant glow and refreshes and improves the skin's appearance. Ideal for dull, tired and dark coloured complexions. A mask containing Diamond Powder and 32 antiaging active ingredients to instantly renew the skin and make it more radiant. It is rich in vitamins, antioxidants, nutrients, calming and detoxifying ingredients such as Caffeine, Vitamin A, E, C, Chitosan, Hydrolyzed Elastin, Hydrolyzed Collagen and 15 herbal extracts.

Use: Unfold the gauze, remove only one transparent film that protects it and apply the mask, fitting it well on the face. Leave 20 minutes and then remove. Then massage in Multi Hydrating Cream.

Key Ingredients: Diamond Powder, Caffeine, Tocopheryl Acetate, Hydrolyzed Collagen, A-Bisabolol, Chitosan, Retinyl Palmitate, Allantoin, Hydrolyzed Elastin, +15 Plant Extracts, Kaolin.

GI 424

Brightening Latex Mask

Mask that offers brightness suitable for all skin types.

Action: It works effectively against blotches, blemishes and skin discolorations, providing brightness and a uniform color tone. Latex mask that combines Vitamin C (Ascorbic Acid) with Algin, a natural brown powder seaweed blended with water. It has strong moisturizing and antioxidant action. The mask quickly absorbs water and turns into latex.

Use: Dissolve and stir 1 part powder in 1 part water until you obtain a paste. Let it dry until it becomes latex and remove it.

Key Ingredients: Algin, Ascorbic Acid.

GI 512

Brightening Cream

Cream that offers brightness and glow to skin with pigmentation problems and spots.

Action: It moisturizes, improves the appearance of the skin and offers an even skin tone. It is a cream that contains Asyntra (Hexylresorcinol & Ethyl Linoleate), A-Arbutin, Vitamin C and Rumex, a powerful cocktail of ingredients that balances the melanin production and helps the skin obtain a uniform color. It not only prevents the creation of new spots and blotches but also eliminates existing ones. It contains sunscreen filters (SPF 10) that protect the skin from sunlight. It can be used all day and preventatively.

Use: Apply to the skin and massage until it is absorbed.

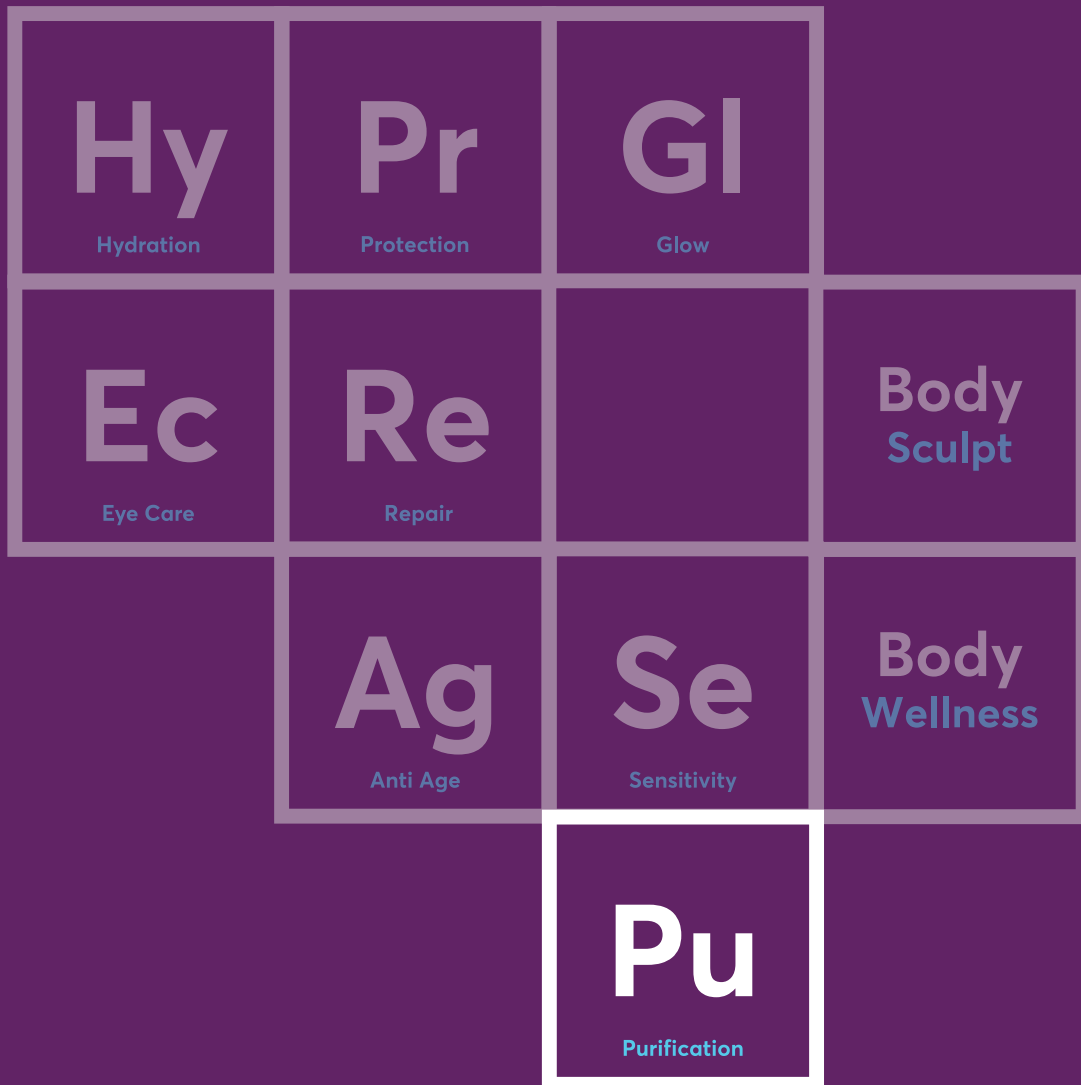

Key Ingredients: Asyntra, Rumex, Ascorbic Acid, A-Arbutin, A-Bisabolol, Vitamin E, Shea Butter, UV Filters.

Pu 109

Clarifying Face Foam

Cleansing foam specifically designed for acne-prone, oily and combination skin.

Action: It removes residue from the skin, absorbs excess sebum and balances oiliness. A foam containing mild surfactant cleansing ingredients, enhanced with the specially formulated Canadian Willowherb ingredient that inhibits the action of the Propionibacterium Acnes bacterium, which is responsible for acne and has anti-inflammatory properties.

Use: Apply and remove with water. It is recommended to use on face and back.

Key Ingredients: Mild Surfactants, Canadian Willowherb.

Pu 110

Clarifying Cleanser Gel

Cleanser gel for acne-prone, oily and combination skin.

Action: It clarifies and unclogs the pores, removes excess sebum and balances the oiliness. A gel with a cleansing mixture of plant oils and olive oil reinforced with the specially formulated Canadian Willowherb ingredient that inhibits the action of the Propionibacterium Acnes bacterium, which is responsible for acne and has anti-inflammatory properties. It also contains Azelaic Acid - Glycine Complex and Sebustop, which are ingredients that regulate seborrhea, treat hypersecretion of sebum, remove excess oil from the skin and provide effective action against acne damages.

Use: Apply a small amount with circular motions and remove with a damp cotton pad.

Key Ingredients: Skin Conditioners, Olive Oil, L-Arginine, Canadian Willowherb, Sebustop (Cinnamon Extract, Ginger Extract, Burnet Extract), Azelaic Acid-Glycine Complex.

Pu 111

Clarifying Active Lotion

Cleansing toning lotion for acne-prone and oily skin.

Action: It removes excess sebum, reduces intense oiliness and tightens pores without causing irritation. A lotion that combines the specialized action of Canadian Willowherb that inhibits the Propionibacterium Acnes bacterium which is responsible for acne. The synergy of the ingredients Azelaic Acid-Glycine Complex, Sebustop and biomimetic royal jelly, regulate seborrhea, treat hypersecretion of sebum, remove excess oil and provide an effective treatment against acne damages. It also contains Mimosa Extract and Calendula Extract, ingredients that provide effective anti-inflammatory, regenerative and antioxidant effects and treat skin irritations.

Use: Apply a small amount to the desired area using a cotton pad.

Key Ingredients: Allantoin, Mentha Essential Oil, Calendula Extract, Mandarine Extract, Mimosa Extract, Canadian Willowherb, 10-HDA (Royal Jelly Mimetic), Azelaic Acid-Glycine Complex.

Hydra Clarifying Serum

Moisturizing serum for acne-prone and oily skin.

Action: It moisturizes, tones and balances the oiliness. A serum that combines the moisturizing effect of hyaluronic acid with the carnation extract to regulate oiliness. The LMW Hyaluronic Acid it contains moisturizes and balances skin oiliness. Red Clover Extract assists regulating the skin's oiliness and reduces the size of its dilated pores.

Use: Apply a small quantity to clean skin and massage until it is absorbed.

Key Ingredients: Red Clover Extract 1%, LMW Hyaluronic Acid, L-Arginine.

Pu 324

Clarifying Stick

Stick for direct use on pimples, for acne-prone skin.

Action: A specialized product with a high content of active ingredients for intense topical use for inflammations on acne prone skin. It combines Azelaic Acid, Salicylic Acid and Canadian Willowherb, ingredients that reduce inflammations on skin with blemishes. Enhanced with Mimosa Extract and Normaseb, it offers faster skin rejuvenation and seborrheic regulation.

Use: Apply 2-3 times daily.

Key Ingredients: Azelaic Acid 5.5%, Salicylic Acid 1.4%, A-Bisabolol, Normaseb 2%, Mimosa Extract, Canadian Willowherb 2%.

Pu 420

Clarifying Active Mask

Soothing, cleansing mask for acne-prone, oily and irritated skin.

Action: It relieves the skin from inflammation and intense irritation, reduces sebum hypersecretion, balances oiliness and tightens the pores. A mask that combines clay with a special derivative of salicylic acid, panthenol, aloe and chamomile and instantly relieves the skin from inflammation and irritation. Enhanced with the Canadian Willowherb ingredient that inhibits the action of Propionibacterium Acnes bacterium, which is responsible for acne and has anti-inflammatory properties. It also contains Normaseb, an ingredient that is derived from hydrolyzate of milk proteins, rich in amino acids (cystine and methionine), restoring the hydrolipid film. The manuka oil it contains offers anti-aging and anti-microbial action and regulates acne conditions. It is also recommended for general use after deep cleansing of the skin.

Use: Apply a thick layer, allow to dry and remove with water.

