## AMESON MEDICAL SERIES HIGH-END MESOTHERAPY SERIES

### PROTOCOL MESOTECH

## REJUVIN-ANTI-AGEING

**Anti-aging treatment for skin's renewal, rejuvenation, photo protection and radiance with REJUVIN cocktail containing powerful active ingredients, active peptides and booster peptides.**

Contains oligopeptides, hyaluronic acid MMW, DNA-RNA Complex, AA2G, Panthenol, Vitamin PP and amino acids for a comprehensive anti-aging care.

Biomimetic booster peptides improve, strengthen and accelerate the action of the other active ingredients.

MMW HA is capable of "film" forming on the skin and does not allow the transdermal water loss. Alongside redefines the face's oval, smooths fine lines and wrinkles, increases the volume and creates a visible natural lifting.

Vitamins have antioxidant, regenerative and soothing properties.

DNA- RNA Complex improves water supply to the tissues, regenerates and protects cell membranes.

AA2G has significant antioxidant and brightening action. Amino acids promote collagen synthesis by fibroblasts.

### ACTION

Hydration, rejuvenation, firmness, wrinkle reduction

### INDICATIONS

Dehydrated skin, dry & dull complexion, photo aging, deep wrinkles & fine lines, rough skin, loss of firmness and volume

### DEEP CLEANSING

Clean the area to be treated with the appropriate product depending on skin type.

### PEELING

For increasing the final results, Juliette Armand suggests using chemical peeling **MANDELIC ACID 40%** of **AMESON MESOPEEL** series.

Apply **PRO PEEL** impregnating a cotton, to prepare and reduce skin's pH. Apply all over the face and do not remove. Protect sensitive areas by applying an oily textured cream (around the eyes, mouth outline, mols, etc.).

Apply **MANDELIC ACID 40%** over face, soaking a cotton swab. Start with the forehead and outer areas of the face. Continue to the central part of the face. Only a thin layer is required. Leave the product to act for 2-7 minutes.

Apply **POST PEEL** using cotton for neutralizing the chemical peeling. If irritation is intense use cold water compresses too.

**Caution:** If there is a contraindication in using chemical peeling, select the appropriate exfoliating product from the ELEMENTS line.

## **MESOTECH**

Use **AMESON MESOTECH REJUVIN** by pulling with a syringe 2.5 ml from the vial and choose the right equipment for the transdermal delivery of the product. **AMESON MESOTECH** are compatible with microneedling, electroporation, ultrasound and iontophoresis. When you apply AMESON **MESOTECH** with this equipment, follow the manufacturer's instructions.

After treatment, apply **CALMING BLISS** to irritated skin and/or **REPAIR GEL** for hydrating and accelerating the regeneration of skin.

## **PROTECTION**

### **Optional:**

Apply **SUNBLISS FACE SUNSCREEN 50 +** if necessary.

**SESSIONS:** 5

**TREATMENT REPETITION:** 4- 6 weekly