Key Ingredients: A-Bisabolol, Methyl Salicylate, Allantoin, Aloe Vera, Panthenol, Normaseb, Canadian Willowherb, Manuka Oil, Kaolin.

Green Argile Mask

Cleansing, exfoliating mask for combination, oily and acne-prone skin.

Action: It unclogs the pores, reduces excess sebum, stimulates and brightens the complexion. A mask and scrub that combines green clay with granules of perlite that remove pollutants and the skin's dead cells. Enriched with lemon, cucumber extract and chamomile, which add astringent and moisturizing action and improve the skin's texture and tone. It also contains plantain extract, which is known for its anti-inflammatory, healing and antioxidant properties.

Use: Apply a small amount to the entire face with a light massage for a few minutes. Allow it to dry for 15-20 minutes and then remove with water.

Key Ingredients: Green Clay, Perlite, Plantago Extract, Lemon Extract, Cucumber Extract, Hamamelis Extract, Allantoin.

Pu 517

Clarifying Active Cream

Intensive cream specifically designed to target complexions with acne problems.

Action: It reduces the appearance of acne symptoms and it absorbs excess sebum by improving the skin's appearance without causing dryness and irritation. A cream containing Canadian Willowherb, an ingredient that inhibits the action of the Propionibacterium Acnes bacterium. The Sebopessina and Normaseb ingredients it contains directly reduce and regulate sebum secretion and skin oiliness without causing dryness. The synergy of Azelaic Acid with Manuka Oil and Jojoba Oil give the cream strong antibacterial and anti-inflammatory properties. Aloe Vera, A-Bisabolol and Panthenol, soothe the irritated, acne prone skin while keeping the moisture levels high, while Polytrap absorbs excess oil leaving a matte finish.

Use: Apply to the entire face and massage until it is absorbed.

Key Ingredients: Allantoin, Mentha Essential Oil, Sebopessina, Manuka Oil, Mimosa Extract, Aloe Vera, Normaseb 1%, Canadian Willowherb 1%, A-Bisabolol, Azelaic Acid 4%, Polytrap, Calendula Extract, Jojoba Oil, Glycyrrhetic Acid.

Pu 518

Clarifying Tinted Cream

Tinted cream which provides coverage for acne-prone and oily skin.

Action: It reduces excess sebum and balances the skin's oiliness. It evenly covers blemishes and improves the skin's appearance, without causing dryness and irritation. A cream containing Canadian Willowherb, an ingredient that inhibits the action of the Propionibacterium Acnes bacterium. In combination with Salicylic Acid, it helps to deal with acne problems and prevents the appearance of black spots. The Sebopessina and Normaseb ingredients it contains reduce and regulate sebum secretion and skin oiliness without causing dryness. The synergy of Manuka Oil and Jojoba Oil gives the cream strong antibacterial and anti-inflammatory action. Aloe Vera, A-Bisabolol and Panthenol, soothe skin irritated by acne while maintaining the high moisture levels.

Use: Apply gently, like makeup, to the entire face.

Key Ingredients: Allantoin, Sebopessina, Manuka Oil, Normaseb 1%, Canadian Willowherb 1%, Jojoba Oil, Salicylic Acid 1%, A-Bisabolol, Calendula Extract, Vitamin F.

Liposauna Olive Paste

Olive oil paste that induces healthy perspiration, suitable for bodies with stubborn topical fat.

Action: It causes perspiration that assists detoxification and improves the texture of "orange peel" skin and topical fat. Perspiration can be increased in conjunction with the use of a thermosuit. Recommended also for overweight people.

Use: Apply to the entire body and wrap with plastic cling wrap, leave 30' and remove.

Key Ingredients: Beeswax, Olive Oil, Vaseline Pharmaceutical.

Bw

Fykia Powder

Vesiculosus seaweed powder suitable for bodies with cellulite and stubborn topical fat.

Action: It improves the texture of "orange peel" skin and enhances the skin's uniformity leaving it smoother and firmer. Stabilized seaweed with a powerful action against localized fat and cellulite. It contains 25 trace elements (such as iodine, Fe, Zn) and amino acids which play a major role in the fat burning and triglyceride elimination process. It also contains proteins and 10 basic vitamins (such as C, E and B3) for skin regeneration.

Use: Mix the powder with water until a paste is formed. Then apply it all over the body, wrap with plastic cling wrap, leave for 30' and remove with water. To enhance its effect, add Thermoslim Gel to the paste and follow the previously mentioned application procedure.

Key Ingredients: Fucus Vesiculosus 100%.

Bw

Celluslim Mud Mask

A professional body mud mask infused with algae for bodies with cellulite and stubborn topical fat.

Action: It improves the texture of "orange peel" skin and enhances the skin's uniformity leaving the skin smoother and firmer. Simultaneously it tightens and revitalizes the body. Body mask with Dead Sea mud, red clay and seaweed, recommended for slimming, detoxification and anti-cellulite. The quality of Dead Sea mud is renowned for its composition. It also contains the Eskin component with anti-edema and anti-inflammatory properties. Remoduline stimulates the process of lipolysis, increases burning of triglycerides, tightens and shapes the body. The Isoslim Complex contains isoflavones, caffeine, carnitine, amino acids and carbohydrate components that effectively help to reduce cellulite and increase skin elasticity.

Use: Apply, allow to dry for 15'-20' or for 30' if you use a plastic cling wrap and then remove with water.

Key Ingredients: Dead Sea Mud, Fucus Extract, Eskin, Remoduline, Isoslim Complex, Red Clay, Kaolin, Allantoin, A-Bisabolol.

A powerful anti-cellulite exfoliating gel that combines chemical exfoliation with caffeine suitable for bodies with cellulite and stubborn topical fat.

Action: It successfully removes the skin's dead cells and it improves the appearance of dimples leaving it extra smooth, silky and soft. Low viscosity multi-action fluid. Salicylic Acid is a β -hydroxy acid which has strong keratolytic and detoxifying action, which in synergy with Cafeisilane they improve the skin's texture.

Use: Massage gently until absorbed and do not remove.

Key Ingredients: Salicylic Acid, A-Bisabolol, Cafeisilane.

Bs

Thermoslim Gel

A high performance heat gel suitable for bodies with stubborn topical fat and cellulite.

Action: It adeptly causes intense hyperemia and a heated sensation improving the appearance of the skin with stubborn topical fat and cellulite. Recommended also for overweight people. The combination of Methyl Nicotinate with hot Capsicum achieves capillary vascular enlargement, increased microcirculation, and hyperaemia in the epidermis. The complex of iodine extract (Iodotrat), the extracts of ivy ruscus and Pro-Sveltly extract activate the lipolysis process and reduces fat storage and inflammation of tissues by fighting cellulite.

Use: Apply the gel into skin until it is absorbed. The use of oil or oily body cream after the heating gel reduces the hyperemia caused.

Key Ingredients: Methyl Nicotinate, Capsico-Tabasco Pepper, Ivy Extract, Ruscus Extract, Pro-Sveltly, Iodotrat.

Contraindications: Not recommended for people with circulatory problems.

Bs

Anticellulite System

A professional enzymatic serum package suitable for bodies with cellulite and stubborn topical fat.

Action: It successfully improves the texture of "orange peel" skin and enhances the skin's uniformity and elasticity leaving it smoother and firmer. Intensive treatment combining the powerful action of the enzyme Hyaluronidase with active lipolysis. Hyaluronidase with its enzymatic action in synergy with caffeine, iodine and ruscus, helps fight against cellulite and local fat. The Escin contained, strengthens the walls of the capillary vessels by avoiding the formation of swellings. In addition, Centella extract helps skin rejuvenation.

Use: The individual pack contains 10 serum bottles. Press the plunger to mix the powder that the lid contains with the solution and shake well to dissolve completely. Use half the amount in the morning and half in the evening on problem areas. For professional use, consult the body protocols instructions.

Key Ingredients: Hyaluronidase 1%, Caffeine 3%, Iodotrat 1%, Sveltam 1%, Escin 0.2%, Centella Extract 2%, Cola Extract 2%, Ruscus Extract 2%, Salicylic Acid 1%.

Body Sculpt

120ml

120ml

1000ml — 200ml

Bs

Capsicum Slim Serum

Serum with red pepper and caffeine for bodies with cellulite and topical fat.

Action: It causes slight hyperaemia and stimulates the microcirculation of the tissues. Improves body skin's appearance of "orange peel" and enhances its uniformity and elasticity.

Use: Apply the serum on clean skin using massage movements until absorbed and continue with the product of the program you follow.

Key Ingredients: Capsico-Tabasco Pepper, Artichoke Extract, Caffeine, Methyl Nicotinate.

Bs

Caffeine Artichoke Serum

An advanced caffeine and artichoke body serum suitable for bodies with cellulite and stubborn topical fat.

Action: It successfully improves the appearance of dimples and enhances the skin's uniformity and elasticity leaving the skin smoother and firmer. It combines caffeine with artichoke extract which activates the fat burning in the adipocytes and reduces adipocyte volume. Enhanced with Phytodermina Lifting, it offers a direct tightening. Non-stop action with the A2 Blockers component which combats the natural reaction of the body, its defense, to block and inhibit the fat-dissolving action of the active ingredients, thus resulting in their continued action.

Use: Massage serum twice a day on clean problem areas until it is absorbed and continue using your daily routine products. For professional use, consult the body protocols instructions.

Key Ingredients: Caffeine Biogenic, Artichoke Extract, Phytodermina Lifting, A2 Blockers, Guarana Extract, Ruscus Extract, MMW HA, Argisil C, Salicylic Acid.

Bs

Triple Action Shape Gel

Triple action body gel for bodies with cellulite, localized fat and loose skin.

Action: It improves the texture of "orange peel" skin and enhances the texture of the skin. It combines plant extracts of Guarana, Chrysanthellum Indicum with green coffee (Ecoslim) that instantly activate the lipolysis process and coenzyme A which stimulates the breakdown of fatty acids as well as tannins which combat skin sagging. Enriched with Argisil C which in synergy with Remoduline activates the lipolysis process, reduces cellulite and prevents skin loosening. Non stop action technology with the A2 Blockers component which addresses the natural reaction of the body, its defense, blocking and inhibiting the fat-dissolving action of the active ingredients, resulting in their continued action.

Use: Apply the gel to the skin and massage the area until it is absorbed. To enhance its effect, apply the Thermoslim Gel to the skin first and then apply the Triple Action Shape Gel and massage until it is absorbed.

Key Ingredients: Lipocare, Remoduline, Ecoslim, Argisil C, Guarana Extract, A2 Blockers.

Body Sculpt

200ml

1000ml — 200ml

Bs

Lipout Shape Cream

A multi-synergistic cream suitable for bodies with cellulite and stubborn topical fat.

Action: It improves the texture of "orange peel" skin and smooths the skin leaving it pleasantly hydrated and rejuvenated. It combines the action of Lipout (marine origin) and Pro-Sveltyl extract which activate fat-burning cells in adipose tissue to reduce excess fat and thus refine the silhouette and favors the hydrolysis of triglycerides present in the lipid compartment of fat cells. Enhanced with ivy and ruscus extracts, it intensifies the microcirculation of tissues by directly activating the lipolysis process. Non-stop action with the A2 Blockers component which combats the natural reaction of the body, its defense, to block and inhibit the fat-dissolving action of the active ingredients, thus resulting in their continued action.

Use: Apply the cream and massage until it is absorbed.

Key Ingredients: Lipout, Ruscus Extract, Ivy Extract, Pro-Sveltyl, A2 Blockers.

Bs

AHA Liposlim Cream

An AHA and caffeine-enhanced body massage cream suitable for bodies with stubborn topical fat and cellulite.

Action: It improves the texture of "orange peel" skin and reduces the skin's stubborn topical fat as it enhances skin's uniformity, leaving it extra smooth and ultra supple. Cream which combines AHA, removes dead cells, helps to strengthen the natural skin renewal process as well as promotes better penetration of the active ingredients. In combination with various forms of caffeine, ruscus extract and isoflavones, it stimulates the lipolysis process, increases the burning of triglycerides, tightens and firms the body. Enhanced with chamomile, panthenol and keratoplast, it moisturizes and improves the texture and quality of the epidermis. It has a characteristic texture, providing high elasticity and is suitable for massage without leaving greasiness.

Use: Apply the cream to the skin and massage until it is absorbed.

Key Ingredients: Glycolic Acid 7.0%, Lactic Acid 4.5%, Caffeine, Keratoplast, Ecoslim, Isoslim Complex, Ruscus Extract, Chamomile Oil, Panthenol.

Bs

Firming Latex Body Mask

A high performance slimming body mask for sagging skin.

Action: It drastically improves the elasticity of the skin and enhances its cohesion. Recommended for bodies with sagging skin and it can be used preventatively during weight loss programs. A closed latex mask that combines Menthol and Algin (a natural moisturizer derived from brown algae) in powder form mixed with water. It moisturizes and revitalizes the skin, giving a sense of freshness, coolness and intense firming. The mask quickly absorbs water and turns into latex.

Use: Mix 1 part of powder into 1 part of water until it forms a paste. Apply a thick layer of paste, allow to dry until it takes a latex form and remove.

Key Ingredients: Algin, Menthol.

Body Sculpt

1000ml — 200ml

1000ml — 200ml

500ml — 200ml

Bs

Cryolift Gel

An advanced firming body gel for sagging skin that causes an intense cold sensation.

Action: It significantly improves the skin's elasticity and enhances its consistency and the skin's uniformity. Recommended to be used during body weight loss programs. Cryotherapy product for instantly visible firming results. It contains seaweed and Menthol which produce an intense feeling of cold in the applied area. It also has antiseptic and anti-inflammatory properties.

Use: Apply the gel to the skin and massage in until absorbed. To stop the sense of cold it is recommended to use oil or oily body cream. Avoid anything hot.

Key Ingredients: Menthol, Seaweed Gel.

Bs

Stretch Firm Cream

Body firming cream for loose skin and stretch marks.

Action: It reinforces the elasticity of the skin and reduces the appearance of stretch marks. It is recommended to be used during pregnancy and weight loss. Ideal for skin tightening upper arms. It combines chamomile oil with Isoslim Complex which help combat cellulite, strengthen the connective tissues and instantly firm the skin. Aquaderm reduces intradermal moisture loss, increases the hydration of the upper skin layers and regulates the hydrolipidic balance. Algisium C has fat burning properties as it activates the hydrolysis of triglycerides, triggers the production of collagen and helps to reduce stretch marks caused by pregnancy or rapid weight gain or loss. It also contains Hydroxyprolisilane which activates fibroblasts and regenerates tissues.

Use: Apply the cream to the skin and massage until it is absorbed.

Key Ingredients: Chamomille Oil, Cikaderm, Isoslim Complex, Hydroxyprolisilane, Algisium C, Aquaderm.

Bs

Bust Firming Gel

Firming gel suitable for the chest and arm area.

Action: It effectively tones the skin and significantly smooths it. It combines the hydrating effect of hyaluronic acid with a number of tightening components, such as Phytodermina Lifting, Biobustyl and Liftessence, which reconstruct the elastin fibers, activate the collagen synthesis and tighten the skin. Biobustyl (from soy proteins) activates collagen synthesis and restores the skin's water balance. Highly recommended to be used during body weight loss programs.

Use: Lightly massage in until it is absorbed.

Key Ingredients: Bio-Bustyl, Phytodermina Lifting, Liftessence, Menthol, Avocado Oil, Mushroom Extract, Hyaluronic Acid MMW, Dermal Respiratory System.

Contraindications: Avoid using it during pregnancy and breastfeeding.

Body Sculpt

280ml — 50ml

20ml

50ml

Bs

Hand Care Cream

A nourishing, moisturizing and protective hand care cream.

Action: It immediately replenishes the skin's moisture balance while nourishing and vigorously protecting it from dryness and irritation. Cream for hands and nails in a non-greasy texture rich in active ingredients such as Mandelic Acid, Panthenol and Aloe Vera, which treat skin dryness and prevent skin discolorations.

Use: Lightly massage in hand cream until it is absorbed after each hand wash.

Key Ingredients: Mandelic Acid, Vitamin B3 (Niacinamide), Centella Extract, A-Bisabolol, Almond Oil, Allantoin, Panthenol, Aloe Vera.

Bs

Anticallus Serum

Serum that moisturizes and softens the calluses of the feet.

Action: It combines Salicylic Acid with Urea and its daily use treats and relieves legs with calluses.

Use: Apply a few drops on cleansed skin twice a day, with a single layer until absorbed. It is recommended that the serum is used regularly before and after removal of the callus by a specialist.

Key Ingredients: Salicylic Acid 1%, Urea 20%.

Bs

Post Depil Cream

Multi-action cream for use after facial and body hair removal.

Action: It soothes the skin from the irritation of epilation and its systematic use-treatment delays hair growth and gradually reduces hair.

Use: After waxing, apply with lightly massage movements until it is absorbed. It is recommended for all depilation methods. In the case of using waxes for epilation, it removes their remains.

Key Ingredients: Kelisof, Decapeptide-1, Wheat Germ Oil, A-Bisabolol, Allantoin, Aloe Vera, Centella Extract, Methyl Salicylate, Panthenol.

J.A

Ingredients

1—

10-HDA (ROYAL JELLY MIMETIC): Royal Jelly-mimetic 10-HDA that reduces sebum secretion and re-establishes the physiological balance in acne-prone skin. Decreases the number of active sebaceous glands and inhibits the development of P. acnes.

3—

3-O-ETHYL ASCORBIC ACID: Stabilized Vitamin C. Inhibits melanin biosynthesis and tyrosinase activity. Accelerates the synthesis of collagen, is a strong antioxidant and Resists inflammations. It improves skin's appearance and glow.

A—

A-ARBUTIN: Biosynthetic product with whitening action. It acts by preventing the formation of skin melanin by inhibiting the enzymatic oxidation of tyrosine. It acts more quickly and effectively than other ingredients with similar targeting and it effectively reduces spots caused by exposure to ultraviolet light.

A-BISABOLOL: Derived from the essential oil of the Candeia tree (Eremanthus erythropappus), it has very high purity, of at least 95%, of the active isomer of Alpha-Bisabolol. It offers soothing and anti-inflammatory action.

A-G HESPERIDIN: Hesperidin is a bioflavonoid ingredient produced by citrus fruits. Clinical studies showed that hesperidin enhances the microcirculation of the epidermis treating dark circles under the eyes, dull, pale, flat, and aged skin in an optimal way. For centuries, Japanese people added citrus fruit skins in hot bath both for relaxation and enhancement of the microcirculation of the epidermis.

A2BLOCKERS: Innovative ingredient from chrysanthemum herbal extracts, rich in polyphenols and flavonoids with calming and anti-inflammatory properties. Deals

with the natural reaction of the body, its defense, to block and inhibit the lipolytic action that its active ingredients offer. It specifically binds to A2 receptors, resulting in the continuation of the lipolytic process without interruption.

AA2G: Natural Vitamin C (ascorbic acid) stabilized in glucose (against high temperatures, ion metals, pH, breakdown mechanisms) and is extracted from plants and fruits. When applied on the skin, α-glucosidase enzyme, which is found in the epidermis, breaks the bond with gradual release of vitamin C. It was originally developed in Japan as a semi-pharmaceutical product for skin whitening. It suppresses melanin synthesis in melanocytes, it reduces the amount of pre-existing melanin and promotes collagen synthesis by the fibroblasts. AA2G by gradual vitamin release, which acts as a free radical inhibitor, reduces edemas and irritations, while reducing expression wrinkles at the same time.

ACEROLA FRUIT (VITAMIN C): Ingredient from the homonymous Acerola fruit, rich in vitamin C, in a form that is easily absorbed by the epidermis. It is a powerful antioxidant and anti-inflammatory ingredient. Moisturizes the skin and accelerates collagen synthesis. It improves the appearance of the skin for a radiant look.

ACTIVE CHARCOAL: Active Bamboo Charcoal Powder. Its microporous surface makes it an excellent absorbent material. It absorbs minerals, toxins, impurities and other harmful substances, leading to a stronger and healthier skin. Exfoliates dead skin cells and helps with the removal of chemicals from skin pores. It stimulates cell growth, leading to smooth skin. Excellent ingredient for skin cleansing.

ALBUMINE: Protein fragment from the egg white –dried, in powder form- with excellent firming effect.

ALDAVINE: A polysaccharide complex derived from Ascophyllum Nodosum & Asparagopsis Armata algae. It binds carbonylic radicals, which attack the

extracellular proteins creating products known as AGEs (Advanced Glycation Endproducts), which accelerate aging process by destroying collagen matrix. Moreover, it enhances the production of Type III collagen. It also decreases the intensity of dark circles, reduces eye puffiness and improves the appearance for an overall youthful and radiant look.

ALGIN: Polysaccharide derived from brown seaweed. It is a fast water-binding agent for the skin because of its ability to quickly absorb water that converts it into latex-like material. It is used as a base for peel-off masks offering deep and fast hydration.

ALGISIUM C: Polymannuric acid and silanol (silicon complex-active ingredient carrier) extracted from laminaria algae, with multiple excellent actions. It enhances deep hydration and activation of collagen production. It has lipolytic action, activating the hydrolysis of triglycerides thus reducing pregnancy stretch marks or stretch marks due to rapid weight gain or loss. It also exerts anti-glycation action which stretches the skin and stops the reaction between sugars and proteins on the epidermis level, which results in metabolism of the latter and gradual loss of skin elasticity.

ALLANTOIN: Allantoin supports the regeneration of damaged epithelial cells, promoting the proliferation of cells leading to new, healthy tissue. Pharmaceutical studies have proven its healing action. It has soothing, anti-inflammatory, antioxidant and moisturizing properties.

ALMOND OIL: Oil from almonds with hydrating and emollient properties (smoothing action) for the skin. It is considered a perfect active ingredient carrier since it is easily absorbed by the upper skin layers. Because of its lipid-replenishing properties is suitable for dry skin care products.

ALMOND GRANULES: Almond granules, geometrically homogeneous, which achieve mild and even exfoliation.

ALOE VERA: Juice (extract) from the homonymous plant. Natural cocktail containing vitamins C and E, zinc and seven Super Oxide Dismutases enzymes. It hydrates and helps reducing skin irritation and burning sensation. Stimulates wound healing and activates fibroblasts to produce collagen and elastin. It also has antioxidant and anti-microbial properties.

ALUMINUM OXIDE: White Aluminum oxide crystals are used in microdermabrasion equipment. When added to creams and cleansers create milder exfoliating products. They safely eliminate dead cells located in the epidermis and enhance cell renewal at the skin surface.

ANTARCTICIN: A glycoprotein obtained through Biotechnology. Protects the skin from extremely cold environments. It enhances moisturization, firmness and elasticity and at the same time reduces depth and volume of wrinkles and TEWL. Enhances skin regeneration and visibly reduces wrinkles depth and volume.

APRICOT OIL: Oil derived from apricot cores. Rich in oleic and linoleic acids, with excellent emollient properties, rapidly absorbed by the skin (very good compatibility) and does not leave any sense of oiliness.

AQUADERM: Natural Moisturizing Factor (NMF) derived from plants and fruits. It contains essential amino acids and vitamins. It reduces transdermal water loss, increases the hydration of the upper layers of the skin, regulates hydro-lipid balance and improves skin elasticity.

ARGAN OIL: Oil of the fruit of the homonymous tree, which grows in Moroccan areas. It contains a high percentage of fatty acids, including linoleic acid ($\Omega 6$), which enhances the natural defense and regeneration of the skin. It contributes to the restoration of the hydrolipid membrane, which leads to the hydration of the epidermis. It helps to the renewal of the cells of the epidermis and limits the signs of aging.

ARGILE: Mineral argile, an active

ingredient used since ancient times for its cleansing and protective properties. It contains trace elements as silicon dioxide, magnesium, calcium, iron, phosphorous, sodium, potassium, copper, zinc, selenium, cobalt, manganese, which are necessary for ensuring skin health.

ARGININE (L-ARGININE): L-arginine is a semi-essential amino acid that improves blood circulation, accelerates the rate of the healing of wounds, improves the burning of excess fat and supports the production of collagen.

ARGISIL-C: Silanol (silicon complex - active ingredients carrier) with L-Arginine peptide. It can increase endogenous NO secretion which activates the lipolysis process resulting in a reduction of cellulite and sagging skin. It also exerts anti-glycation action which firms the skin. Its anti-glycation action stops the reaction between sugars and proteins on the epidermis level, which results in metabolism of the latter and gradual loss of skin elasticity.

ARNICA OIL: A herbal extract which contains the valuable, lipophilic, active constituents of arnica blossoms in conjunction with the synergistic accompanying substances. Offers good effect on the blood flow in peripheral vessels, reduces the appearance of bruises and black circles around the eyes and it is also anti-inflammatory.

ARTICHOKE EXTRACT: Artichoke extract from the island of Crete, certified by the Department of Pharmacy of the University of Athens. According to recent clinical studies, artichoke extract is one of the most modern weapons against topical fat and cellulite.

ASCORBIC ACID: See L-ASCORBIC ACID.

ASYNTRA: Skin lightening ingredient. It offers radiance and even skin tone. Works by modulating multiple sites in the melanogenesis pathway. Stimulates collagen and elastin synthesis and improves roughness of the skin. It offers both preventative and restorative skin

care. Excellent for normal and hyper-pigmented skin.

AVOCADO OIL: Avocado oil rich in palmitic, oleic and linoleic acid. It increases skin hydration by 19% and skin elasticity by 6.5% and reduces irritation indexes due to UVB radiation by 47%. It is rich in vitamins A and E.

AZELAIC ACID: Derived from wheat, rye and barley. It is a natural fatty acid with clinically proven effectiveness against acne. It has pharmacological properties that make it the ideal for acne treatment. Azelaic acid interferes with the most important factors involved in the pathogenesis of acne and exerts the following actions:

A. Comedolytic: It normalizes the disturbed follicular keratinization which leads to the formation of comedones, inflamed papules and pustules.

B. Antibacterial: It reduces the endofollicular density of *Propionibacterium acnes* within 8 weeks.

C. Anti-inflammatory: It reduces the free fatty acids on the epidermis. This anti-inflammatory action is the base for the influence on inflammatory acne. Azelaic acid helps even skin color tone, back to normal, in cases of persistent spots usually resulting from acne.

AZELAIC ACID-GLYCINE COMPLEX: Molecule derived from azelaic acid and glycine that illuminates and improves texture clarity for a more glowing complexion. It addresses uneven skin tone and dark spots while improving skin quality for a brighter complexion. Due to the presence of glycine, it has also moisturizing and elasticizing properties. It is anti-inflammatory, anti-keratinizing and free radicals' inhibitor. At the same time, it bears an anti-acne action since it is bacteriostatic and normalizes sebum secretion.

AZULENE: Specialized chamomile distillate. It has anti-inflammatory, antioxidant and soothing properties. It effectively aids in minimizing skin wrinkles and edemas.

B—

BAICALIN: An active ingredient that is obtained from the baical skull-cap. Baicalin regulates cell division. It acts to protect telomeres and so extends the cell division stage in the skin's layers. This turns back the skin cells' "biological clock" and prevents premature skin aging resulting from early loss of activity in the cells.

BAMBOO SHELLS: Bamboo shells neutral and geometrically suitable for mechanical exfoliation of all skin types.

BEESWAX: An excretion product of honeybees with emollient and moisturizing properties.

BENTONITE: A type of clay that has the ability to absorb toxins, heavy metals and harmful substances from the epidermis. When it comes in contact with water, an electric charge is created which «attracts and holds» the toxins and absorbs them as a sponge.

BIFIDUS (REPAIR COMPLEX): A biotechnology ingredient designed for skin regeneration. It prevents the damage caused by sunlight and enhances the intrinsic cell repair system, increasing the rate of natural cell restoration.

BIO-BUSTYL: Synergistic action of soy protein and two lipopeptides. Stimulates cell metabolism, restoring the firmness of the epidermis. Promotes collagen synthesis and enhances fibroblasts proliferation. Excellent results in breast lifting treatments.

BIO-PLACENTA: Biomimetic ingredient derived from bio-fermentation. Contains five different growth factors (EGF, IGF-1, acidic FGF, basic FGF and VEGF), amino acids and vitamin B9 for skin regeneration. The structure of Bio-placenta is similar to that of the human placenta. It stimulates cell growth and the biosynthesis of Collagen and at the same time has a wound healing effect. It offers anti-aging, anti-wrinkle and moisturizing qualities which lead to skin rejuvenation and the improvement of skin elasticity.

BLACK CAVIAR: Caviar from sturgeons' eggs, highly appreciated for its components: proteins, fatty acids and vitamins. Excellent ingredient for bringing some nutritive elements to the skin, limiting signs of ageing and moisturizing. Improves tissue elasticity and preserves barrier function by compensating fatty unbalance that occurs during ageing.

BLEND OILS (MICELLES): Micelles that easily remove makeup, pollutants and excess oiliness from the skin of the face and the sensitive area around the eyes, without causing irritation and dryness.

BROCCOLI EXTRACT: Broccoli extract offers strong antioxidant activity and activates the detoxification enzymes of the skin. Protects skin against pollutants, environmental stress factors and prevents visible signs of skin aging.

BROMELAIN: It is derived from pineapple and it is a mixture of proteolytic enzymes (proteases) with exfoliating properties and anti-inflammatory action.

C—

CACAO BUTTER: Cocoa Butter comes from the seeds of Theobroma cacao. It is one of the most powerful emollient ingredients of nature. It nourishes and moisturizes the skin, helping to maintain its elasticity.

CAFFEINE: Ingredient that enhances microcirculation by decongesting edema and stimulating the process of lipolysis. It is used to fight eye puffiness and to improve the appearance of cellulite.

CAFFEINE BIOGENIC: Active caffeine, encapsulated in an oligomer complex that allows the use of high concentration of caffeine in the final product. It enhances the microcirculation and stimulates the lipolysis process, while being easily absorbed by the epidermis.

CAFFEINE-LECITHIN: Combination of caffeine and phospholipids, which moisturizes and smooths the skin. Inside

a liposome caffeine penetrates the epidermal barrier. Ideal for the eye area to fight black circles and eye puffiness.

CAFEISILANE C: Silanol and caffeine complex, with potent lipolytic action. It enhances skin firmness and fights cellulite. In vitro studies showed that it is able to inhibit lipoprotein lipase activity and can lead to the inhibition of lipid storage increase in the lipocytes.

CALCIUM SULFATE: It is a mineral that when mixed with water causes an exothermic reaction, thus causing a temperature increase. This property is exploited in plaster masks which cause skin hyperemia by temperature increase and as a result they are regarded as excellent tools for aesthetics for the penetration of active ingredients.

CALENDULA EXTRACT: Calendula blossoms' extract, which is incorporated into cosmetics to protect the skin. It has strong anti-inflammatory, healing, soothing and antioxidant action. Contains flavonoids (mainly quercetin and rutin), chlorogenic acid and saponosides.

CALMOSENSINE: Lipopeptide that prevents the appearance of the wrinkles. It stimulates the release of pro-endorphins, offering excellent results in the youthful appearance of the skin and it inhibits muscle contractions that lead to the appearance of expression wrinkles.

CANADIAN WILLOWHERB: Herbal extract from a bush flourishing in Canada (epilobium) with anti-acne, antioxidant and anti-inflammatory / anti-irritant action. It inhibits the action of Propionibacterium Acnes which is responsible for many acne-related health problems by 99%. It significantly reduces the production of free radicals (in vitro test) and aids in the reduction of erythema caused by UV light by 25%.

CAPSICO-TABASCO PEPPER: Vegetal Extract obtained from Capsicum frutescens L., Solanaceae that increases blood circulation.

CELLIGENT: Contains a rosemary extract with a high carnosolic acid content. When applied topically, it supports the skin's defense against free radicals, especially in situations of increased radical stress. Protects the DNA and supports the repair of UV induced cell damage. It is both preventive and active skin anti aging protection.

CENTELLA EXTRACT: Extract from the leaves of the homonymous Asian plant. It has a phlebotonic and anti-swelling action, by activating the blood circulation, it brings renewed suppleness to the walls of the veins. It contains tannins and saponosides that offer firming action.

CERAMIDE 3B: Ceramides produced through biofermentation. They help with the arrangement of the lipids in the stratum corneum, a key term for the formation of skin barrier, protecting it from external factors. Ceramides are one of the main stratum corneum lipids. They offer anti-aging, rejuvenating, elasticity enhancing and moisturizing effect.

CERAMIDE HQ3: Structural component analogue to natural ceramides. It has a triple role: Protection against transdermal water loss (-22%), barrier against extrinsic agents (+25%) and increase of cell consistency (+47%).

CHAMOMILE EXTRACT: Chamomile extract exerts, due to its active component (azulene), soothing, calming and anti-inflammatory actions. It is used as a mild soothing agent against irritations and as an emollient, in products used around the eyes, after sun exposure, for babies, in cleansing milks and face masks.

CHAMOMILE OIL: Liposoluble chamomile extract.

CHIA OIL: Oil extracted from the seeds of *Salvia hispanica*, rich in Omega-3, Omega-6, vitamins and minerals. It is a source of antioxidants: Phytosterols, Flavonoids, Phenolic acids, Tocopherols (vitamin E) and other Poly-phenolic antioxidants. It offers calming and anti-redness effect, helps in inflammation

reduction, provides exceptional hydration, restores the skin barrier and has an anti-age activity thanks to its anti-free radical capacity.

CHITOSAN: Polysaccharide from shells with moisturizing and protective properties. Keeps the skin hydrated by creating a film.

CHLOROPHYLL: Chlorophyll is known for its excellent cleansing and styp-tic properties. It has been recently characterized as a potent anti-oxidant. Recent studies classify it among the ingredients that protect the skin from ultraviolet radiation.

CHOCOLATE: Chocolate contains theobromine, an ingredient which acts in blood vessels by increasing the microcirculation with visible results in invigoration and revitalization of the skin.

CHROMOCARE: Combination of extracts from the plants *Rabdosia rubescens* and *Siegesbeckia orientalis*, which acts against the damage of the chromophores of the skin (collagen, hemoglobin, melanin) improving its homogeneity and shine, offering a more youthful appearance. It acts against oxidative stress and has beneficial effects against aging of the chromophore (melanin stimulation, inflammation, collagen degradation).

CIKADERM: It contributes to the optimal maintenance of the functional parameters, enhancing normalization of scars and stretch marks from an aesthetic point of view. It regenerates damaged cutis and has strong regenerating properties on the cellular matrix and the tissues. Increases skin tone and elasticity, skin's water and lipid stocks.

CITRIC ACID: Citric acid granules. They are used for mechanical exfoliation.

COCOA EXFOLIATOR: Granules that are obtained from the shell of the cocoa beans and are used as mild exfoliating agent to remove dead cells. It contains theobromine that is very similar to caffeine and β -phenylethylamine which

stimulates and revitalizes the epidermis.

COCONUT EXFOLIATING POWDER: Granules from coconut shells with mild exfoliating properties.

COLA EXTRACT: Extract from the Cola Tree that grows in rainforests of Africa, with tonic properties.

COLLAGEN: Collagen with triple action. Supports cell metabolism and tissue renewal, enhances the skin's ability to bind moisture and smooth lines and wrinkles.

CUCUMBER EXTRACT: Cucumber extract has emollient, cleansing, cooling and soothing properties. Rich in vitamins, trace elements, hydrating and antiseptic substances, it helps preserving skin elasticity. It is known for its refreshing and toning properties, helping the skin become radiant. It is incorporated into cosmetics preparations mainly for oily and acne-prone skin.

CYPRESS ESSENTIAL OIL: Essential oil from cypress tree, known for its antimicrobial and styp-tic properties. It is revitalizing for the circulatory system and is used for phlebitis prevention.

D—

DEAD SEA MUD: Mud from the Dead Sea, rich in minerals, with cleansing and moisturizing properties. It improves blood circulation and natural skin renewal. Cleans the skin and removes fine particles and toxins from air pollution. Offers effective relief from psoriasis, eczema and acne. It helps natural skin hydration and removes dead epidermal cells.

DECAPEPTIDE-1: A decapeptide that reduces the amount of time the hair follicle remains in anagen phase, thereby limiting the possibility for hair growth.

DERMAL RESPIRATORY SYSTEM: Yeast extract (*Saccharomyces Lysate Extract*) that increases cellular oxygenation and wound healing while promoting collagen and elastin synthesis. Increases cellular

metabolism, while reducing inflammation.

DERMASOOTH: A natural complex containing *Enteromorpha Compressa*, *Silybum Marianum* and *Ocimum Sanctum* active fractions, designed to alleviate the processes that cause skin irritation. Reduces the inflammation caused by external aggressions, such as shaving and epilation. Soothes and reduces skin redness caused by irritation. Protects and restores the skin's barrier function.

DERMONECTIN: Oligopeptide, precursor of fibronectin with low molecular weight. It speeds up the healing process, increases skin hydration and elasticity, while reducing the number of fine lines and the size of wrinkles.

DETOXOPHANE: A purified extract of Swiss garden cress sprouts (*Lepidium sativum*), that contains sulforaphane, a well-known activator of phase II detoxification enzymes. Protects skin against pollutants and environmental stress factors. Prevents visible signs of skin aging and DNA damage.

DIAMOND POWDER: Powder made of synthetic diamonds for immediate skin rejuvenation and brightness. It offers even skin tone.

DRIELINE: Yeast extract with multiple actions. It protects Langerhans cells from radiation and strengthens skin's natural defense. It enhances the antimicrobial activity of keratinocytes and the immune system. It reduces erythema caused by irritation. It promotes the synthesis of collagen and, with the appropriate mechanisms, it renews and reconstructs the epidermis.

DURVILLEA ANTARTICA: Brown algae rich in specific sugars, able to resist to big cold. Its trace elements give it re-mineralizing and regenerating properties. Its high alginic acid content helps the skin to combat free radicals which are responsible for cellular ageing, moisturizes and protects it.

E—

ECOSLIM: A combination of vegetable caffeine vectorized by phospholipids and green coffee extract, effective for body slimming care, face and contouring.

ELASTINE MARINE: Aqueous extract of Tuna fish connective tissue rich in amino acids, that slows down the aging process. Marine source elastin with hygroscopic properties. It prevents wrinkle formation, firms skin, fights stretch marks, has important role in intracellular increase of calcium cations and contains high percentages of amino acids (valine, desmosine). It is a tissue component which is diminished as time passes and is de-generated by photoaging.

EMOLLIENT BLEND OILS: A mixture of oils of plant origin (coconut-palm) with cleansing and moisturizing properties, suitable even for the sensitive area around the eyes. Effectively removes makeup and cleanses the skin from pollutants and dust without irritating it.

ESGIN: It is derived from Horse Chestnut, has styptic, anti-inflammatory properties and enhances microcirculation. It strengthens capillary walls preventing edema formation.

EVENING PRIMROSE OIL: Oil derived from the seeds of *Oenothera biennis* L. (evening primrose or evening star). Evening primrose seeds are rich in fatty acids, containing over 10% of γ -linolenic acid (GLA). It improves the barrier function, reduces trans epidermal water loss (TEWL), induces structural changes in the epidermis - particularly in the horny layer. It is highly recommended for cosmetic products with moisturizing and emollient activities.

EYEDELINE: Biotechnological extract produced by a marine microorganism that offers complete skin care in the area around the eyes. Provides complete care of the eye contour area by reducing fluid extravasation and increasing the degradation of bilirubin. Moreover, it boosts collagen and elastin synthesis and

decreases the formation of advanced glycation end products (AGEs), for a brighter and younger look.

F—

FILAGRINOL: Mixture of oily pollen extract, soya oil, olive oil and wheat germ oil that regulates the natural production of filagrin and promotes skin's hydration. Ensures the integrity, durability and integrity of the skin barrier. Protects against lipoperoxidation and premature aging of the skin.

FUCUS EXTRACT: Thallus extract of algae (*Fucus Vesiculosus*) with emollient, soothing and slimming properties.

FUCUS OIL: Liposoluble fucus extract.

FUCUS VESICULOSUS: Algae variety that contains numerous trace elements as well as mannitol, β -carotene, zeaxanthin, iodine, bromine, potassium that acts against cellulite.

G—

GALLIC ACID: Skin brightening and color correction ingredient. It prevents UV-induced DNA damages and blocks melanin synthesis even under UV conditions. Effective on redness reduction, skin lightening, skin tone uniformization, reduction of pigmented spots, correction of melasma, correction of pigmentation disorders and inflammation. Also acts as a pore minimizer.

GERANIUM ESSENTIAL OIL: Essential oil from geranium, known for its styptic, haemostatic, deodorant and revitalizing properties. It may be used in the treatment of acne, for wound and burn healing, as well as in the treatment of dermatitis and eczema.

GLYCOFILM: It's a polysaccharide of high molecular weight, obtained by biotechnology. It creates a barrier against the 3 types of pollution stress-es: Atmospheric (carbon particles, particulate matter

and heavy metals), UV and Domestic (chemicals). Therefore, it limits the extra and intracellular induced damages: oxidative stress and inflammations.

GLYCOLIC ACID: It is the smallest AHA, a component that causes chemical exfoliation and skin regeneration. When applied, glycolic acid reacts with the upper layer of the epidermis, weakening the binding abilities of lipids that retain skin dead cells. In that way keratin layer exfoliation and simultaneous cell regeneration are achieved. It is used to improve skin appearance and texture. It reduces wrinkles, acne scars, hyperpigmentation and improves many other skin conditions, including hyperkeratosis.

GLYCYRRHETINIC ACID: Derived from the hydrolysis of licorice, has anti-inflammatory action and dramatically reduces lipocyte number. Effectively used in the reduction of topical fat accumulation.

GRANSIL: Ingredient for the topical delivery of Oxygen. Entraps oxygen into an elastomer matrix and transports it into the epidermis when it becomes a foam. Skin tissues are oxygenated and skin's defense is strengthened, protecting it from environmental factors and free radicals. The oxygenation of the skin brings deep renewal, revitalization and shine, reduces erythema and regulates excess oiliness. It also has anti-aging, antibacterial and healing properties.

GRAPESEED OIL: Plant oil delivered from grapes, rich in polyphenols.

GREEN CLAY: Green argile with cleansing properties.

GUARANA EXTRACT: Derived from the homonymous creeping plant, contains tannins (catechin, epicatechin, proanthocyanidole) resulting in topical blood circulation increase -detoxification and it is rich in caffeine with lipolytic action. Vessel toning, and styptic action.

H—

HAMAMELIS EXTRACT: Extracted from Hamamelis virginiana plant dried leaves, which are collected in spring. It is comprised of gallic acid, hamamelitannin and volatile oils. It has styptic properties and it is also used for skin invigoration. It also presents cooling and firming properties, due to the presence of tannin and tannic acid. Japanese studies support that hamamelitannin binds free peroxy radicals and consequently acts against photoaging.

HYALURONIC ACID (HA): The molecular weight of natural hyaluronic acid found in human skin ranges from 4 kDa to 8,000 kDa. When used in cosmetic formulations, depending on its molecular weight and size, offers different properties and actions.

1. HMW HYALURONIC ACID (HIGH): 1.800-2.200 kDa. Film formation, reduction of transdermal water loss and increase in water reserves. Smoothing effect and glow.

2. MMW HYALURONIC ACID (MEDIUM): 1.300-1.800 kDa. It offers long-term hydration, protection against adverse environmental conditions and improved skin texture.

3. LMW HYALURONIC ACID (LOW): 400-1300 kDa. It offers instant hydration, UV protection and regulation of excess oiliness.

4. ELMW HYALURONIC ACID (EXTRA LOW): 200-400 kDa. Deep hydration. Carrier of active substances.

5. XSMW HYALURONIC ACID (EXTRA SMALL): 30-60 kDa. Percutaneous absorption that nourishes the skin, increases hydration and reduces water loss. Improves elasticity and helps with the reduction of wrinkles.

6. MINI HYALURONIC ACID: 3-10 kDa. It penetrates the skin, repairing cellular damage. It offers deep hydration and anti-aging. It works against the free radicals caused by UV radiation and slows the aging process. Strengthens the skin barrier and enhances its elasticity.

HYALURONIDASE: An enzyme that fights cellulite through an enzymatic action

mechanism, called "mucopolysaccharide depolymerization", that acts with «water concentration transportation» into the cells. Tissue permeability increases through hyaluronic acid hydrolysis.

HYDROLYZED COLLAGEN: See MARINE COLLAGEN.

HYDROLYZED ELASTINE: See ELASTIN MARINE.

HYDROXYPROLISILANE: Biotechnological product derived from the reaction between hydroxyproline with silicone. It also contains aspartic acid. Its main action is the activation of fibroblasts and tissue regeneration (wrinkle reduction, wound and stretch marks healing).

I—

INCA OMEGA OIL: Oily extract derived from Plukenetia Volubilis seed which is native in Peruvian Amazon. It contains one of the highest amounts of polyunsaturated fatty acids (PUFA) among all oily seeds used for human consumption. It reaches an average of 48% content of alpha-linolenic acid (Omega 3) and an average of 37% content of linoleic acid (Omega 6). Additionally, it contains approximately 8% of oleic acid (Omega 9). It also has a high concentration of tocopherols, with gamma and delta tocopherol contents rarely seen at other seeds. Cutaneous application of Inca Omega Oil leads to reduction of Trans Epidermal Water Loss, improvement of skin's barrier function, reduction of hyper-sensitivity, improvement of microcirculation. PUFA and tocopherol content protect the cells' membrane and prevent the destruction of DNA.

IODOTRAT: Active iodine compound for local action against cellulite. It has lipolytic properties, stimulates metabolism and helps to decongest fluid retention that forms cellulite.

IRAMOIST LGS: An ingredient that participates in hydration through natural agents which are present in epidermal

tissue. The Sodium salts that it contains (sodium pca & sodium lactate) are hygroscopic and absorb about 60% of their weight in water.

ISOSLIM COMPLEX: Active complex, based on genistein (biologically active form of soy isoflavones), with slimming and anti-cellulite action. It inhibits the formation of new adipocytes and helps to break down fat. In this particular complex, genistein is combined with caffeine, carnitine and spirulina extract that have liposoluble and firming properties. Enhances the production of collagen IV, making the skin smoother and firmer.

IVY EXTRACT: Extract of ivy leaves containing saponins, flavonoids, phytosterols and caffeic acid derivatives. Accelerates the process of eliminating harmful substances such as toxins. It reduces the volume of adipocytes and the appearance of cellulite. Redefines the shape of the body and prevents spider veins. It also has important anti-inflammatory and vasoconstrictor properties.

IVY OIL: Oil from ivy, having lipolytic and anti-edematous action.

J—

JOJOBA OIL: Oil from the homonymous bush that grows in the deserts of Mexico, Arizona and California with particular molecular structure and high resistance to oxidation. It has moisturizing and emollient properties.

K—

KAOLIN: Mineral with cleansing and soothing action. The name kaolin comes from a region of China where it was isolated (Kaoling Hill). It is consisted of silicon dioxide, iron, magnesium, calcium, sodium, potassium, zinc and other metals and it is used since the old ages since it is insoluble in water and has excellent oiliness absorbing capacity.

KELISOFT: Ingredient that contains the natural plant molecule chelidone which reduces the speed of hair growth and exerts anti-inflammatory properties. Provides an immediate soothing sensation after shaving. Regulates the production of inflammatory mediators that are involved in the burning feeling after shaving.

KERATOPLAST: Ingredient originated from the bark of willow trees. Reduces redness associated with spider veins. Improves skin thickness, collagen production, reduces wrinkles, skin roughness and hyperpigmentation by removing dead skin cells and allowing the skin to absorb other complementary anti-aging products (antioxidants, moisturizers) to the maximum of their abilities. It also has anti-inflammatory and antiseptic properties. Improves the appearance and condition of the skin. Its micro-exfoliating effect causes a slow movement of superficial cells that are already aged, forcing the deeper layers to replace them with newer ones. In this way the skin becomes smoother and more compact and the spider veins are better protected and less visible.

KOMBUCHKA: Product of the fermentation of sweet black tea by the symbiosis of two microorganisms. It has an antiglycation activity and increases adipocyte population in the skin, thus restores volume of the deficient zones. That improves overall skin quality by enhancing skin smoothness and radiance.

L—

LACTIC ACID: A-hydroxy acid derived from sugar fermentation with regenerating properties. It has a mild exfoliating effect, improves skin elasticity and provides hydration and firming. It has strong anti-aging action, it fights spots and discolourations and helps to reduce the growth of bacteria and micro-organisms in the skin.

LACTOKINE (MILK PEPTIDE): A molecule derived from milk that enhances cellular activity and skin protection system.

Stimulates collagen synthesis and has anti-inflammatory and calming effect. Prevents signs of premature aging and at the same time offers an even skin tone.

L-ASCORBIC ACID: It is derived from citrus fruits and constitutes the chemical name of Vitamin C. Necessary ingredient for tissue development and repair, as well as for collagen formation. It aids in wound healing and is a perfect antioxidant. It is also effectively used in skin whitening.

LAVENDER OIL: A natural lipid extract produced in Greece by the extraction of lavender flowers cultivated in Greece. It has antiseptic, antimicrobial and antioxidant properties.

LEMON ESSENTIAL OIL: Oil obtained from the lemon fruit with astringent and toning action.

LEMON EXTRACT: Lemon extract, source of fruit acids and sugars with antiseptic, tonic, astringent and soothing effect. Offers mild keratolysis and hydration.

LICORICE EXTRACT: Natural extract of licorice roots. Licorice possesses potent and effective anti-inflammatory, antioxidant as well as lightening the skin color by inhibiting melanin formation, mainly by the inhibition of tyrosinase activity.

LIFTESSENCE: Bracken plant extract (polysaccharide) that provides flash lifting effect and reduces fine wrinkles. Clinical studies demonstrated that for the first hour after its use flash effect is determined as: Wrinkle reduction by 26% , elasticity increase by 12% and skin tone improvement by 5%.

LIPEXEL: Seed oil of *Luffa cylindrica*, rich in linoleic acid, that mimics the synthesis of fatty acids in the skin. It helps the restoration of the skin's integrity. It enhances the renewal of the stratum corneum, the elasticity of the epidermis and helps to restore its water balance. It helps to fight the dryness caused by cleansers, powders and make-up, protecting the skin from water loss.

LIPOCARE: Potent slimming cocktail with Bupleurum Falcatum (Chinese plant) root extract, herbal caffeine and biotechnological Coenzyme-a. It has lipolytic and firming action, and it improves orange peel skin appearance.

LIPOUT: An oily ingredient that stimulates the process of burning stored fat, achieving a slimmer and sculpted silhouette. It fights cellulite and improves skin elasticity.

M—

MACADAMIA OIL: Vegetable oil from the fruit of the homonymous tree, rich in phytosterols. It has very good moisturizing and emollient properties.

MALLOW OIL: Oily extract from the leaves and the flowers of the plant "Malva sylvestris L." Mallow oil is a preparation which contains all the main liposoluble active ingredients found in the flowers of the plant. Its traditional use in cosmetics is based on its moisturizing and emollient properties. It also has anti-inflammatory action.

MALUS DOMESTICA: Ingredient for skin regeneration, based on apple stem cells' extract. It protects skins' stem cells and delays the aging process of the basal cells. The skin retains its youthful appearance and vitality.

MANDARINE EXTRACT: Mandarin extract with moisturising, emollient, tonic and nourishing properties.

MANDELIC ACID: Mandelic acid is an alpha hydroxy acid (AHA) that normalises the keratinisation process and enhances skin exfoliation. Its macromolecular structure offers a mild chemical peeling effect which helps prevent irritations and make it suitable for all skin types and all phototypes. It hydrates the skin, enhances cellular remodelling and reduces skin discolouration. Its antimicrobial action makes mandelic acid ideal for fighting acne.

MANUKA OIL: Oil from manuka trees with antifungal and antimicrobial actions, treating and regulating acne problems. It also has antihistaminic actions.

MARINE COLLAGEN: Collagen of marine origin, rich in amino acids that offers hydration and elasticity to the skin. Creates a skin film that reduces moisture loss, providing more effective hydration for longer time, while firming the epidermis.

MATRIXYL: Lipopeptide of the matrikine family that stimulates the synthesis of collagen type I, III, and IV. It has anti-wrinkle action and activates 16 genes involved in the healing process of the skin.

MATRIXYL 3000: Oligopeptide with matrikines, which are messengers of skin reconstruction, offering anti-wrinkle action. According to in vivo tests performed, it drastically reduces the size, density, volume and depth of wrinkles as well as skin roughness ensuring damage is restored, while stimulating collagen and fibronectin synthesis.

MENTHA ESSENTIAL OIL: Mint essential oil, known for the sense of coolness it provides during its evaporation when it contacts the skin. It stops itching, relieves weariness and has analgesic action.

MENTHOL: Menthol offers a sense of coolness. It is antiseptic, invigorating, analgesic and has the ability to relieve skin weariness.

METHYL NICOTINATE: It is a vitamin B ester (niacin or nicotinic acid). Potent vasodilator, it achieves capillary dilation, and causes redness of the skin. It increases skin circulation and aids in lipolysis.

METHYL SALICYLATE: An ester of salicylic acid with characteristic odour used in personal care formulas for its soothing properties. It offers anti-inflammatory action and relieves pain.

MILD SURFACTANTS: Surfactants that are "gentle" that cleanse the skin from pollutants, dust and remove makeup

without causing irritation. They do not contain SLES & SLS.

MILK PEPTIDE COMPLEX: Bioactive polypeptides obtained from milk that help in the regeneration of the mature skin and reduce the visible signs of aging. They reduce the depth of wrinkles, increase elasticity and improve the texture of the epidermis.

MIMOSA EXTRACT: Extract from the homonymous bush, also known as Tepescohuite, rich in flavonoids and tannins. It improves blood circulation, stimulates cell division and strengthens capillaries. It has antioxidant, tonic, anti-aging and anti-inflammatory action.

MOIST-24: Extract from the roots of the Imperata Cylindrica plant, which survives extreme drought and salt conditions and is rich in potassium. Moist 24 has the ability to trap inside the cells the water available to the epidermis and maintain its moisturizing balance.

MONOI DE TAHITI: Oil with excellent emollient properties derived from the petals of the homonymous Polynesian plant. It is used to relieve erythema.

MSHC: Hygroscopic powder of hydrolyzed marine collagen, helps in wrinkle treatment, revitalizes and hydrates, offering an immediate lifting sensation.

MUD THERMAL HEILMOOR: Rare form of mud from Reichenau of Austria, rich in nutrients, created in the course of time by gradual conversion of plants and herbs situated underwater and underground in the absence of oxygen. During this process all organic and inorganic substances of the plants are brewed with mud and this result in a plant complex with special healing properties. In combination with trace elements of the soil, the mud revitalizes, cleanses and restores skin balance.

MULTI B COMPLEX (B1,B2,B3,B5,-B6,B12): Vitamin B complex offers balanced skin care. Contains Provitamin B5 (D-Panthenol), Vitamin PP (B3

Niacinamide), Vitamin B1 (Thiamin), Vitamin B2 (Riboflavin), Vitamin B6 (Pyridoxine) and Vitamin B12 (Cyanocobalamin).

MUSHROOM EXTRACT: Reishi and Shiitake mushroom Extract with moisturizing and anti-aging action. It increases the elasticity of the skin and the renewal of the cells.

MYROTHAMNOUS EXTRACT: Extract from the plant Myrothamnous Flabellifolia that is native in the desert of South Africa. Protects skin's cells against dryness and stabilizes skin's moisture and lipid barrier thus, it effectively increases skin's resistance to irritation and promotes a speedy recovery.

N—

NORMASEB: Ingredient from the hydrolysis of milk proteins used for sebum control. It can reduce sebum secretion in oily skin and increase it in dry skin, restoring the hydrolipidic film. Biotechnological product, rich in amino acids (cystine and methionine) and vitamin B6.

O—

OLIVE OIL: Olive oil rich in antioxidant, such as vitamin E, vitamin K and polyphenols which protect skin from premature aging. It also contains trace elements such as sodium and potassium which regulate cellular osmotic pressure and the transfer of nutrients.

OSILIFT: Immediate and visible firming action with the power of oat. Its active ingredient has high-molecular weight, is consisted of sugars and creates a continuous, compact, elastic and protective film that firms the skin. It is one of the most potent weapons against wrinkles.

OSMOPURE: Ivy, heliotrope and rice bran extract protecting the cells from toxic environmental effects, atmospheric pollution and harmful effects of tobacco,

Sulphur dioxide and heavy metals. Phenolic acid contained in the first two plants, in synergy with rice phytic acid, offer excellent skin protection.

OXYFORCE CELLULAR ACTIVE: A high-performance ingredient that revitalizes the appearance of skin, through delivery of molecular oxygen. Supports natural collagen production, reduces wrinkles' depth and enhances skin's smoothness. It improves the energy levels of cells and increases their proliferation. It reduces the depth of wrinkles and improves the appearance of the skin.

P—

PANTHENOL: A vitamin from vitamin B complex with healing, hydrating, and calming actions against inflammations and irritations. It is readily absorbed by the skin, it rapidly penetrates and retains water inside it. It stimulates the proliferation of epidermal cells, protein synthesis, and accelerates the healing of minor skin wounds.

PAPAIN: It is derived from papaya seed. It is an enzyme that has potent keratolytic action and substantially delays hair growth. It also helps in reducing inflammation, preventing allergies, enhancing immune system.

PENTACARE: Polysaccharide from carob bean gum and wheat gluten with potent, long-lasting skin-tightening and smoothing effect.

PENTAVITIN: Saccharide that regulates skin moisture even under extreme drought conditions. Reduces irritation and hydrates after use of AHAs (clinical studies).

PEONIA FLOWER EXTRACT: Paeonia flower extract derived from bio-fermentation. It delivers whitening effect by inhibiting melanin production and tyrosinase gene expression. It also has anti-aging and anti-oxidative effect.

PERLITE: 100% natural ingredient derived

from volcanic rock. The microspheres have been specifically engineered to obtain a unique spherical shape and a controlled particle size distribution which gives gentle exfoliation whilst maintaining good scrub properties.

PHYTIC ACID: Stabilized solution of phytic acid, the natural whitening and antioxidant agent.

PHYTODERMINA LIFTING: Biotechnological product of vegetable origin by enzymatic starch conversion, offering immediate firming action, promoting the production of collagen and elastin while hydrating the skin at the same time. In high concentrations it has immediate healing action.

PHYTOPEELING: Combination of 3 dried plants, Spongilla, Fragilis and Ephydatia from Russia and Canada lakes. It has the ability of performing mechanical and chemical exfoliation at the same time. It removes dead skin cells, corrects discolorations and acne signs, reduces wrinkles and stretch marks. It controls sebum secretion and stimulates natural skin restoration process.

PLANTAGO EXTRACT: Plantago extract known for centuries for its anti-inflammatory and healing properties due to its active ingredient, acteoacalm. It has anti-oxidant and anti-inflammatory actions and reduces erythema caused by UVB radiation.

PLANTAGO OIL: Oily extract from the leaves of plantago, which has been used as an anti-inflammatory agent. It is very rich in flavonoids, tannins and phenolic acids.

POLLUSHIELD: An anti-pollution cosmetic ingredient with the complementary actions of a polymer that binds toxic metals and a strong antioxidant. Provides a barrier to the skin against environmental pollutants and enhances the antioxidant potential of the epidermis.

POLYTRAP: Polymer powder that absorbs

high levels of lipophilic substances. The powder consists of particles with geometry smaller than one micron and when they come in contact with the epidermis they absorb its excessive oiliness as the particles "disappear". Its main action is sebum control.

PRICKLY PEAR EXTRACT: Oligosaccharides of prickly pear with enzymatic and exfoliating action without causing irritation. It favors the exfoliation of keratinocytes, enhancing the activity of enzymes involved in the lysis of proteins. Improves the appearance of lines and wrinkles but also clarity and luminosity of the skin. Suitable for sensitive skins.

PRO-SVELTYL: Extract from the plant *Nelumbo Nucifera*, more familiarly known as Sacred Lotus. Reduces fat storage by activating lipolysis. It limits adipose tissue inflammation by stimulating the expression of adiponectin and has anti-cellulite and draining effect.

PROVITAL D3: Provitamin D derived from bio-fermentation. The presence of vitamin D in the skin is considered very important for the physiology and health of the epidermis. Reduces skin irritation and enhances its barrier function. It has an antimicrobial effect via a peptide that works on skin conditions such as eczema and atopy. Finally, it protects against UV radiation.

PHYTOSQUAL: An active ingredient derived from olives, known for its moisturizing, emollient and antioxidant properties. It offers hydration and prevents fine lines and dryness.

R—

RED CLAY: Red clay with a high content of minerals (silicon, sodium, magnesium, calcium, potassium, zinc) and iron oxides (red colour) that offers renewal and glow to the epidermis. It also improves the texture and firmness of the skin.

RED CLOVER EXTRACT: Extracted from the red clover flower. It refines skin texture

and reduces pore dilation. Improves keratinization, regulates seborrhea, and acts as an astringent.

REDYLESS: Redyless is based on a new molecule, the piperonyl glucose. Prevents flushes from occurring and controls redness on a daily basis, whether it be transitory or persistent, to help individuals suffering from redness. It strengthens fragile blood vessels. It reduces skin sensitivity to variations in climate and food-related stress (spices, etc.). Suitable for individuals with erythema and rosacea.

REMODULINE: Ingredient extracted from the petals of the bitter orange tree that fights cellulite and "orange" skin. Favors lipolysis and stimulates microcirculation. Smooths, tones and improves silhouette.

RESVERATROL: Antioxidant that is obtained from the skin of red grapes, rich in polyphenols. Research has shown that it has excellent anti-aging properties for the skin cause it helps to slow down their aging process. It protects from free radicals and regulates healthy cell growth, thereby extending the cells ability to function.

RETINOID: Ester of all-trans retinoic acid (tretinoin), Hydrapinacolone is offered for cosmetic use without causing irritation and phototoxicity. Fights the appearance of fine lines and wrinkles for youthful looks and vigorous skin. The spots and imperfections of the skin are reduced, giving a uniform color tone and shine. Reduces pore size and leads to total skin clarity. It is a high performance component for cosmetology and has an advantage in its stability, efficacy and ease of use against all known retinoid derivatives.

RETINOL-A (GLYCOSPHERES): Vitamin A that stimulates mitotic activity on the skin and aids in the process of cell division. It stimulates cell proliferation in the epidermis and thus boosts their growth. It strengthens skin density, which becomes thinner as aging progresses. It improves skin elasticity. It helps restore tissues damaged by sunburn. It helps wound

healing. It stimulates collagen formation in the skin. It reduces the number of wrinkles caused by UV radiation. It controls keratin formation.

RETINYL PALMITATE: Retinyl palmitate is a representative oil-soluble molecule of vitamin A that increases elasticity of the skin & reduces wrinkles' depth. It is essential for the growth and differentiation of skin cells, maintains a healthy skin layer and restores damaged skin tissue.

RICE EXTRACT: Rice extract rich in fatty acids, vitamins (especially vitamin B) and flavonoids, mimicking Natural Moisturizing Factor (NMF). It has moisturizing, rejuvenating and soothing properties.

RUMEX: Derived from a plant from the north fields of Canada. Natural tyrosinase inhibitor, brightens the skin and minimizes erythema and age signs.

RUSCUS EXTRACT: Ruscus extract rich in rutin, it has anti-inflammatory action, causes increased microcirculation, reduces swelling and effectively fights cellulite.

S—

SAGE ESSENTIAL OIL: Essential oil from sage with astringent properties, ideal for oily skins. It is also an anti-oxidant, antibacterial and anti-inflammatory component.

SALICYLIC ACID: Salicylic acid is a beta hydroxy acid which has the ability to permeate the skin achieving strong keratolytic effect. It is extremely effective in treating oily skin with dilated pores, comedogenic and inflammatory acne. Other clinical studies support its use in photoaging treatment, post-inflammatory hyperpigmentation, and epidermal melasma. Because salicylic acid does not cause cell destruction or inflammation, it may also be safely applied on sensitive skin phototypes.

SALMO OYUM: Salmon oil, rich in Omega-3 and Omega-6 fatty acids, proteins and amino acids, substances that nourish and restructure the skin and effectively reduce wrinkles.

SAMBUCUS FLOWER EXTRACT: Extract of Elderberry (*Sambucus Nigra*) flowers. It is rich in flavonoids and other polyphenols, for strong anti-oxidant and anti-inflammatory properties. Focuses on eye bags and dark circles both resulting from local inflammation. It contains rutin that has proved to protect vascular barrier integrity.

SARGASSUM: Brown surface algae, source of vitamins C and K for toning and regenerating the skin.

SEA BUCKTHORN OIL: Plant oil of the family of hippophaes, known as Siberian Olive. It is the richest plant source of omega 7, essential fatty acids and antioxidant vitamin E., help to moisturize, regenerate and protect the skin from premature ageing.

SEA SALTS: Salts from the Dead Sea, known for their therapeutic properties. Rich in magnesium and trace elements, are used as mechanical exfoliation granules. They reduce skin roughness, improve its hydration and enhance blood circulation.

SEAWEED GEL: Algae that contain numerous trace elements and amino acids as well as mannitol, b-carotene, zeaxanthin, iodine, bromine, potassium, with main action the treatment of cellulite.

SEBOPESSINA: Soya sterols for regulating sebaceous secretions. Effective against acne.

SEBUSTOP: Combination of three active plant extracts, with astringent action designed to respond to the problems of oily skin. Reduces excess sebum secretion from the skin surface and pore diameter in less than 15 minutes, offering glow without imperfections. Controls the irritation caused by bacterial proliferation while inhibiting their growth.

SEPIlift: Triple firming action for rejuvenation, moisturization and wrinkle prevention. Stimulates the contraction of collagen fibers and protects elastin and fibroblasts against free radicals.

SHEA BUTTER: Butter from the homonymous African tree, known as "karite", with high concentration in fatty acids, especially oleic, stearic and linoleic acid. It has moisturizing, emollient and anti-inflammatory properties and protects the skin from exogenous factors (UV radiation, weather, etc.).

SIRTUIN COMPLEX: Proteins named after the initials of "silent information regulator 2 proteins". They are characterized as the longevity gene due to their action mechanism (cell "self-cleaning") And this is due to the fact that when the cell is "hungry" it is forced to be fed from the inside. However, cell self-preservation drives it to keep its vital elements and to be fed by proteins which were oxidized by free radicals.

SKIN CONDITIONERS & EMOLLIENT OILS: Mixture of oils of vegetable origin with cleansing and emollient properties. Cleans the skin from pollutants, dust and removes makeup easily without any irritation. It does not leave oiliness and it can be used by all skin types.

SKIN CONDITIONERS: Oils of vegetable origin with cleansing and emollient properties.

SOJA: Soja and its derivatives are rich in isoflavones, components that participate in cell metabolism, enhance collagen production and inhibit the action of metalloproteinases. This ingredient contains active soya isoflavones inside liposomes. It stimulates the production of collagen, leading to an increase in the density and elasticity of the skin.

SPIRULINA EXTRACT: Derived from the homonymous edible marine algae. Contains amino acids, essential fatty acids, vitamin E, provitamin A, vitamin B6, B12, iron, selenium, zinc, manganese, that help in the preservation of natural water

balance of the skin . It increases cells' capability to encapsulate oxygen and helps in the preservation of the internal skin structure. It is characterized as a very good anti-oxidant.

ST. JOHN'S WORT OIL: Extract of St. John's Wort which contains the lipid-soluble constituents of the overground parts of the plant collected during blossom. It accelerates the healing process and reduces inflammatory reactions. Suitable for application to sensitive, irritated and allergy prone skin. It is also suitable for rough skin and for the preventive care of skin of all types.

SVELTAM: An exclusive slimming active extracted from natural caffeine which acts on adipocytes at two levels: blocks adipogenesis and stimulates lipolysis.

T—

TENSEA LIFT: Marine extract with immediate "lifting" effect. Provides protection against metalloproteinases (anti-aging, free radical protection). It gives glow to the skin and improves the texture of the epidermis.

THALATON: Extract of marine biomass that contains plankton and is rich in oligoelements. Contains iodine, magnesium, valine, methionine, arginine, serine, alanine, glycine, aspartic and glutamic acid that offer lipolytic and regenerative action.

TIGLIO EXTRACT: Flower water from lime flower known for its soothing and emollient properties.

TOCOPHEROL: See VITAMIN E.

U—

UNIREPAIR-T-43: An amino acid (tyrosine, proline, hydrolyzed vegetable protein) and adenosine complex. It works directly on the DNA to help restore the skin. It strengthens cellular energy, reverses the damage caused by UV radiation and

fight redness.

UNISPHERES (VITAMIN A, VITAMIN E):

Coloured, visible spherical beads mainly consisting of Lactose and Cellulose that act as carriers of vitamins A & E. When they come in contact with the skin they are easily dissolved and release the vitamins.

UREA: It is known for its moisturizing properties (urea improves the skin's ability to grab and keep the water in the dermis) and keratolytic effect (it is used to treat hyperkeratotic situations by removing dead cells). Urea penetrates very easily into the skin and promotes the penetration of other active ingredients. Reduces the growth of bacteria on the skin and in the products and restores elasticity and softness to dry and rough skin.

UV-FILTERS: Organic and inorganic filters for sun protection.

V—

VASELINE PHARMACEUTICAL: White gel of special treatment and mineral oil origin used for moisturizing and nourishing the skin.

VENUCEANE: Biotechnological product from *Thermus thermophilus* culture, a microorganism that lives in California gulf sea, at a depth of 2000 meters, at 75°C and pressure of 200 bar. Preserves and reinforces the skin's natural physical defence. Stimulates the production of the structural lipids of the stratum corneum (ceramides) and reinforces the cutaneous barrier. It improves skin moisture and corneocyte cohesion. Recent studies have shown that it fights IR-Ageing and lessens the inflammatory conditions.

VITAMIN A: See RETINYL PALMITATE.

VITAMIN B3 (PP & NIACINAMIDE): Vitamin that helps the restoration of the skin, with multiple benefits for maintaining its youthfulness. Improves the appearance of dilated pores, offers homogeneity and shine to the skin and fights fine lines. It is equally beneficial and effective for

mature and tired skin, as well as for acne (common and rosacea).

VITAMIN B6 (PYRIDOXINE): A vitamin offering valuable aid in nourishment and health of the epidermis. Appropriate for oily skin, since it reduces the excess sebum secretion and controls oiliness.

VITAMIN C: See L-ASCORBIC ACID.

VITAMIN COMPLEX E-C-F: Complex of E, C and F vitamins in almond and cardamom oil carrier. It contains fatty acids such as oleic, linoleic and linolenic acid.

VITAMIN E: Natural anti-oxidant ingredient, of plant origin that fights free radicals. It also contributes in skin elasticity preservation and moisturizes the skin.

VITAMIN F FORTE (LINOLEIC ACID, LINOLENIC ACID): Plant originated Vitamin F that contains polyunsaturated essential free fatty acids with a particularly high content in linoleic acid. Reorganizes impaired lipid barrier, reduces elevated trans epidermal water loss (TEWL), smooths rough and scaly skin.

VITAMIN F (LINOLEIC ACID, LINOLENIC ACID): Natural, antioxidant, hydrosoluble ingredient of plant origin. It contains polyunsaturated, free fatty acids, with high content in linoleic acid. Its action offers excellent care for dry skin and for the restoration of normal concentration of lipids on the epidermis.

VITAMIN B9 (FOLIC ACID): Folic acid derived from Bio-fermentation. It stimulates the metabolism of proteins and the immune system. It reduces wrinkles through cell growth stimulation, prevents UV-induced damage, provides anti-allergy action and moisturizes.

VITAMIN PP (NIACIN & NICOTINIC ACID): See VITAMIN B3.

W—

WHEAT GLUTEN: Hydrolyzed wheat protein, produced by an enzymatic process. It has the property of forming a protective layer, when it comes in contact with the epidermis, that traps moisture inside. It also offers antioxidant and antiaging effect.

WHEAT GERM OIL: Emollient wheat oil.

WHITE ARGILE: White clay with high mineral (sodium, magnesium, calcium, potassium, zinc) and silica content. Ideal for deep cleansing, glow and vitality of the epidermis.

Z—

ZEAMAYS: Derived from corn. It has excellent anti-aging effects. It also has smoothening, and absorbing priorities. It protects the skin and acts as an antiseptic. Rich in amino acids, thiamin, niacin, vitamin C, iron, magnesium, and potassium.
